Liberties Of Wit Humanism Criticism:

The Liberties of Wit, Humanism, Criticism, and the Civic Mind Robert Edwards Lane,1979 **The Humanities and the Understanding of Reality** Thomas B. Stroup,2021-03-17 In their concern with the perennial controversy between the two great areas in which men seek knowledge three eminent literary scholars and a distinguished journalist in these essays address themselves to the question Do the humanities provide a form of understanding of reality that the sciences do not Monroe C Beardsley maintains that the humanities considered as contributors to knowledge must deal with the same subject matter as the sciences but literature and the arts can enlarge our powers of understanding human nature although not in the way the sciences do under empirically or logically verifiable laws Northrop Frye while acknowledging the difference in methodology and mental attitude asserts that the humanities on the other hand express man s concern for this world most clearly in the myths by which man realizes his involvement in mankind and his responsibility for his own destiny Frank Kermode argues that to follow the ways of sciences in searching out repetitions such as make myths is to lose sight of the unique particular and concrete expressions which underlie personal participation and sharpen the sensibilities And this experience he maintains is the peculiar contribution of the humanities In the final essay Barry Bingham editor and publisher of the Louisville Courier Journal calls for a vigorous cultivation of the liberal arts in American life **The Semiotics of Consumption** Morris B. Holbrook,Elizabeth C. Hirschman,2012-01-02 No detailed description available for The Semiotics of Consumption Why Literature Matters in the 21st Century Mark William Roche,2008-10-01 Not just another jeremiad against prevailing isms and orthodoxies Why Literature Matters in the 21st Century examines literature in its connection to virtue and moral excellence The author is concerned with literature as the teacher of virtue The current crisis in the humanities Mark William Roche argues may be traced back to the separation of art and morality When the distinction between is and ought is leveled he writes the power of the professions increases The arts and humanities concern themselves with the fate and prospects of humankind Today that fate and those prospects are under the increasing influence of technology In a technological age literature gains in importance precisely to the extent that our sense of intrinsic value is lost In its elevation of play and inexhaustible meaning literature offers a counterbalance to reason and efficiency It helps us grasp the ways in which diverse parts form a comprehensive and complex whole and it connects us with other ages and cultures Not least great literature grapples with the ethical challenges of the day **The Ashgate Research Companion to Political Leadership** Mikhail A. Molchanov,2016-03-23 Discussing the major theories of political leadership with a focus on contemporary challenges that political leaders face worldwide this research companion provides a comprehensive and up to date resource for an international readership The editors combine empirical and normative approaches to emphasize the centrality of political culture as well as the limits of culture and the universal demands of innovative adaptation The volume examines Humane Politics and Methods of Inquiry Ithiel de Sola Pool,2017-07-12 Ithiel de Sola Pool was a distinguished

scholar of the political process and one of the most original thinkers in the development of an integrated social science This volume focuses upon his contributions to the development of research methods that deepen our understanding of human behavior The book is divided into five parts treating the analysis of communications computer simulation forecasting network theory and the social sciences in political contexts The first part considers the problems and possibilities of analysis raised by the unprecedented quantity of data made available by widespread and improved communications technology what should be counted and how should inferences be made Part two explores computer simulation in the study of presidential election patterns and how it can provide in depth analyses of crisis situations in history Part three focuses on strategies for predicting the future of international politics and methods to forecast the impacts of new communications technologies while part four offers a rigorous analysis of domestic and global contact networks and the so called small world phenomenon Part five is concerned with external challenges to the use of social science to create more humane politics including the question of value neutrality ideology deconstructive critical theory and threats by government to the health of universities In a concluding essay Lloyd Etheredge draws upon Pool s work to discuss several new ways in which the methods treated in this volume can be applied to contemporary social change

After the End of History Robert E. Lane, 2009-11-16 Robert E Lane is one of the most prominent and distinguished critics of both the human impact of market economies and economic theory arguing from much research that happiness is more likely to flow from companionship enjoyment of work contribution to society and the opportunity to develop as a person than from the pursuit of wealth and the accumulation of material goods in market economies This latest work playfully personalizes the contrast through a dialogue between a humanistic social scientist Dessi and a market economist Adam It is all too rare to have the two sides talking to each other Moreover in Lane s witty and literate hands it is an open minded and balanced conversation in which neither side has all the answers His unparalleled grasp of interdisciplinary social scientific knowledge is brought to bear on the largest questions of human life What genuinely makes people happy How should human society be organized to maximize the quality of human lives David O Sears Professor of Psychology and Political Science UCLA Lane s deep knowledge of the sources of human happiness enables him to develop a powerful critique of economic theory Robert A Dahl Sterling Professor Emeritus of Political Science Yale University Robert E Lane is the Eugene Meyer Professor Emeritus of Political Science at Yale University His previous publications include *The Loss of Happiness in Market Democracies* 2000 and *The Market Experience* 1991

Selvages & Biases Michael G. Kammen, 1987 Winner of the 1973 Pulitzer Prize for history Kammen addresses three themes concerning the state of historical inquiry in America Beginning with how history as a professional discipline has changed over the past century the book treats the relationship of the historian s craft to American nationalism the value of historical knowledge and the shifting attitudes of historians toward society Kammen appraises the significance of historiography as a measure of cultural change and shows how the past has been manipulated for social and ideological reasons and how memories of the

national and regional past have conflicted with the realities of historical experience He also explains how traditional modes of interpreting the past have lost their cohesive force and why historians should pursue new approaches to the cultural history

The Future of Political Science Harold D. Lasswell,2017-09-04 Harold D Lasswell is arguably the quintessential face of political science to the larger public of the past century However there is a side to Lasswell less well known but of special importance in this day and age the place of the profession of politics as an academic activity This book written at the start of the culture wars thirty years ago outlines the basic core position of political science practitioners It helps to explain why the field kept its collective cool when other social science professionals veered to more extreme activist positions The Future of Political Science grew out of the phenomenally rapid expansion of the study of government in the United States and elsewhere The study of professionalism among physical scientists lawyers engineers etc was not matched

by such internal examination within the social sciences until much later Lasswell's overview centered on developments in the United States. There unfettered study of government reached unprecedented heights in the final stage of the twentieth century. The key concept of this volume one that continues to inform discourse is the relationship of political science as a mechanism for the study and teaching of the political system to the field as a tool of the Establishment. This concern grew in the wake of a variety of scandals and secret support sponsored by both government and non government organizations alike. The Future of Political Science covers areas ranging from membership size and disparities intervention scenarios in world events the nature of creativity in political research collaboration in projects with the other social sciences and the location of scientific centers of gravity in the study of politics. Because of Lasswell's works we have a field of the political science of knowledge as well as the sociology of knowledge. Harold D Lasswell served as Ford Foundation Professor of the Social Sciences at Yale University Distinguished Professor of Policy Sciences at John T. Harwood, 1982. Granting that literature delights Harwood addresses the moral questions that have been hotly debated by critics for the 300 years since Restoration comedy flourished. In what way does literature teach? How do beliefs about its effects on audiences shape critics' responses to and judgment of literature? Harwood begins with a survey of the major rhetorical strategies by which many critics transform themselves at least momentarily and perhaps unconsciously into moralists when they deal with restoration comedy. Then he places various moral responses in a broader critical context by analyzing ways in which critics have traditionally handled aesthetic problems which inevitably entail an ethical assessment of literature. Third he analyzes the moral dimensions of four controversial Restoration comedies: William Wycherley's *Country Wife*, Edward Ravenscroft's *London Cuckolds*, Thomas Otway's *Souldiers Fortune* and Thomas Shadwell's *Squire of Alsatia*.
