## **Licensing Geographic Data And Services:**

Licensing Geographic Data and Services National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Licensing Geographic Data and Services, 2004-10-13 Geographic data are used in all sectors of society to support a huge range of applications ranging from emergency response to land use planning to location based services In the past government agencies typically acquired ownership of such data from private sector and other data producers and distributed these data without restriction Licensing whereby the producer may restrict redistribution has emerged as an alternative business model that agencies must now consider among a suite of procurement options The report highlights licensing perspectives and experiences of major stakeholder groups and examines the pros and cons of licensing It concludes that licensing may be a viable option in some instances and advises agencies on how to best serve societal interests

**Geographic Data and the Law** Katleen Janssen, Joep Crompvoets, 2012 Understanding the legal challenges relating to spatial data information SDI *Ensuring the Integrity, Accessibility, and Stewardship of Research Data in the Digital Age* Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, Committee on Ensuring the Utility and Integrity of Research Data in a Digital Age, 2009-11-17 As digital technologies are expanding the power and reach of research they are also raising complex issues These include complications in ensuring the validity of research data standards that do not keep pace with the high rate of innovation restrictions on data sharing that reduce the ability of researchers to verify results and build on previous research and huge increases in the amount of data being generated creating severe challenges in preserving that data for long term use *Ensuring the Integrity Accessibility and Stewardship of Research Data in the Digital Age* examines the consequences of the changes affecting research data with respect to three issues integrity accessibility and stewardship and finds a need for a new approach to the design and the management of research projects The report recommends that all researchers receive appropriate training in the management of research data and calls on researchers to make all research data methods and other information underlying results publicly accessible in a timely manner The book also sees the stewardship of research data as a critical long term task for the research enterprise and its stakeholders Individual researchers research institutions research sponsors professional societies and journals involved in scientific engineering and medical research will find this book an essential guide to the principles affecting research data in the digital age A Research Agenda for Geographic Information Science Robert B. McMaster, E. Lynn Usery, 2004-08-30 A close relationship exists between GIS and numerous applications including cartography photogrammetry geodesy surveying computer and information science and statistics among others Scientists coined the term geographic information science GIScience to describe the theory behind these fields A Research Agenda for Geographic Information **Geospatial Law, Policy and Ethics** Kevin D. Pomfret, 2024-08-16 This comprehensive textbook identifies the emerging legal policy and ethical considerations associated with the collection analysis

storage and distribution of data that can be tied to location on Earth otherwise known as geospatial information Drawing on the author s extensive professional legal and scholarly experience in the geospatial community the book explains how these issues cut across both legal and technology domains and how they impact geospatial information management across the globe While focused on the USA the framework and analysis can be applied to other nations and legal systems Key topics covered include intellectual property privacy data protection data quality and liability security ethical issues licensing and the impact of existing and emerging technologies such as artificial intelligence satellites drones software machine learning small satellites and 5G The book includes helpful features such as a glossary of key legal terms and further reading and is accompanied by digital supplements in the form of PowerPoint slides for each chapter Geospatial Law Policy and Ethics is the ideal companion for advanced undergraduate and graduate level students of Geographic Information System GIS remote sensing geospatial intelligence geospatial studies and spatial data science courses It will also be of interest to geospatial professionals employed in industry government or research

**National Land Parcel Data** National Research Council,Division on Earth and Life Studies,Board on Earth Sciences and

Resources, Mapping Science Committee, Committee on Land Parcel Databases: A National Vision, 2007-12-07 Land parcel data also known as cadastral data provide geographically referenced information about the rights interests and ownership of land and are an important part of the financial legal and real estate systems of society The data are used by governments to make decisions about land development business activities regulatory compliance emergency response and law enforcement In 1980 a National Research Council book called for nationally integrated land parcel data but despite major progress in the development of land parcel databases in many local jurisdictions little progress has been made toward a national system National Land Parcel Data looks at the current status of land parcel data in the United States The book concludes that nationally integrated land parcel data is necessary feasible and affordable It provides recommendations for establishing a practical framework for sustained intergovernmental coordination and funding required to overcome the remaining challenges and move forward

**Availability of Spatial and Environmental Data in the European Union** Cristos Velasco San Martín, 2010-07-09 The Availability of Spatial and Environmental Data in the European Union *Putting People on the Map* National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, Panel on Confidentiality Issues Arising from the Integration of Remotely Sensed and Self-Identifying Data, 2007-03-22 Precise accurate spatial information linked to social and behavioral data is revolutionizing social science by opening new questions for investigation and improving understanding of human behavior in its environmental context At the same time precise spatial data make it more likely that individuals can be identified breaching the promise of confidentiality made when the data were collected Because norms of science and government agencies favor open access to all scientific data the tension between the benefits of open access and the risks associated with potential breach of confidentiality pose significant challenges to researchers research sponsors scientific institutions and data archivists Putting People on the Map finds that several technical approaches for making data available while limiting risk have potential but none is adequate on its own or in combination This book offers recommendations for education training research and practice to researchers professional societies federal agencies institutional review boards and data stewards

**The SAGE Handbook of GIS and Society** Timothy Nyerges, Helen Couclelis, Robert McMaster, 2011-05-09 The definitive guide to a technology that succeeds or fails depending upon our ability to accommodate societal context and structures This handbook is lucid integrative comprehensive and above all prescient in its interpretation of GIS implementation as a societal process Paul Longley University College London This is truly a handbook a book you will want to keep on hand for frequent reference and to which GIS professors should direct students entering our field Selection of a few of the chapters for individual attention is difficult because each one contributes meaningfully to the overall message of this volume An important collection of articles that will set the tone for the next two decades of discourse and research about GIS and society Journal of Geographical Analysis Over the past twenty years research on the evolving relationship between GIS

and Society has been expanding into a wide variety of topical areas becoming in the process an increasingly challenging and multifaceted endeavour The SAGE Handbook of GIS and Society is a retrospective and prospective overview of GIS and Society research that provides an expansive and critical assessment of work in that field Emphasizing the theoretical methodological and substantive diversity within GIS and Society research the book highlights the distinctiveness and intellectual coherence of the subject as a field of study while also examining its resonances with and between key themes and among disciplines ranging from geography and computer science to sociology anthropology and the health and environmental sciences Comprising 27 chapters often with an international focus the book is organized into six sections Foundations of Geographic Information and Society Geographical Information and Modern Life Alternative Representations of Geographic Information and Society Organizations and Institutions Participation and Community Issues Value Fairness and Privacy Aimed at academics researchers postgraduates and GIS practitioners this Handbook will be the basic reference for any inquiry applying GIS to societal issues

User Centric E-Government Saqib Saeed, T. Ramayah, Zaigham Mahmood, 2017-09-17 This book provides user studies and theories related to user centered technology design processes for e government projects The book mainly discusses inherent issues of technology design implications user experiences and guidelines for technology appropriation Ethnographic studies focusing on real life examples will enable readers to understand the problems in an effective way Furthermore the theories and results will help researchers and practitioners to handle these challenges in an efficient way E Government is about harnessing the information revolution to improve the efficiency of government processes and the lives of citizens It aims at a citizen centered approach to governance through effective use of the Internet and Information and Communication Technologies ICTs E Government promotes transparency and effectiveness of a government s processes as well as citizens participation e participation in the affairs of the government Whereas E government projects are huge undertakings for government departments a user centric approach requires citizens participation in the design and delivery of e government services In both these respects there are huge challenges and governments require long term commitment as well as correct planning and availability of financial resources to address them System design for e governmental applications is inherently a complex process In successful e government projects appropriately designed technology infrastructure plays a pivotal role The technology appropriation process requires that e government technologies should be in line with the work practices of end users so that successful usage of these technologies can be realized E governmental systems which fail to take into account such human factors result in failure and wasting huge amounts of public money as well as a loss of confidence of the public in such technological infrastructures It is highly important that citizens are enabled to have access to the appropriate information technology have knowledge and skills to use the available technology and have the positive commitment to affect the governments strategies So enabling citizens to effectively participate is much more difficult This book addresses these inherent challenges and available

opportunities with respect to user centric e government      *ARC User* ,2009      **Geographic Information Systems and Science** Paul A. Longley, Mike Goodchild, David J. Maguire, David W. Rhind, 2010-08-09 The Third Edition of this bestselling textbook has been fully revised and updated to include the latest developments in the field and still retains its accessible format to appeal to a broad range of students Now divided into five clear sections the book investigates the unique complex and difficult problems that are posed by geographic information and together they build into a holistic understanding of the key principles of GIS This is the most current authoritative and comprehensive treatment of the field that goes from fundamental principles to the big picture of GIS and the New World Order security health and well being digital differentiation in GIS consumption the core organizing role of GIS in Geography the greening of GIS grand challenges of GIScience science and explanation Key features Four colour throughout Associated website with free online resources Teacher s manual available for lecturers A complete learning resource with accompanying instructor links free online lab resources and personal syllabi Includes learning objectives and review boxes throughout each chapter New in this edition Completely revised with a new five part structure Foundations Principles Techniques Analysis Management and Policy All new personality boxes of current GIS practitioners New chapters on Distributed GIS Map Production Geovisualization Modeling and Managing GIS      **Technological Advancements in Library Service Innovation** Lamba, Manika, 2022-02-04 Innovations in library services are rapidly developing within numerous areas including building design program and event planning patron experience and engagement literacy program development and administration and management To ensure these changes are implemented and considered successfully a closer look at the challenges trends and practices of these innovations is crucial Technological Advancements in Library Service Innovation examines the recent activities of successful and groundbreaking research and practices around the world surrounding library service innovation and presents various forward thinking initiatives It also provides an overview of libraries successful experiences identifies emerging global themes and trends and offers guidance to library practitioners on how to pursue the recent trends in their own library environment Covering topics such as technology adoption and organizational structures this book is ideal for library professionals researchers academicians instructors and students      **GEOValue** Jamie B. Kruse, Joep Crompvoets, Francoise Pearlman, 2017-11-15 Quantifying the social and economic value that geospatial information contributes to modern society is a complex task To construct reliable and consistent valuation measures requires an understanding of the sequence of processes that starts with data acquisition and leads to decision makers choices that impact society GEOValue explores each step in this complex value chain from the viewpoint of domain experts spanning disciplines that range from the technical side of data acquisition and management to the social sciences that provide the framework to assess the benefit to society The book is intended to provide foundational understanding of the techniques and complexities of each step in the process As such it is intended to be assessable to a reader without prior training in data

acquisition systems information systems or valuation methods In addition a number of case studies are provided that demonstrate the use of geospatial information as a critical input for evaluation of policy pertaining to a wide range of application areas such as agricultural and environmental policy natural catastrophes e government and transportation systems
