Life Course A Sociological Introduction:

The Life Course Stephen J. Hunt, 2017-09-16 Dramatic social transformation in Western society over recent decades has had a profound impact on the way the life course is studied While people continue to experience the implications of class gender ethnicity and of course age they are more than ever able to take personal control of their own lives The Life Course considers how in a diverse and uncertain world the previously predictable stages of life are no longer fixed but increasingly open to change Focusing on continuities and change this book looks not only at the different phases of life but also at the transformation of a number of closely related social institutions such as the family education and the workplace Recognising that the established cradle to grave view is now outdated the trajectory from infancy and youth to later and end of life is followed not as a stable object of study but as a starting point for critical analysis This second edition offers an essential overview of the sociology of the life course incorporating both contemporary and conventional perspectives It calls upon current theorising around the life course as well as on up to date empirical research data This thought provoking text is relevant to researchers and students of life course studies and sociology as well as to those in nursing social work and related caring professions

The Oxford Handbook of the Archaeology of Childhood Sally Crawford, Dawn Hadley, Gillian Shepherd, 2018-05-10 Real understanding of past societies is not possible without including children and yet they have been strangely invisible in the archaeological record Compelling explanation about past societies cannot be

achieved without including and investigating children and childhood However marginal the traces of children s bodies and bricolage may seem compared to adults archaeological evidence of children and childhood can be found in the most astonishing places and spaces The archaeology of childhood is one of the most exciting and challenging areas for new discovery about past societies Children are part of every human society but childhood is a cultural construct Each society develops its own idea about what a childhood should be what children can or should do and how they are trained to take their place in the world Children also play a part in creating the archaeological record itself In this volume experts from around the world ask questions about childhood thresholds of age and growth childhood in the material culture the death of children and the intersection of the childhood and the social economic religious and political worlds of societies in the past
