

Life Cycle Data For Norwegian

Judith E.M. Klostermann, Arnold Tukker

Life Cycle Data For Norwegian:

Party Identification in Norway and the United States , Product Innovation and Eco-Efficiency Judith E.M. Klostermann,Arnold Tukker,2013-03-09 Prefaced by Bjørn Stigson President of the World Business Council for Sustainable Development this book is one of the few that treats this topic by putting representatives of industry at centre stage The book systematically addresses the drivers the tools and sector specific elements that play a role in this process The five chapters in Part I are devoted to a general introduction to eco efficiency and the related challenges to industry in its implementation Part II contains 23 case studies almost all written by industrial experts who tell how they deal with the challenge what the motivators are what tools can be used and how they can be implemented and what are the specific elements in sectors like building electronics and packaging These contributions come from multinationals like Unilever Procter Gamble Akzo Nobel Philips and Ciba Geigy as well as small and medium sized enterprises from such sectors as the building and furniture trades

Life Cycle Data for Norwegian Oil and Gas Kristin Keiserås Bakkane,Fagbokforlaget Fagbokforlaget,1995 The production of oil and gas involves a number of activities for which the environment consequences so far have not been thoroughly studied How for instance do we establish the environmental implications from offshore exploration drilling How important environmentally speaking is the demand for construction materials in platforms and other production facilities How much fuel is consumed by oil tankers supply vessels and helicopters in the offshore petroleum industry These and many other questions are addressed in this volume The studied issues are the resource requirements wastes generation emissions and discharges associated with Norwegian crude oil and natural gas for the reference year 1991 The methodologies used in the process of collecting information are based on a life cycle concept In doing so enormous amounts of data have been generated The life cycle concept involves a scope that covers the construction operation and demobilization of all exploration production transportation and support facilities Explanations of scope and methodologies accompany the data Results on a number of summary scenarios are presented in tables and illustrations followed by comments on the results A general introduction to the offshore oil and gas industry is also included intended for readers who are not familiar with this subject

The Industrial Green Game National Academy of Engineering,1997-07-24 Industrial ecology is a concept that has emerged in response to growing public concern about the impact of industry on the environment In this framework the natural flow or circulation of materials and energy that takes place in biological ecosystems becomes a model for more efficient industrial metabolism What industrial ecology is and how it may be applied to corporate environmentalism are the subject of The Industrial Green Game This volume examines industrial circulation of materials energy efficiency strategies green accounting life cycle analysis and other approaches for preventing pollution and improving performance Corporate leaders report firsthand on green efforts at Ciba Geigy Volvo Kennecott and Norsk Hydro And an update is provided on the award winning industrial symbiosis project in Kalundborg Denmark The Industrial Green Game looks at issues of special

concern to business such as measuring and shaping public perceptions and marketing green products to consumers It offers discussions of the appropriate roles of government and private business **North American Tunneling 2002** Levent Ozdemir,2021-05-31 This volume includes the papers presented at the North American Tunneling 2002 Conference The papers deal with three major aspects of underground construction managing construction projects public policy and underground facilities and advances in technology Life-Cycle of Engineering Systems: Emphasis on Sustainable Civil Infrastructure Jaap Bakker,Dan M. Frangopol,Klaas Breugel,2016-11-18 This volume contains the papers presented at IALCCE2016 the fifth International Symposium on Life Cycle Civil Engineering IALCCE2016 to be held in Delft The Netherlands October 16 19 2016 It consists of a book of extended abstracts and a DVD with full papers including the Fazlur R Khan lecture keynote lectures and technical papers from all over the world All major aspects of life cycle engineering are addressed with special focus on structural damage processes life cycle design inspection monitoring assessment maintenance and rehabilitation life cycle cost of structures and infrastructures life cycle performance of special structures and life cycle oriented computational tools The aim of the editors is to provide a valuable source for anyone interested in life cycle of civil infrastructure systems including students researchers and practitioners from all areas of engineering and industry *Bridge Maintenance, Safety, Management, Life-Cycle Sustainability and Innovations* Hiroshi Yokota,Dan M. Frangopol,2021-04-19 Bridge Maintenance Safety Management Life Cycle Sustainability and Innovations contains lectures and papers presented at the Tenth International Conference on Bridge Maintenance Safety and Management IABMAS 2020 held in Sapporo Hokkaido Japan April 11 15 2021 This volume consists of a book of extended abstracts and a multimedia device containing the full papers of 571 contributions presented at IABMAS 2020 including the T Y Lin Lecture 9 Keynote Lectures and 561 technical papers from 40 countries The contributions presented at IABMAS 2020 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of maintenance safety management life cycle sustainability and technological innovations of bridges Major topics include advanced bridge design construction and maintenance approaches safety reliability and risk evaluation life cycle management life cycle sustainability standardization analytical models bridge management systems service life prediction maintenance and management strategies structural health monitoring non destructive testing and field testing safety resilience robustness and redundancy durability enhancement repair and rehabilitation fatigue and corrosion extreme loads and application of information and computer technology and artificial intelligence for bridges among others This volume provides both an up to date overview of the field of bridge engineering and significant contributions to the process of making more rational decisions on maintenance safety management life cycle sustainability and technological innovations of bridges for the purpose of enhancing the welfare of society The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems including engineers researchers academics and students from all areas of bridge engineering

Norway International Monetary Fund. European Dept.,2018-09-17 This Selected Issues paper describes wages and competitiveness in Norway Norway may have to downwardly revise its expectations for wage growth if it is to avoid a significant loss of competitiveness and manage the transition to a less oil dependent economy Norway was able to afford very high wage growth in the past notwithstanding the noted challenges in several sectors thanks to good fortune in its terms of trade Going forward it would be prudent not to count on being fortunate twice wage moderation would help build resilience in case of less favorable trends in international prices It would also help facilitate the needed transition out of oil by supporting sectors that did not benefit from past terms of trade gains Communication from the government can continue to help in managing public expectations Fiscal policy plays a key role in promoting competitiveness and containing the spending effect of Dutch Disease After a prolonged expansion of fiscal policy partly enabled by large valuation gains of the sovereign wealth fund it is now appropriate to gradually start tightening fiscal policy The ongoing up cycle provides an ideal setting to get started on structural consolidation which will ultimately be needed to face to address aging pressures The Physics of Capitalism Erald Kolasi,2025-02-13 A comprehensive blueprint for a new post capitalist order which values our collective future over immediate economic gains The fate of all economic systems is written in the energy flows they obtain from the natural world Our collective humanity very much depends on nature for joy for comfort and for sheer survival In his prescient new book The Physics of Capitalism Erald Kolasi explores the deep ecological physics of human existence by developing a new theoretical framework for understanding the relationship between economic systems and the wider natural world Nature is full of complex and dynamic systems that are constantly interacting with our societies The collective physical interactions of the natural world guide and forge many fundamental features of human societies and civilizations Humanity does not exist on a magical pedestal above the rest of reality we are just one slice in a grand continuum of physical systems that interact combine and transform over time We too belong to the natural world And it s this critical fact that controls the long term fate of our economies and civilizations Among all the living organisms that have called this blue marble home humans are a very recent species In that short period of time we have managed to become one of the most dominant life forms in the history of the planet creating powerful civilizations with elaborate cultures large populations and extensive trade networks We have been nomads and farmers scientists and lawyers nurses and doctors welders and blacksmiths Our achievements are both astonishing and unprecedented but they also carry great risks Throughout history economic growth has depended heavily on people converting more energy from their natural environments and concentrating the resulting energy flows towards the application of specific tasks The economic and demographic growth of human civilization over the last ten thousand years has profoundly impacted natural ecosystems throughout the planet triggering major instabilities across the biosphere that threaten to reverberate on civilization and to destabilize its long term trajectory Swamped with multiple ecological challenges of historic proportions global civilization now stands at a critical tipping point that deserves

closer scrutiny If we are to have any hope of addressing the difficult challenges we face then we must begin by understanding them and appreciating their complexity And then we must act This book offers a comprehensive blueprint for our collective future pointing the way to a new post capitalist order that can provide long term viability and stability for human civilization on a global scale **Data Collections from the National Archive of Computerized Data on Aging**

,2002 **OECD Digital Government Studies The Path to Becoming a Data-Driven Public Sector** OECD,2019-11-28

This report highlights the important role data can play in creating conditions that improve public services increase the effectiveness of public spending and inform ethical and privacy considerations It presents a data driven public sector framework that can help countries or organisations assess the elements needed for using data to make better informed decisions across public sectors *Building Information Modeling* Nawari O. Nawari,2018-02-12 Many researchers and software developers have put a lot of effort into finding solutions for automated code checking This book is a good summary of these efforts and provides readers with a comprehensive understanding of the status of such technologies in the industry It also guides readers on implementation of such techniques using the platforms and tools currently available in the industry Issa Ramaji University of North Florida USA *Building Information Modeling Automated Code Checking and Compliance Processes* covers current and emerging trends in automating the processes of examining building design against codes and standards of practice The role of Building Information Modeling BIM technologies in these processes is thoroughly analyzed and explains how this new technology is significantly transforming modern architecture engineering and construction AEC domains The book also introduces the theoretical background of computerizing compliance verification including domain knowledge representations building model representations and automated code checking systems An underlying goal for the material covered is to present the use of BIM technology as an integral part of the automated auditing process that can lead to a more comprehensive intelligent and integrated building design a design where an optimized solution can be achieved in harmony with the current codes and standards of practice This new proposed BIM based framework for automating code conformance checking is one of the most powerful methods presently available to reflect actual building code requirements and the methods described in the book offer significant benefits to the AEC industry such as Providing consistency in interpretation of regulatory provisions Reducing code compliance validation errors and the cost and time associated with compliance checking Allows for the ability to self check required aspects before bidding Reduces the amount of time and resources required during design review Allows for optimal design along with faster turnaround on feedback and potentially faster approvals for construction permits by building and infrastructure authorities *Catalog of Data Collections Available Through the National Archive of Computerized Data on Aging* National Archive of Computerized Data on Aging (U.S.),1989

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision Robby Caspeele,Luc Taerwe,Dan Frangopol,2018-10-31 This volume contains the papers presented at IALCCE2018 the Sixth International

Symposium on Life Cycle Civil Engineering IALCCE2018 held in Ghent Belgium October 28 31 2018 It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R Khan lecture 8 keynote lectures and 390 technical papers from all over the world Contributions relate to design inspection assessment maintenance or optimization in the framework of life cycle analysis of civil engineering structures and infrastructure systems Life cycle aspects that are developed and discussed range from structural safety and durability to sustainability serviceability robustness and resilience Applications relate to buildings bridges and viaducts highways and runways tunnels and underground structures off shore and marine structures dams and hydraulic structures prefabricated design infrastructure systems etc During the IALCCE2018 conference a particular focus is put on the cross fertilization between different sub areas of expertise and the development of an overall vision for life cycle analysis in civil engineering The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life cycle analysis and assessment in civil engineering including researchers practising engineers consultants contractors decision makers and representatives from local authorities

The environmental impact of the consumption of sweets, crisps and soft drinks Katarina Nilsson, 2011
