Rocío Montoro

Introduction

Feminist stylistics can be defined as the sub-branch of stylistics which aims to account for the way in which gender concerns are linguistically encoded in texts, and which attempts to do so by employing some of the frameworks and models pertaining in the stylistics tool-kit. However, the phrase 'gender concerns' can encompass a plurality of meanings which has given rise to the multifaceted perspectives from which the notion of gender has been approached. One of those perspectives is offered by feminist stylistic analyses which, along with other approaches to the study of language and gender on the one hand and feminism on the other, conceive of gender in a rather fluid and adaptable way. Feminist stylisticians' contribution to the study of gender has traditionally illustrated how the interface of gender issues and language materialises in literary texts, but such a focus should not be understood as exclusive. This chapter presents an overview of the way gender matters have been dealt with and discussed within stylistics. In order to achieve that aim, I start by presenting a general overview of language and gender so that feminist stylistic concerns are diachronically and thematically contextualised in relation to other linguistic treatments of gender and feminism. I then illustrate the way gender issues are investigated by revisiting some of the now classical stylistic analyses that have openly espoused a feminist perspective, as well as more recent case studies. Finally, this chapter also hints at ways in which future work can be undertaken.

Dating from the early work produced in the 1960s, stylisticians have not only been bent on providing interpretations of textual meaning based on potentially replicable analyses, but have also proudly embraced the 'interdisciplinary' and 'multimethodological' labels, which has resulted in a constant re-evaluation, further augmentation and subsequent betterment of the items that compose the prototypical stylistics tool-kit. Feminist stylistics also exhibits the same urge to come up with easily observable, potentially replicable analyses for the explanation of how gender issues materialise linguistically. Moreover, feminist stylistics is also subject to the same kind of re-assessment in relation to which models of analysis might be of better service to cater for how gender issues are encoded in texts (see, for instance, the chapter on Corpus Stylistics in this volume). Interestingly, this openness to new methodological possibilities has also helped us to understand more fully the evolving nature of the notion of

Discourse and Style Dan Shen, 2024-12-02

This book examines overlaps differences and complementarities between narratology and stylistics and shows the consequences of this examination for the practical analysis of prose narrative Narratology identifies discourse as one of its two main objects of study story being the other and stylistics of course designates style as its concern Too often however work in each of these fields proceeds without attention to developments in the other This book corrects that situation by looking beneath the superficial similarities between the discourse of narratology and the style of fictional stylistics The author shows that the two seemingly interchangeable terms actually refer to different textual elements For example both narratology and stylistics identify point of view as an important element of discourse and style respectively but each approach conceives of it differently and thus analyzes it differently This book argues that the different analyses are complementary and shows how they can be brought together This synthesis leads to richer conceptions of point of view as well as more comprehensive and precise analyses of its functions and effects in individual narratives For its theoretical and interpretive contributions this book will appeal to scholars and students in narrative studies literary stylistics and literary theory and criticism
