Miscellaneous Publication, 1960 Bibliography of Indian Geology: Paleontological index, by M. V. A. Sastry and others Thomas Henry Digges La Touche, 1980 Journal of the Mysore University University of Mysore, 1984 Biological Consequences of Plate Tectonics Guntupalli V.R. Prasad, Rajeev Patnaik, 2020-11-23 This book recognizes and celebrates the contributions of Professor Ashok Sahni to the field of paleontology Prof Sahni established a School of Vertebrate Palaeontology at Panjab University Chandigarh India where he trained many of today's vertebrate paleontologists of India The book covers topics on evolutionary patterns macroevolutionary events origination and radiation events changes in physical environments climate and their implications for biodiversity dynamics intercontinental affinities and biogeographic connections in a plate tectonic framework The book begins by exploring India in the age of the dinosaurs discussing new fossil remains from the Jurassic Era then moves through the Cretaceous and Eocene to provide a picture on faunal and floral changes in Gondwanaland in the context of plate tectonics Furthermore the book explores the evolutionary patterns and biotic dispersals that resulted from the northward drift of Indian plate during the Cretaceous and its collision with Asia in the Eocene The respective chapters reveal the role of plate tectonics and climate in shaping the geographical distribution of plants and animals in Gondwana specifically in India as well as the post India Asia collision implications for biodiversity changes and biogeography in the region's continental environments Given its scope the book will appeal to vertebrate paleontologists evolutionary biologists and paleobiogeographers *Microbiota from the Late Cretaceous-Early Palaeocene Boundary Transition in the Deccan Intertrappean Beds of Central India* Ashu Khosla, Omkar Verma, Sachin Kania, Spencer Lucas, 2023-06-21 This book describes the microbiota of the intertrappean beds in the Chhindwara District Madhya Pradesh India In this work special emphasis is placed on the microbiota from the Late Cretaceous Early Palaeocene transition of the central Narmada River region Recently the intertrappean beds of the Eastern Deccan Volcanic Province one of the subprovinces of the Deccan Volcanic Province have received considerable attention which resulted in the addition of some significant biotic assemblages to the existing record from the Dindori Chhindwara area of the province The biotic assemblages include charophytes ostracods foraminiferans fishes frogs lizards turtles crocodiles and mammals In spite of the recent discoveries the known fossil record of the Late Cretaceous Early Palaeocene biota of India is not sufficient and thus does not permit us to speculate on the possible impact of environmental changes triggered by the Deccan volcanic lava flows

on the contemporary biota and to precisely document their palaeoecologic palaeoenvironmental and palaeobiogeographic implications The recent biotic reports from the intertrappean beds exposed in the Chhindwara region of the Eastern Deccan Volcanic Province clearly indicate that these beds have a vast potential in terms of fossil content which could reveal new and dissimilar biotic remains when compared to the Western Deccan Volcanic Province The record of diverse accumulations of freshwater charophytes brackish to freshwater ostracods and planktic foraminiferal and fish assemblages from the intertrappean beds of Jhilmili and adjacent areas of Early Danian P1a age and lying just north of Chhindwara town and in the heart of peninsular India has intriguing implications for defining the age limits of the basaltic flows The occurrence of non marine taxa for example algae molluscs and vertebrates associated with brackish water ostracods in the nearby Singpur and Mohgaon Kalan localities of the Chhindwara region has also raised concerns about the sedimentary environments of these intertrappean beds The new finds presented in this book prove useful for the better understanding of the palaeoecology and palaeoenvironment of the biota and also throw light on various paleobiogeographic models proposed for the northward drifting Indian plate The microbiotic assemblages of the intertrappean beds of the eastern Deccan volcanic province at District Chhindwara Madhya Pradesh are documented in this book The microbiota of the central Narmada River region the charophytes ostracods planktic foraminifera and fishes receive special attention in this study *Half-yearly Journal of the Mysore University, New Series, Section B--science* University of Mysore,1977 *Journal of Paleontology* Hans Ernst Thalmann,1948 Vols 7 10 12 13 15 17 include section Bibliography and index to new genera species and varieties of Foraminifera varies by H E Thalmann **The National Union Catalog, Pre-1956 Imprints** Library of Congress,American Library Association.
