Foundations Of Meta Technics:

Foundations of Meta-technics Ernesto Mayz Vallenilla, 2004 The Foundations of Meta Technics is a rigorous phenomenological analysis of the transcendence of anthropomorphic anthropocentric and geocentric technology in terms of the new meta technical forms of space and time The book draws out the epistemological and ontological implications of an emerging meta technical supernature in which space and time are perceived by trans human means and from trans terrestrial perspectives This book is especially valuable to philosophers in either the phenomenological or continental tradition

Astrobiology Julian Chela-Flores, Guillermo A. Lemarchand, John Oró, 2012-12-06 The general topic of this book concerns the origin evolution distribution and destiny of life in the Universe It discusses the transition from inert matter to cellular life and its evolution to fully developed intelligent beings and also the possibility of life occurring elsewhere particularly in other environments in our own and other solar systems The theoretical framework of Astrobiology may be probed with a forthcoming series of space missions which at the time of writing are being planned for the next 10 to 15 years Advanced extraterrestrial life can also be probed by means of radioastronomy in the well established project of search for extraterrestrial intelligence Astrobiology pays special attention to the robust growth in our capacity to search for microorganisms as well as signals of extraterrestrial life with recent significant technological progress in planetary science and radioastronomy The progress of the main space agencies is highlighted Audience This volume is aimed at advanced undergraduate and graduate students as well as researchers in the many areas of basic earth and life sciences that contribute to the study of chemical evolution and the origin of life
