Linoleum History Design Architecture 18822000:

Linoleum Gerhard Kaldewei, Staatliche Akademie der Bildenden Künste Stuttgart. Institut für Innenarchitektur und Möbeldesign, 2000 What is the secret connection between linoleum and the 20th century avant garde What would the homes of the Bauhaus designers and other modernists be without it This new publication explores the eventful and fascinating history of this ubiquitous but overlooked material that has stood under the feet of many an artist at one point or another over the past century Invented in 1864 by the British entrepreneur Frederik Walton linoleum's first golden age was between 1900 and 1930 when countless renowned designers among them Josef Hoffmann and Bruno Paul used the natural material in their collections and patterns and even Peter Behrens tried his hand at designing linoleum patterns And such Bauhaus architects as Mies van der Rohe and Bruno Taut used linoleum in their housing designs as an inexpensive sturdy and of course decorative floor covering Linoleum History Design Architecture is the first book to present this historically and ecologically important material in all of its various guises over the past one hundred plus years Experts on design and architecture contribute essays on linoleum's history its discovery by modernist designers and architects and its renaissance in contemporary design and architecture The Architectural Models of Theodore Conrad Teresa Fankhänel, 2021-06-17

Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of Theodore Conrad 1910 1994 the most prominent and prolific architectural model maker of the 20th century Conrad's innovative models were instrumental in the design and realization of many icons of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has been known about Conrad's work and his impact on 20th century architectural history With exclusive access to Conrad's archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad's work and legacy accompanied by case studies of his major commissions and full color photographs of his works Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad's models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural models and their makers **African-American**

Artists, 1929-1945 Metropolitan Museum of Art (New York, N.Y.), Lisa Gail Collins, Lisa Mintz Messinger, Rachel Mustalish, 2003 This handsome book focuses on the work of African American artists during the Depression and the war years when government sponsored programs led to a resurgence in artistic production throughout the United States

Ornament as Crisis Sarah McGaughey, 2016-03-11 Ornament as Crisis explores the ways in which the novels of

Hermann Broch's *Sleepwalkers* (Schlafwandler) trilogy participate in and employ the history of architecture and architectural theory. Beginning with the visual and architectural experiences of the figures in each novel, Sarah McGaughey analyzes the role of architecture in the trilogy as a whole while discussing work by Broch's contemporaries on architecture. She argues that *The Sleepwalkers* allows us to better understand how literature responds and contributes to social theoretical and spatial concepts of architecture. Ornament as Crisis guides readers through the spaces of Broch's modernist masterpiece and the architectural debates of his time.

Hooked Rugs Cynthia Fowler, 2017-07-05 Through a close look at the history of the modernist hooked rug, this book raises important questions about the broader history of American modernism in the first half of the twentieth century. Although hooked rugs are not generally associated with the avant garde, this study demonstrates that they were a significant part of the artistic production of many artists engaged in modernist experimentation. Cynthia Fowler discusses the efforts of Ralph Pearson and of Zoltan and Rosa Hecht to establish modernist hooked rug industries in the 1920s, uncovering a previously undocumented history. The book includes a consideration of the rural workers used to create the modernist narrative of the hooked rug as cottage industries were established throughout the rural Northeast and South to serve the ever-increasing demand for hooked rugs by urban consumers. Fowler closely examines institutional enterprises that highlighted and engaged the modernist hooked rugs, such as key exhibitions at the Museum of Modern Art and the Metropolitan Museum of Art in the 1930s and 40s. This study reveals the fluidity of boundaries among art, craft, and design and the profound efforts of a devoted group of modernists to introduce the general public to the value of modern art.

The Design Encyclopedia Mel Byars, 2004 Design has an increasingly high profile; figures like Philippe Starck are as venerated and well known as more traditional artists. But where the literature on fine art is vast, design is still comparatively ill served. This encyclopedia provides an account of the still largely unknown story of design.

Dwell, 2001-10 At *Dwell* we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.
