Lismahagos Meditations:

The Hyperlocal in Eighteenth- and Nineteenth-Century Literary Space Nicholas Birns, 2019-08-26 This book examines literary representations of hyperlocal spaces that subvert the idea of grounded and organic spatial identities Figures such as the pond the scientific particle and Wedgwood creamware often go unnoticed but they exemplify important shifts in culture and aesthetics in the eighteenth and nineteenth centuries The Hyperlocal in Eighteenth and Nineteenth Century Literary Space argues that these objects as well as locations such as alcoves in remote shires city inns and mountain retreats were portrayed by writers in the late eighteenth and early to mid nineteenth centuries as gambits that challenged cultural hegemonies It shows that the hyperlocal space or object though particular reaches beyond itself affording an elasticity that can allow those things that seem beneath notice to reveal broader cultural significance

Traditionally Wordsworth s greatness is founded on his identity as the poet of nature and solitude The Wordsworthian imagination is seen as an essentially private faculty its very existence premised on the absence of other people In this title first published in 1987 David Simpson challenges this established view of Wordsworth arguing that it fails to recognize and explain the importance of the context of the public sphere and the social environment to the authentic experience of the imagination Wordsworth s preoccupation with the metaphors of property and labour shows him to be acutely anxious about the value of his art in a world that he regarded as corrupted Through close examination of a few important poems both well known and relatively unknown Simpson shows that there is no unitary public Wordsworth nor is there a conflict or tension between the private and the public The absence of any clear kind of authority in the voice that speaks the poems makes Wordsworth s poetry in Simpson s phrase a poetry of displacement
