Woods, 2014-05-09 Do opposites really attract Why doesn't my partner understand me What can I do to make this relationship work The Perfect Fit by Dr Sandra K Woods

explores and answers these questions and more Woods proposes the existence of two basic temperament types that are opposite and complementary in nature one of Being and one of Doing She discusses the underlying dynamics the traits common to each temperament type and the attractive forces that bind the two together She also proposes a simple neurochemical template upon which these basic temperaments are superimposed Examples from everyday life are used to illustrate natural differences in the imprinting of psychic feeling which can and does lead to natural differences in perception

and communication The author describes and defines qualities common to all feelings as related to fitting bonding weight and contagion Finally a consideration of the five stages of marriage is discussed within the context of these basic differences Common pitfalls are examined along the way With some solid grounding in understanding the differences between these two basic temperament types it is indeed possible to have a mutually fulfilling relationship as partners work to understand trust and accept each other In *The Perfect Fit* Dr Sandra Woods based on her understanding of the brain and her long experience as a professional has created an engaging presentation of the nature of human temperament Starting with a clear and very readable exposition based on neuroscience and the chemistry at work in the brain she leads us to an understanding of the spectrum of personality types from Be ers who literally live for the moment to Do ers who carefully plan their actions with an eye on the future Wonder why you are an impulse buyer Or wonder why you take forever to decide on a major purchase This little gem of a book will help you understand who you are Robert Hallock PhD Distinguished Professor Physics Department University of Massachusetts at Amherst

The Motivation Myth Jeff Haden, 2018-01-09 From Inc com s most popular columnist a counterintuitive but highly practical guide to finding and maintaining the motivation to achieve great things It s comforting to imagine that superstars in their fields were just born better equipped than the rest of us When a co worker loses 20 pounds or a friend runs a marathon while completing a huge project at work we assume they have more grit more willpower more innate talent and above all more motivation to see their goals through But that s not at actually true as popular Inc com columnist Jeff Haden proves Motivation as we know it is a myth Motivation isn t the special sauce that we require at the beginning of any major change In fact motivation is a result of process not a cause Understanding this will change the way you approach any obstacle or big goal Haden shows us how to reframe our thinking about the relationship of motivation to success He meets us at our level at the beginning of any big goal we have for our lives a little anxious and unsure about our way forward a little burned by self help books and strategies that have failed us in the past and offers practical advice that anyone can use to stop stalling and start working on those dreams Haden takes the mystery out of accomplishment proving that success isn t about spiritual awakening or a lightning bolt of inspiration as Tony Robbins and adherents of *The Secret* believe but instead about clear and repeatable processes Using his own advice Haden has consistently drawn 2 million readers a month to his posts completed a 107 mile long mountain bike race and lost 10 pounds in a month Success isn t for the uniquely qualified it s possible for any person who understands the true nature of motivation Jeff Haden can help you transcend average and make lasting positive change in your life
