 number of people global warming is not an academic and scientific debate but a matter of survival As the planet warms at a
 rate of four degrees Fahrenheit per century violent storms are increasing in frequency icebergs are melting sea level is rising
 species are losing their habitats and temperature records are being broken Feeling the Heat consists of chapter length visits
 by well known authors to actual world hot spots where people are already coping day to day with the consequences of
 climactic disruption The locations for the book were strategically chosen because each represents a separate and important
 global warming impact such as rising tides melting glaciers evolving ecosystems and air pollution Feeling the Heat takes
 global warming out of the realm of armchair speculation and arcane scientific debate revealing the process of climate change
