Green,2023-05-15 The Spirit and the Screen engages contemporary films from the perspective of pneumatology to give theologies of culture fruitful new perspectives that begin with the Spirit rather than other common theological contact points Christology anthropology theological ethics creation eschatology etc This book explores pertinent pneumatological issues that arise in film as well as literary devices that draw allusions to the Spirit It offers three main contributions first it explores how Christian understandings of the person and work of the Spirit illuminate the nature of film and film making second it shows that there are in fact Spirit figures in film as distinct from but inseparable from Christ figures even if sometimes they're not intended as such Spirit-led characters are moved to act prophetically against their inclinations and in excess of their skill or knowledge and with eccentric life giving creativity third it identifies subtle and explicit symbolizations of the Spirit in pop culture symbolizations that require deep careful thinking about the Christian doctrine of the Spirit and generate new horizons for cultural analysis The contributors of this book explore these issues asking how Christian convictions and experiences of the Spirit might shape the way one thinks about films and film making **Casebook of Indigenous Business Practices in Africa** Ogechi Adeola,2023-08-16 Indigenous enterprise practices are an essential part of business success in Africa The continent's unique and diverse culture embedded in age long practices presents an interesting proposition for advancing indigenous knowledge and building sustainable business structures *Exploring the Ecologies of Music and Sound* Makis Solomos,2023-04-07 Makis Solomos explores the ecologies of music and sound inspired by Felix Guattari for whom environmental destruction caused by capitalism goes hand in hand with deteriorating ways of living and

feeling and for whom an ecosophical stance combining various ecological registers offers a glimpse of emancipation a position strengthened today by intersectional approaches Solomos explores environmental mental and social ecologies through the lens of the history of music and current artivisms especially in the fields of acoustic ecology contemporary music and sound art Several theoretical and analytical debates are put forward including a theory of sound milieus and the biopolitics of sound the relationships between music and the living world soundscape compositions field recording ecomusicology and the creation of sound biotopes the use of sound and music to violent ends as well as considering the social and political functions of music and the autonomy of art sonic ecofeminism degrowth in music and much more Material Practice and Materiality: Too Long Ignored in Science Education Catherine Milne, Kathryn Scantlebury, 2019-04-11 In this book various scholars explore the material in science and science education and its role in scientific practice such as those practices that are key to the curriculum focuses of science education programs in a number of countries As a construct culture can be understood as material and social practice This definition is useful for informing researchers nuanced explorations of the nature of science and inclusive decisions about the practice of science education Sewell 1999 As fields of material social practice and worlds of meaning cultures are contradictory contested and weakly bounded The notion of culture as material social practices leads researchers to accept that material practice is as important as conceptual development social practice However in education and science education there is a tendency to ignore material practice and to focus on social practice with language as the arbiter of such social practice Often material practice such as those associated with scientific instruments and other apparatus is ignored with instruments understood as inscription devices conduits for language rather than sources of material culture in which scientists share material other than words Baird 2004 p 7 when they communicate new knowledge and realities While we do not ignore the role of language in science we agree with Barad 2003 that perhaps language has too much power and with that power there seems a concomitant loss of interest in exploring how matter and machines instruments contribute to both ontology and epistemology in science and science education *Computer Science Education* Sue Sentance, Erik Barendsen, Nicol R.
