Feminism And Disability:

Feminism and Disability Barbara Hillyer, 1993 Most women's lives are touched by disability either their own limitations or those of someone for whom they care and the institutionalized inequality that women face is no less a reality for women with disabilities Yet to a great extent the feminist and disability communities have failed to form a significant coalition or even to comprehend women's experiences of disability Written from Barbara Hillyer's perspective as a teacher of feminist theory and the mother of a young woman with multiple disabilities *Feminism and Disability* blends personal political and intellectual insights to enrich both feminist theory and disability theory It explores issues of vital concern to women with disabilities and women caregivers body awareness community and reciprocity fatigue the supposed dichotomy between nature and technology codependence and recovery programs The ways in which cultural standards of language independence pace cheerfulness mother blaming and grief limit our understanding are explained and confronted Throughout Hillyer advocates that women recognize and integrate weakness along with strength The text challenges political movements that emphasize productivity and normalization to accommodate some less heroic aspects of the human condition that all people need help in development at all stages that death is not always the worst thing that can happen to a person that senility and degenerative diseases undermine belief in life as a growth process that some losses cannot be restored Being limited and knowing it Hillyer shows permit both compassion and political cooperation *Feminism and Disability* is a scholarly tour de force a comprehensive survey of various specialized literatures decoded and compared in light of women's autobiographical narratives of limitation and ability Its conclusions are bold and liberating Certain to be a milestone in the development of feminism and disability rights it offers a new holistic view that will energize discourse influence policy and change lives

Feminist Perspectives on Disability Barbara Fawcett, 2018-10-08 *Feminist Perspectives on Disability* provides a unique introduction to the key debates in relation to both feminism and disability The author considers contemporary similarities differences and contentious areas and how concepts drawn from postmodern feminism can be usefully applied to the disability arena The book explores many important aspects of the field including biological debates issues of power knowledge equality difference subjectivity and the body interface of public and private care and community medical and social barriers politics citizenship and identity *Feminist Perspectives on Disability* will be compulsory reading for students of all levels in Women's Studies Gender Relations Social Policy Social Work Social Care and social Science

Feminist Disability Studies Kim Q. Hall, 2011-10-24 The essays in this volume are contributions to feminist disability studies The essays constitute an interdisciplinary dialogue regarding the meaning of feminist disability studies and the implications of its insights regarding identity the body and experience

Encounters with Strangers Jenny Morris, 1996 In this book leading writers and activists reveal the many ways feminism can and must acknowledge disabled women for the benefit of all The premise of the book is that disabled women have been marginalised by a male dominated disabled

movement **Gendering Disability** Bonnie G. Smith, Beth Hutchison, 2004 Disability and gender are becoming increasingly complex in light of recent politics and scholarship This volume provides findings not only about the discrimination practised against women and people with disabilities but also about the productive parallelism between the two categories Female Forms Carol Thomas, 1999-08-16 What is the relevance of feminist ideas for understanding women s experiences of disability How can the social model of disability be developed theoretically What are the key differences between Disability Studies and medical sociology In answer to these questions this book explores and develops ideas about disability engaging with important debates in disability studies about what disability is and how to theorize it It also examines the interface between disability studies women s studies and medical sociology and offers an accessible review of contemporary debates and theoretical approaches The title *Female Forms* reflects two things about the book first its use of disabled women s experiences as told by themselves to bring a number of themes to life and second the author s belief in the importance of feminist ideas and debates for disability studies The social model of disability is the book s bedrock but the author both challenges and contributes to social modelist thought She advances a materialist feminist perspective on disability producing a book which is of multi disciplinary relevance *Female Forms* will be useful to the growing number of students on Disability Studies courses as well as those interested in women s studies medical sociology and social policy It will also appeal to those studying or working in the health and social care professions such as nursing social work occupational therapy and physiotherapy **Feminism and Disability** Alexa Schriempf, Society for Women in Philosophy (U.S.). Meeting, American Philosophical Association. Eastern Division. Meeting, 2002 Feminism and Disability, Part I, 2001 *Voiceless Bodies*, 2013 *Voiceless Bodies* Feminism Disability Posthumanism theorizes voicelessness not simply as a problem to be overcome but as a form of embodiment with its own ethical and literary force It does so by examining narrative texts that center voiceless figures including an autistic child a dead singer a mute slave and nonhuman animals Doris Lessing s novel *The Fifth Child* 1988 Todd Haynes s film *Superstar The Karen Carpenter Story* 1987 and J M Coetzee s novels *Foe* 1986 and *Elizabeth Costello* 2003 are each organized around a distinctly voiceless body and a voiced female figure My project argues that even while 1980s critical theory including feminist theory was silent on the topic of disability these literary texts were working through issues of disability representation the problem of speaking for those who can t speak for themselves the strategic and complicated status of women within such a project and the ethical and formal demands of representing voicelessness Formally each text exposes the narrative desire to simultaneously see and know to see the body to know the body s story a desire which is made manifest by the voiceless body that each text centers Significantly these narratives refuse to satisfy this desire and as such refuse or at least question the imperatives of voice and representation which seem to require and be directed towards the revelation of self Instead using formal strategies that unsettle conventions of genre authorship and narrative form the texts offer up the spectacle of themselves as texts rather than the spectacle of the disabled or voiceless

body or story In the process Lessing Haynes and Coetzee's work anticipates and contributes to emerging critical conversations in the fields of disability studies and posthumanism animal studies which critique long standing ideas about voice and self representation being precursors to ethical status *Disability and Mothering* Cynthia Lewiecki-Wilson, Jen Cellio-Miller, 2011-09-14 Editors Lewiecki Wilson and Cellio have put together the first book to focus on the intersecting spaces both cultural and personal of disability and mothering Derived from the Latin for threshold the word liminal calls attention to the book's focus on the transitional moments and spaces where the personal and social inside and outside self and other converge The volume features twenty one previously unpublished essays by new as well as established scholars and community activists Contributors some of whom are themselves disabled or mothers of children with disabilities present moving personal accounts and accessible scholarship grounded in historical study experiential and retrospective analysis interviews social research and feminist and disability studies theories In their introduction the editors survey the theoretical frameworks of feminism and disability studies locating the points of overlap crucial to a study of disability and mothering Organized in five sections the book engages questions about reproductive technologies diagnoses and cultural scripts the ability to rewrite narratives of mothering and disability political activism and the tensions formed by the overlapping identities of race class nation and disability The essays speak to a broad audience from undergraduate and graduate students in women's studies and disability studies to therapeutic and health care professionals to anyone grappling with issues such as genetic testing and counseling raising a child with a disability or being disabled and contemplating starting a family

Foucault and Feminist Philosophy of Disability Shelley Lynn Tremain, 2017-11-22 Foucault and Feminist Philosophy of Disability is a distinctive contribution to growing discussions about how power operates within the academic field of philosophy By combining the work of Michel Foucault the insights of philosophy of disability and feminist philosophy and data derived from empirical research Shelley L Tremain compellingly argues that the conception of disability that currently predominates in the discipline of philosophy according to which disability is a natural disadvantage or personal misfortune is inextricably intertwined with the underrepresentation of disabled philosophers in the profession of philosophy Against the understanding of disability that prevails in subfields of philosophy such as bioethics cognitive science ethics and political philosophy Tremain elaborates a new conception of disability as a historically specific and culturally relative apparatus of power Although the book zeros in on the demographics of and biases embedded in academic philosophy it will be invaluable to everyone who is concerned about the social economic institutional and political subordination of disabled people **The Disability Studies Reader** Lennard J. Davis, 2006 The second edition of *The Disability Studies Reader* builds and improves upon the classic first edition which has sold well over 6000 copies since 1999 As a field disability studies burst onto the scene across the social sciences and humanities in the 1990s and the first edition of the reader gathered the best work that had been written on the subject including essays by famous authors such as Susan Sontag and Erving Goffman The new edition is

more global in its coverage and adds material on genetic testing the human genome queer studies and issues in developing countries The size of the audience has grown since the first edition s publication and the second edition s new material will make it even more useful for courses on the subject Courses on the subject have mushroomed in the past ten years and can now be found across the social sciences humanities and behavioral sciences

Disability, Gender and the Trajectories of Power, 2024-04 This book explores the gendered experience of disability It investigates how women with disabilities fare in society focusing on the experiences of women and their interactions with family society and medical and legal institutions Women with disabilities face unprecedented levels of violence oppression and marginalisation in their daily lives as well as a lack of visibility proper care and opportunities for socio economic development This book examines the reasons and consequences of the stigmatisation of disabilities and neurodivergence denial of proper care and various forms of exclusion and violence women with disabilities face both within and outside of their homes It brings together the perspectives of academicians and activists that try and understand the various challenges faced by women with disabilities and highlights the fight for their right to autonomy respect equality and justice Filling the gap in the existing feminist research this revised edition seeks to influence the way in which society treats women with disabilities and will be of interest to scholars and researchers in the field of women s rights disability rights rehabilitation social policy and the body

Theorising Postmodernism, Feminism and Disability Barbara Fawcett, 1999

Lessons in Disability Jacob Stratman, 2015-11-16

Disability is a growing reality According to the United States Census Bureau approximately 57 million people 19 percent of the population had a disability in 2010 more than half being reported as severe Interest in disability studies is also growing in literature film art politics and religion Exploring the intersection between disability and young adult literature this collection of new essays fills a gap in scholarship between teachers and YAL scholars The contributors offer textual analysis best practices and numerous examples that enable teachers to expose students to dynamic characters who both reflect and contrast with the reader s reality

Pride Against Prejudice Jenny Morris, 1991 In *Pride Against Prejudice* Jenny Morris challenges with passion authority and conviction the reality of being different Among the topics she covers are current and historical debates on the quality of disabled peoples lives the way disability is represented within Western culture institutionalization and independence feminist research and community care and the politics of the disability movement She asserts that for too long non disabled people have not only defined the experience of disability but have had control over disabled peoples lives This important book has grown out of an emerging organization of disabled people who are part of a powerful new culture

Disability and Mothering Cynthia Lewiecki-Wilson, 2019-02-19 Editors Lewiecki Wilson and Cellio have put together the first book to focus on the intersecting spaces both cultural and personal of disability and mothering Derived from the Latin for threshold the word liminal calls attention to the book s focus on the transitional moments and spaces where the personal and social inside and outside self and other converge The volume features twenty

one previously unpublished essays by new as well as established scholars and community activists Contributors some of whom are themselves disabled or mothers of children with disabilities present moving personal accounts and accessible scholarship grounded in historical study experiential and retrospective analysis interviews social research and feminist and disability studies theories In their introduction the editors survey the theoretical frameworks of feminism and disability studies locating the points of overlap crucial to a study of disability and mothering Organized in five sections the book engages questions about reproductive technologies diagnoses and cultural scripts the ability to rewrite narratives of mothering and disability political activism and the tensions formed by the overlapping identities of race class nation and disability The essays speak to a broad audience from undergraduate and graduate students in women s studies and disability studies to therapeutic and health care professionals to anyone grappling with issues such as genetic testing and counseling raising a child with a disability or being disabled and contemplating starting a family *The Rejected Body* Susan Wendell, 1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company **Disability in Science Fiction** K. Allan, 2015-12-17 In this groundbreaking collection twelve international scholars with backgrounds in disability studies English and world literature classics and history discuss the representation of disability medical cures technology and the body in science fiction **Unruly Bodies** Susannah B. Mintz, 2007 The first critical study of personal narrative by women with disabilities *Unruly Bodies* examines how contemporary writers use life writing to challenge cultural stereotypes about disability gender embodiment and identity Combining the analyses of disability and feminist theories Susannah Mintz discusses the work of eight American autobiographers Nancy Mairs Lucy Grealy Georgina Kleege Connie Panzarino Eli Clare Anne Finger Denise Sherer Jacobson and May Sarton Mintz shows that by refusing inspirational rhetoric or triumph over adversity narrative patterns these authors insist on their disabilities as a core but not diminishing aspect of identity They offer candid portrayals of shame and painful medical procedures struggles for the right to work or to parent the inventive joys of disabled sex the support and the hostility of family and the losses and rewards of aging Mintz demonstrates how these unconventional stories challenge feminist idealizations of independence and self control and expand the parameters of what counts as a life worthy of both narration and political activism *Unruly Bodies* also suggests that atypical life stories can redefine the relation between embodiment and identity generally from publisher s website
