Feminist Approaches To Bioethics Rosemarie Putnam Tong, 1996-12-27 No other cluster of medical issues affects the genders as differently as those related to procreation contraception sterilization abortion artificial insemination in vitro fertilization surrogate motherhood and genetic screening Yet the moral diversity among feminists has led to political fragmentation foiling efforts to create policies that are likely to serve the interests of the largest possible number of women In this remarkable book Rosemarie Tong offers an approach to feminist bioethics that serves as a catalyst bringing together the varied perspectives on choice control and connection Emphasizing the complexity of feminist debates she guides feminists toward consensus in thought cooperation in action and a world that would have no room for domination and subordination Tong fairly and comprehensively presents the traditions of both feminist and non feminist ethics Although feminist approaches to bioethics derive many insights from nonfeminist ethics and bioethics Tong shows that their primary source of inspiration is feminist ethics leading them to ask the so called woman question in order to raise women s consciousness about the systems structures and relationships that oppress them Feminist bioethicists are naturally focused on acting locally in the worlds of medicine and science Their different feminist voices must be raised at the policy table with one message in order to actually do something to make gender equity a present reality rather than a mere future possibility Inability to define a plan that guarantees liberation for all women must not prevent feminists from offering a plan that promises to improve the estates of many women Otherwise a perspective less appealing to women may fill the gap

Evans, 2011-12-30

It seems like every day society faces a new ethical challenge raised by a scientific innovation Human genetic engineering stem cell research face transplantation synthetic biology all were science fiction only a few decades ago but now are all reality How do we as a society decide whether these technologies are ethical For decades professional

bioethicists have served as mediators between a busy public and its decision makers helping people understand their own ethical concerns framing arguments discrediting illogical claims and supporting promising ones These bioethicists play an instrumental role in guiding governments ethical policy decisions consulting for hospitals faced with vital decisions and advising institutions that conduct research on humans Although the bioethics profession has functioned effectively for many years it is now in crisis Policy makers are less inclined to take the advice of bioethics professionals with many observers saying that bioethics debates have simply become partisan politics with dueling democratic and republican bioethicists While this crisis is contained to the task of recommending ethical policy to the government there is risk that it will spread to the other tasks conducted by bioethicists To understand how this crisis came about and to arrive at a solution John H Evans closely examines the history of the bioethics profession Bioethics debates were originally dominated by theologians but came to be dominated by the emerging bioethics profession due to the subtle and slow involvement of the government as the primary consumer of bioethical arguments After the 1980s however the views of the government changed making bioethical arguments less legitimate Exploring the sociological processes that lead to the evolution of bioethics to where it is today Evans proposes a radical solution to the crisis Bioethicists must give up its inessential functions change the way they make ethical arguments and make conscious and explicit steps toward re establishing the profession s legitimacy as a mediator between the public and government decision makers John Evans provides a trenchant reconstruction of the waxing and waning influence of theology on the bioethics canon as well as an original proposal for a social science based bioethics This book will fascinate and instruct anyone interested in where we have been and where we should go in our societal conversation about deep human values Jonathan Moreno University of Pennsylvania

Airhart, Marilyn J. Legge, Gary L. Redcliffe, 2002-05-30 Doing Ethics in a Pluralistic World is an apt title for this collection of essays in honour of Roger C Hutchinson who over many decades has encouraged and participated in shaping a Canadian contextual social ethics His abiding interest in social ethics and in religious engagement with public issues is reflected in his life s work seeking the consensus and self knowledge required to achieve cooperation in the search for a just participatory and sustainable society One of Roger Hutchinson s many notable accomplishments is his development of a method of dialogue for ethical clarification in situations of diversity Some of the essays collected here apply this method to specific issues while others discuss how religious persons and organizations can and do co operate in a pluralistic world to achieve social and ecological well being All essays are of keen interest to those concerned with the role and function of ethics at the matrix of religious conviction and social transformation For nearly three decades Roger Hutchinson has been based at Victoria University in Toronto first in religious studies then at Emmanuel College where he completed his teaching career as professor of church and society while serving as principal from 1996 to 2001      Critical Interventions in the Ethics of Healthcare Dave Holmes, 2016-04-22 Critical Interventions in the Ethics of Healthcare argues that traditional modes of bioethics are proving incommensurable with burgeoning biotechnologies and consequently emerging subjectivities Drawn from diverse disciplines this volume works toward a new mode of discourse in bioethics offering a critique of the current

norms and constraints under which Western healthcare operates The contributions imagine new less paternalistic terms by which bioethics might proceed terms that do not resort to exclusively Western models of liberal humanism or to the logic of neoliberal economies It is argued that in this way we can begin to develop an ethical vocabulary that does justice to the challenges of our age Bringing together theorists practitioners and clinicians to present a wide variety of related disciplinary concerns and perspectives on bioethics this volume challenges the underlying assumptions that continue to hold sway in the ethics of medicine and health sciences

**Thinking Through Breast Cancer** Mary Ann G. Cutter, 2018-03-06 Anyone who has been diagnosed with breast cancer or knows someone who has been diagnosed with breast cancer recognizes that cancer raises a host of questions concerning its nature and how we treat it Such questions frame the difficult decisions that patients must make about their treatment and care Thinking Through Breast Cancer is a philosophical investigation of how breast cancer is described explained evaluated and socialized in medicine Written by a breast cancer survivor the book interweaves personal experience with a systematic breakdown of key and highly pertinent philosophical concepts and brings to light insights that emerge in metaphysics epistemology ethics social and political philosophy and bioethics Further it is an investigation of the ethical implications of understanding breast cancer Cutter seamlessly combines clinical information with philosophical analysis and makes recommendations as to how we can navigate the complex and at times uncertain terrain of breast cancer knowledge and care In this way the book is not simply a survey of what we know about breast cancer but a personal search for guidance about navigating the complex confusing and frightening terrain of breast cancer diagnosis treatment and survival

**Righting Health Policy** D. Robert MacDougall, 2022-02-23 In Righting Health Policy D Robert MacDougall argues that bioethics needs but does not have adequate tools for justifying law and policy Bioethics tools are mostly theories about what we owe each other But justifying laws and policies requires more at a minimum it requires tools for explaining the legitimacy of actions intended to control or influence others It consequently requires political rather than moral philosophy After showing how bioethicists have consistently failed to use tools suitable for achieving their political aims MacDougall develops an interpretation of Kant's political philosophy On this account the legitimacy of health laws does not derive from the morality of the behaviors they require but derives instead from their role in securing our equal freedom from each other MacDougall uses this Kantian account to show the importance of political philosophy for bioethics First he shows how evaluating kidney markets in terms of the legitimacy of prohibiting sales rather than the morality of selling kidneys reverses the widely accepted view that Kantian philosophy supports legally prohibiting markets Second MacDougall argues that an account of political authority is

necessary for settling longstanding bioethics debates about the legal and even moral standards that should govern informed consent     *Reconfiguring Reproduction* Sarojini N., Vrinda Marwah, 2015-01-01 Though commonplace today as a technological quick fix for infertility assisted reproduction is a complex phenomenon located at the intersection of patriarchy medicalization and commerce These technologies create both challenges and opportunities and response to them have sought to balance questions of ethics rights and politics The essays in this volume map the journey of ARTs in different countries examining the global industry and the challenges it poses in the context of markets and look at regulatory frameworks in diverse settings Together they bring a feminist lens to the examination of the now established ART industry Sama s longstanding work provides a special focus on India the spread and features of the industry the gendered nature of the burden and treatment of infertility the destabilization of the family as we know it and feminist debates around surrogacy that re assess ideas of agency and commodification Published by Zubaan
