Forgotten Rocket:

A Forgotten Offensive Christina J.M. Goulter, 2014-01-14 The forgotten offensive of the title is RAF Coastal Command's offensive against German sea trade between 1940 and 1945. The fortunes of the campaign are followed throughout the war and its success is then evaluated in terms of the shipping sunk and the impact on the German economy. *India's Forgotten Rocket Pioneer* Gurbir Singh, 2020-04-12 During 1934 and 1944 in Calcutta Stephen Smith worked alone and unsupported on developing rocket transport. In 1935 he was the first to demonstrate the successful transport by a rocket of livestock food and medicine. This book charts the story of Stephen H. Smith described by a contemporary as the greatest one man campaign for rocketry. He dedicated his life working alone in northeast India to develop a new revolutionary means of transport using only rocket power. The development of rockets in India is commonly understood to have ended with Tipu Sultan in 1799 and started again in 1963 with what is now called the Indian Space Research Organisation. However, in the intervening period rockets were built and championed by one man working alone in Calcutta. In 1925 he set up the Indian Air Mail Society and it is amongst the global philatelic community where his work is still known but is almost entirely forgotten from the popular imagination in India. On 14 February 1891 Stephen H. Smith, the only son of a tea plantation manager originally from Norfolk, England, was born in the Strawberry Hill region of Shillong. Between 1934 and 1944 he conducted over 200 rocket experiments to demonstrate the utility of a rocket as a means of transport. Small self-funded groups to develop rockets were established in USSR, USA, Britain, Australia, and Germany. It was from these groups that Sergei Korolev and Wernher von Braun emerged and competed in the epic space race that resulted in Sputnik, Gagarin, and Apollo 11. Stephen H. Smith was their contemporary but worked alone and unsupported in India. Long after he had died, he was inducted into the Hall of Fame by the American Airmail Society in 1989. In 1992, a year after the centenary of his birth, the Indian government celebrated his achievements by issuing a stamp and a first day cover dedicated to his work. Today his work is found in official NASA publications, the Journal of the British Interplanetary Society, and in the National Air and Space Museum. This new study of his contacts with the King of Sikkim, King George V, with a member of parliament in London, and a 25-year-long correspondence with a Swiss philatelist reveal in his own words his struggle to attain recognition and support for his work. His reluctant attempt to work with the military authorities in India during World War II ended in frustration. His multiple attempts in 1949 to contact the Governor of Bengal and Prime Minister Nehru in the newly independent India failed to generate a response. *Darmenzi* Duth Olec, 2018-01-09 An anxious bundle of nerves must save the world from an authoritative conqueror and a manipulative force of chaos. One year ago The Conqueror died; his plans stopped by three unassuming slugs. The hapless hero Numer hoped to return to a quiet life after saving his world. He was even building the courage to admit his love to Cherry. But everything goes awry when an ancient demon is released from their prison and shatters the ancient crystal that had imprisoned them. As if that's not enough, The Conqueror survived and he's taking

matters into his own tentacles Leading a band of ridiculous agents Conrad aims to take the ancient crystal to power his invasion force But not everything is as it seems Just what is the extent of this demon s power And what s with these giant beasts that keep appearing It will not be so simple to save the world this time around A sequel to Slubers the manic presenter Duth Olec pulls readers and narrator Wally Plotch into another high stakes and humorous story **Spacecraft Technology** Mark Williamson,2006-02-23 This book covers the development of space technology in the late 1950s and 1960s from the launch of Sputnik 1 in October 1957 to the landing of men on the moon in 1969 The text begins by looking at the challenge of getting into space and the development of the launch of the space launch vehicle and moves on to discussion of unmanned satellites and spaceprobes and the first capsules deployed in Earth orbit and the Apollo missions to the moon **We Forgot** Pam Holden,2020-12-07 Do you forget things sometimes Have you ever forgotten your hat Do you ever forget to take your lunch to school What else do you forget **Forgotten People, Forgotten Times** V.H. Markle,2014-06-10 Let us not forget those who served We were called to duty and we went to war These are the stories of a few of those brave young men and women who fought in Americas most unpopular war These are stories of times events and places that should never be forgotten In war the brain encircles and captures thoughts sights smells and sounds you can never get rid of After the battle the mind can shut down and thoughts begin to smother the brain If a veteran speaks listen with open ears and an open mind They all have something to say If you are a brother or sister from Vietnam talk to someone write down your thoughts contact a brother or sister If you can dont hesitate Go To The Wall These things have made me cry but they have brought back the smile that was once forgotten for so many years Welcome home my brothers and sisters **Hitler's Rockets** Norman Longmate,2009-07-23 In Hitler s Rockets Norman Longmate tells the story of the V 2 the technically brilliant but hated weapon the ancestor and forerunner of all subsequent ballistic missiles He reveals the devious power play within the German armed forces and the Nazi establishment that so influenced the creation of the rockets He shows through contemporary documents and protagonists accounts how the British intelligence skillfully pieced together often contradictory evidence as it sought to establish the true nature of the threat Finally he recalls in detail the feel and fears of the time from the viewpoint of those who suffered and those who were all too conscious tat they were the target Lost Knowledge David W. DeLong,2004-09-09 Executives today recognize that their firms face a wave of retirements over the next decade as the baby boomers hit retirement age At the other end of the talent pipeline the younger workforce is developing a different set of values and expectations which creates new recruiting and employee retention issues The evolution from an older traditional highly experienced workforce to a younger more mobile employee base poses significant challenges particularly when considered in the context of the long term orientation towards downsizing and cost cutting This is a solution oriented book to address one of the most pressing management problems of the coming years How do organizations transfer the critical expertise and experience of their employees before that knowledge walks out the door It begins by outlining the broad issues

and providing tools for developing a knowledge retention strategy and function It then goes on to outline best practices for retaining knowledge including knowledge transfer practices using technology to enable knowledge retention retaining older workers and retirees and outsourcing lost capabilities Space Age Adventures Mike Bezemek,2023-06 Space Age Adventures is a guidebook which combines short entertaining stories from spaceflight history with more than 100 adventurous activities sites across the U S including outdoor astronaut training locations air space museums and historic sites for space enthusiasts to visit *The Art of Gravity* Bruce Rousseau,2017-07-11 Humans will eradicate themselves long before the universe gets around to it The Tesseract It s today s world Humans are in charge of themselves Science coexists with alt facts Politics mingles with anti government movements Religion dances with skeptics Yes it s a typical year in the span of man So what could go wrong with man s usual conflict and blind progress Nothing until it all unravels in the blink of an eye Welcome to tomorrow s bizarre world of gravitational death the destructive evolution of man and random acts of courage First Contact The Reluctant Prophet A preacher in rural Georgia awakes one Sunday morning with a vivid prediction that millions would soon die He feels compelled to share his profound revelation with his congregation But his wife is unconvinced blaming his nightmare visions on bedside bourbon She threatens to ban alcohol from the house Second Contact The Early Victims Career politicians and other repeat offenders die by the thousands when they are repulsed from Earth by terrifying reversals of gravity Third Contact The Non Hero An injured bicycle messenger in San Francisco learns to control his own gravity People call him Jesus Part 2 but he has more noble plans than just pretending to be the next savior

Forgotten Heroes Zulu & Basuto Wars including Medal Roll 1877-8-9 Roy Dutton,2010-05-01 A work of reference with details of the Colonial and Imperial forces engaged in the Zulu and Basuto Wars between 1877 to 1879 Over 36 600 men are listed with medal entitlement causality lists and troop deployments together with numerous biographical details Also includes first hand accounts of the many campaigns with illustrated maps An invaluable guide for both medal collectors and historians These men at great personal sacrifice helped to build an Empire on which the sun would never set My Personal History of The British Interplanetary Society Leslie Johnson,2022 This is the story of the founding of the British Interplanetary Society Liverpool in 1933 before it relocated to London in 1937 It is the personal meticulous recollection of Leslie J Johnson who was the BIS s First Hon Secretary but later its treasurer editor of the bulletin and the journal and a vice president Published for the first time this manuscript was written using a manual typewritten and rich first hand source material consisting of thousands of handwritten letters As the Hon secretary he was the first contact for many now familiar names including a teenage Arthur C Clarke in 1933 and from Dr W Olaf Stapledon a professor at Liverpool University writers EF Russell Walter H Gillings Edward John Carnell Stephen Smith a rocket mail experimenter in India Herr Will Ley a rocket engineer from Germany Many who joined the BIS were interested in reading and writing science fiction including Johnson One of his earliest stories Satellites of Death was published in 1938 two decades before the launch of Sputnik The first

passenger railway military submarine and programable computer emerged in the Northwest of England for the first time It was from this generation that gifted and visionary individuals emerged in pursuit of the idea and ideals of interplanetary space travel Similar societies were founded around the world at about the same time but only the BIS continues to the present day contributing to British space policy and innovative ideas for spaceflight for communication satellites human spaceflight and interstellar travel As the BIS approaches its 90th year it can celebrate some momentous achievements including being a founding member in 1950 of the International Astronautical Federation which is now seen as the global premier body that binds the international space community

The Evolution of the Steam Locomotive (1803 to 1898)

G. A. Sekon, George Augustus Nokes, 1899 The Evolution of the Steam Locomotive (1803 to 1898) George Augustus Nokes, 1899 Future Spacecraft Propulsion Systems Paul A. Czysz, Claudio Bruno, 2006-09-19 In *Future Spacecraft Propulsion Systems* the authors demonstrate the need to break free from the old established concepts of expendable rockets using chemical propulsion and to develop new breeds of launch vehicle capable of both launching payloads into orbit at dramatically reduced cost and for sustained operations in low Earth orbit The next steps they explain to establishing a permanent presence in the solar system beyond Earth are the commercialisation of sustained operations on the Moon and the development of advanced nuclear or high energy space propulsion systems for solar system exploration out to the boundary of interstellar space In the future high energy particle research facilities may one day yield a very high energy propulsion system that will take us to the nearby stars or even beyond This is a timely and comprehensive book putting spacecraft propulsion systems in perspective *Future Spacecraft Propulsion Systems* Claudio Bruno, Paul A. Czysz, 2009-03-20 This third edition of *Future Spacecraft Propulsion Systems and Integration Enabling Technologies for Space Exploration* has been updated and expanded The major addition addresses the multi disciplinary integration between the spectrum of hypersonic vehicles to reach Earth orbit and that of their propulsion systems A best practice sizing approach is presented to define the solution spaces and facilitate the correct design of these integrated flight vehicles to mission This pragmatic approach is the essential capability sought after by design teams technology forecasters and strategic planners alike and includes lesson learned and space launchers as examples from the past Among novel systems the chapter on future combined engines includes now description and performance of pulsed detonation engines All aspects of space flight discussed in the first two editions have been updated and augmented to account for the many changes in technology policy and space objectives following the demise of the US Shuttle and the appearance of private space companies Accordingly the chapters dealing with near Earth interplanetary galactic and future breakthrough propulsion have been expanded to include new applications such as nuclear magnetic pulses recent concept powered by inertial fusion and new issues as for instance space radiation a major obstacle to space exploration and commercialization in the years to come This book can be useful to graduate students and teachers as well as industrial organizations and planners

Building Organizational Memories:

Will You Know What You Knew? Girard, John P.,2009-03-31 Provides relevant theoretical frameworks latest empirical research findings and practitioners best practices in the area of organizational memory *The Broken Road* Patrick Leigh Fermor,2014-03-04 Patrick Leigh Fermor recounts the last leg of his epic walk across Europe as he makes his way through Bulgaria Romania and finally Greece In the winter of 1933 eighteen year old Patrick Paddy Leigh Fermor set out on a walk across Europe starting in Holland and ending in Constantinople a trip that took him almost a year Decades later Leigh Fermor told the story of that life changing journey in *A Time of Gifts* and *Between the Woods and the Water* two books now celebrated as among the most vivid absorbing and beautifully written travel books of all time *The Broken Road* is the long awaited account of the final leg of his youthful adventure that Leigh Fermor promised but was unable to finish before his death in 2011 Assembled from Leigh Fermor s manuscripts by his prizewinning biographer Artemis Cooper and the travel writer Colin Thubron this is perhaps the most personal of all Leigh Fermor s books catching up with young Paddy in the fall of 1934 and following him through Bulgaria and Romania to the coast of the Black Sea Days and nights on the road spectacular landscapes and uncanny cities friendships lost and found leading the high life in Bucharest or camping out with fishermen and shepherds in the *The Broken Road* such incidents and escapades are described with all the linguistic bravura odd and astonishing learning and overflowing exuberance that Leigh Fermor is famous for but also with a melancholy awareness of the passage of time especially when he meditates on the scarred history of the Balkans or on his troubled relations with his father The book ends perfectly with Paddy s arrival in Greece the country he would fall in love with and fight for Throughout it we can still hear the ringing voice of an irrepressible young man embarking on a life of adventure
Discovery ,1929 *Forgotten Rocket* John Rankine,2003-02-01
