*Mapping Courtship and Kinship in Classical Japan* Doris G. Borgen, 2015-08-31 Literary critiques of Murasaki Shikibu's eleventh century The Tale of Genji have often focused on the amorous adventures of

its eponymous hero In this paradigm shifting analysis of the Genji and other mid Heian literature Doris G Bargen emphasizes the thematic importance of Japan s complex polygynous kinship system as the domain within which courtship occurs Heian courtship conducted mainly to form secondary marriages was driven by power struggles of succession among lineages that focused on achieving the highest position possible at court Thus interpreting courtship in light of genealogies is essential for comprehending the politics of interpersonal behavior in many of these texts Bargen focuses on the genealogical maze the literal and figurative space through which several generations of men and women in the Genji moved She demonstrates that courtship politics sought to control kinship by strengthening genealogical lines while secret affairs and illicit offspring produced genealogical uncertainty that could be dealt with only by reconnecting dissociated lineages or ignoring or even terminating them The work examines in detail the literary construction of a courtship practice known as kaimami or looking through a gap in the fence in pre Genji tales and diaries and Sei Sh nagon s famous Pillow Book In Murasaki Shikibu s Genji courtship takes on multigenerational complexity and is often used as a political strategy to vindicate injustices counteract sexual transgressions or resist the pressure of imperial succession Bargen argues persuasively that a woman observed by a man was not wholly deprived of agency She could choose how much to reveal or conceal as she peeked through shutters from behind partitions fans and kimono sleeves or through narrow carriage windows That mid Heian authors showed courtship in its innumerable forms as being influenced by the spatial considerations of the Heian capital and its environs and by the architectural details of the residences within which aristocratic women were sequestered adds a fascinating topographical dimension to courtship In Mapping Courtship and Kinship in Classical Japan readers both familiar with and new to The Tale of Genji and its predecessors will be introduced to a wholly new interpretive lens through which to view these classic texts In addition the book includes charts that trace Genji characters lineages maps and diagrams that plot the movements of courtiers as they make their way through the capital and beyond and color reproductions of paintings that capture the drama of courtship

*Japan and the Culture of the Four Seasons* Haruo Shirane, 2012-03-20. Elegant representations of nature and the four seasons populate a wide range of Japanese genres and media, from poetry and screen painting to tea ceremonies, flower arrangements, and annual observances. In *Japan and the Culture of the Four Seasons*, Haruo Shirane shows how, when, and why this practice developed and explicates the richly encoded social, religious, and political meanings of this imagery. Refuting the belief that this tradition reflects Japan's agrarian origins and supposedly mild climate, Shirane traces the establishment of seasonal topics to the poetry composed by the urban nobility in the eighth century. After becoming highly codified and influencing visual arts in the tenth and eleventh centuries, the seasonal topics and their cultural associations evolved and spread to other genres, eventually settling in the popular culture of the early modern period. Contrasted with the elegant images of nature derived from court poetry was the agrarian view of nature based on rural life. The two landscapes began to intersect in the medieval period, creating a complex, layered web of competing associations. Shirane discusses a wide array of representations of nature and the four seasons in many genres, originating in both the urban and rural perspective: textual poetry, chronicles, tales, cultivated gardens, flower arrangement, material, kimonos, screens, performative, noh, festivals, and gastronomic tea ceremony, food rituals. He reveals how this kind of secondary nature, which flourished in Japan's urban architecture and gardens, fostered and idealized a sense of harmony with the natural world just at the moment it was disappearing. Illuminating the deeper meaning behind Japanese aesthetics and artifacts, Shirane clarifies the use of natural images and seasonal topics and the changes in their cultural associations and function across history, genre, and community over more than a millennium. In this fascinating book, the four seasons are revealed to be as much a cultural construction as a reflection of the physical world.
