*The Formal Logic of Emotion* Michael Mirolla, 1991

**Philosophy and the Emotions** Anthony Hatzimoysis, 2003-07-21

This major volume of original essays maps the place of emotion in human nature through a discussion of the relation between consciousness and body by analysing the importance of emotion for human agency by pointing to the ways in which practical rationality may be enhanced as well as hindered by emotions and by exploring questions of value in making sense of emotions at a political ethical and personal level Leading researchers in the field reflect on the nature of human feelings how and why we understand what other people feel and the way in which our values become involved in specific emotional phenomena such as guilt fear shame amusement or love This collection addresses important questions in the philosophy of mind and comments on the implications of research in biology cognitive psychology psychoanalysis and narrative theory for the philosophical understanding of emotions

**The Philosophy and Practice of Medicine and Bioethics** Barbara

Maier, Warren A. Shibbes, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one's thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc

**Emotional Intelligence** Aruna Chakraborty, Amit Konar, 2009-09-16 Emotional Intelligence is a

new discipline of knowledge dealing with modeling recognition and control of human emotions The book Emotional Intelligence A Cybernetic Approach to the best of the authors knowledge is a first comprehensive text of its kind that provides a clear introduction to the subject in a precise and insightful writing style It begins with a philosophical introduction to Emotional Intelligence and gradually explores the mathematical models for emotional dynamics to study the artificial control of emotion using music and videos and also to determine the interactions between emotion and logic from the points of view of reasoning The later part of the book covers the chaotic behavior of existing emotions under certain conditions of emotional

dynamics Finally the book attempts to cluster emotions using electroencephalogram signals and demonstrates the scope of application of emotional intelligence in several engineering systems such as human machine interfaces psychotherapy user assistance systems and many others The book includes ten chapters Chapter 1 provides an introduction to the subject from a philosophical and psychological standpoint It outlines the fundamental causes of emotion arousal and typical characteristics of the phenomenon of an emotive experience The relation between emotion and rationality of thoughts is also introduced here Principles of natural regulation of emotions are discussed in brief and the biological basis of emotion arousal using an affective neuroscientific model is introduced next

Passionate Deification Henry L. Novello, 2019-11-01 In the past the passions were regarded as sicknesses of the soul due to Adam's sin As the Redeemer Christ shares in our humanity and experiences the passions but given his divine status he quickly overcomes the passions by his superior reason as the Word In effect Christ is displayed as a Stoic sage who is unperturbed by the passions The book is critical of this traditional perspective for its inability to think of the Incarnation as the Word's real participation in our humanity Christ is not a Stoic sage who displays an uninvolved holiness but the Word become flesh who displays an astonishing breadth and intensity of emotional life which reveals what it means for the fullness of divinity to dwell bodily in him Reformed theology moved beyond the traditional perspective in affirming the strong emotions of Christ as proof of his humanity but Christ's divinity was given insufficient attention The book proposes a complex view of Christ's emotions which are regarded not merely as proof of his humanity but reveal the personal attributes of divinity communicated to his humanity To observe Christ's emotions is to witness the mutual interaction of humanity and divinity in his person which accomplishes our salvation deification To imitate Christ then means that Christ's emotions become the emotions of his followers so that by seeing as God sees and feeling as God feels they go forth in obedience to Christ's commandment to love one another as he has loved us which is to live the way of the cross for the sake of the ongoing embodiment of God in the world

Mind Ecologies Matthew Crippen, Jay Schulkin, 2020-10-06 Pragmatism a pluralistic philosophy with kinships to phenomenology Gestalt psychology and embodied cognitive science is resurging across disciplines It has growing relevance to literary studies the arts and religious scholarship along with branches of political theory not to mention our understanding of science But philosophies and sciences of mind have lagged behind this pragmatic turn for the most part retaining a central nervous system orientation which pragmatists reject as too narrow Matthew Crippen a philosopher of mind and Jay Schulkin a behavioral neuroscientist offer an innovative interdisciplinary theory of mind They argue that pragmatism in combination with phenomenology is not only able to give an unusually persuasive rendering of how we think feel experience and act in the world but also provides the account most consistent with current evidence from cognitive science and neurobiology Crippen and Schulkin contend that cognition emotion and perception are incomplete without action and in action they fuse together Not only are we embodied subjects whose thoughts emotions and capacities comprise one integrated system we are living ecologies inseparable from our

surroundings our cultures and our world Ranging from social coordination to the role of gut bacteria and visceral organs in mental activity and touching upon fields such as robotics artificial intelligence and plant cognition Crippen and Schulkin stress the role of aesthetics emotions interests and moods in the ongoing enactment of experience Synthesizing philosophy neurobiology psychology and the history of science Mind Ecologies offers a broad and deep exploration of evidence for the embodied embedded enacted and extended nature of mind Emotion in Aesthetics Warren A. Shibles,2013-03-09 Emotion in Aesthetics is the first book on aesthetics to provide an extensive theory of emotion application of the cognitive emotive theory to aesthetics analysis of the relationship between aesthetics metaphor and emotion a full theory of meaning and its application to aesthetics discussion of the relationship between aesthetics music and language in terms of phonetics phonology and intonation an analysis of humanistic aesthetics a well developed naturalistic theory of ethics as applied to aesthetics and emotion Stress is placed on the views of contemporary philosophers as well as some of the main historical accounts of emotion in aesthetics The important recent work on emotion has not hitherto been applied to aesthetics As a result there is still much confusion in aesthetics about aesthetic emotion and related concepts such as the expression theory of emotion The present book has been written to show how the theory can be used to clarify the issue resulting in a major breakthrough in aesthetics In addition the theory presented is valuable in relating aesthetics to ethics and humanism

*How Our Emotions and Bodies are Vital for Abstract Thought* Anna Sverdlik,2018-06-18 If mathematics is the purest form of knowledge the perfect foundation of all the hard sciences and a uniquely precise discipline then how can the human brain an imperfect and imprecise organ process mathematical ideas Is mathematics made up of eternal universal truths Or as some have claimed could mathematics simply be a human invention a kind of tool or metaphor These questions are among the greatest enigmas of science and epistemology discussed at length by mathematicians physicians and philosophers But curiously enough neuroscientists have been absent in the debate even though it is precisely the field of neuroscience which studies the brain s mechanisms for thinking and reasoning that ought to be at the very center of these discussions How our Emotions and Bodies are Vital for Abstract Thought explores the unique mechanisms of cooperation between the body emotions and the cortex based on fundamental physical principles It is these mechanisms that help us to overcome the limitations of our physiology and allow our imperfect human brains to make transcendent mathematical discoveries This book is written for anyone who is interested in the nature of abstract thought including mathematicians physicists computer scientists psychologists and psychiatrists *The Impact of Complex Trauma on Development* Cheryl Arnold,Ralph Fisch,2011-10-16 The Impact of Complex Trauma on Development describes what happens cognitively and emotionally behaviorally and relationally to people who are repeatedly traumatized in childhood Part One brings together trauma theory with a number of theories of human development It directly addresses and describes developmental pathology and its origins Through powerful examples it conveys to the reader the pain and destruction caused by ongoing trauma abuse and

continuous stress Part Two written from the perspective of a clinician who has worked extensively with traumatized children and adults is primarily directed to mental health professionals and graduate students These chapters are devoted to describing how to recognize the pathological consequences of trauma and how to intervene and remediate these developmental deficits The overarching theory is psychoanalytically based and developmental but other treatment approaches are integrated into the therapy when they are developmentally and therapeutically appropriate The text raises important questions related to the development of the self its relationship to therapy and the diagnosis and treatment of complex trauma in children adolescents and adults

**Social Imaginaries, Volume 2, issue 1 (Spring 2016)** Suzi Adams, Paul Blokker, Natalie J. Doyle, John W. M. Krummel, Miki Kiyoshi, Guan Jun Wu, Craig Browne, Werner Binder, Johann P. Arnason, 2016-05-13 Table of Contents Suzi Adams Paul Blokker Natalie J Doyle his engagement with Habermas and Eisenstadt for the development of his hermeneutic of modernity and multiple modernities his ongoing albeit subterranean dialogue with Charles Taylor and concludes with a discussion of his recent focus on the religio political nexus

Bridging the Gap between Life and Physics Ron Cottam, Willy Ranson, 2018-03-19 This is the only book which deals with the correlatory comparison between hierarchical living systems and inorganic physical ones The culmination of the book is the proposition of research to discover and understand the natural underlying level of organization which produces the descriptive commonality of life and physics Traditional science eliminates life from its purview by its rejection of interrelationships as a primary content of systems The conventional procedure of science is that of reductionism whereby complex systems are dismantled to characterize lower level components but virtually no attention is given to how to rebuild those systems the underlying assumption is that analysis and synthesis are symmetrical This book fulfills two main coupled functions Firstly it details hierarchy as the major formulation of natural complex systems and investigates the fundamental character of natural hierarchy as a widely transferable container of structure and or function and this in the case of the new development of a representational or model hierarchy Secondly it couples this hierarchical description to that of the electronic properties of semiconductors as a well modeled canonical example of physical properties The central thesis is that these two descriptions are comparable if care is taken to treat logical and epistemological aspects with prudence a large part of the book is composed of just this aspect of care for grounding consistency As such great attention is given to correct assessment of argumentative features which are otherwise presumed known but which are usually left uncertain Development of the ideas is always based on a relationship between entity or phenomenon and their associated ecosystems and this applies equally well to the consequent derivations of consciousness and information

Dealing with Emotions Birthe Lund, Tatiana Chemi, 2015-06-25 Education is always evolving consistently with a society in flux So transformations in learning and pedagogy are necessary These endless rapid changes in pedagogy influence students and educators in a variety of ways and awake diverse emotions from happiness to fear from joy to anger Emotions are proven to influence the ways students interact

with the world In the present book the authors reflect on emotions and education from multiple perspectives the socio cultural perspective that looks at interactions among individuals the creation and recreation of the self and others the study of collaboration change processes transformative learning and aesthetic and creative learning processes The purpose of this volume is to reflect on students and educators emotional responses The construction of a safe stimulating learning climate is essential in innovative learning processes emotional interactions student teacher relations and student student interaction lay the foundation for collaboration and deep learning The present book offers empirical documentation and theoretical reflections on how pedagogical and educational changes might challenge or facilitate learning for students and educators

Issues in Science and Theology: Do Emotions Shape the World? Dirk Evers, Michael Fuller, Anne Runehov, Knut-Willy Sæther, 2016-04-14 This volume examines emotions and emotional well being from a rich variety of theological philosophical and scientific and therapeutic perspectives To experience emotion is a part of being human but what are emotions How can theology philosophy and the natural sciences unpack the nature and content of emotions This volume is based on contributions to the 15th European Conference on Science and Theology held in Assisi Italy It brings together contributions from scholars of various academic backgrounds from around the world whose individual insights are made all the richer by their juxtaposition with those from experts in other fields leading to a unique exchange of ideas      **Responsibility, Character, and the Emotions** Ferdinand David Schoeman, 1987 An examination of the responsibility individuals have for their actions and characters      The Creative Argument Thomas Girshin, 2024-04-22 The Creative Argument sets itself apart from its competitors by presenting a series of compelling works of literary nonfiction that challenge what students think they know about arguments Each chapter begins with an engaging argument from a work of nonfiction followed by an in depth yet accessible analysis of a key aspect of argumentation Suitable for both courses in argument and first year writing the principles and strategies outlined in the text help students become more creative and critical as rhetoricians both inside the classroom and out      *In Praise of the Cognitive Emotions (Routledge Revivals)* ,      Behavioral, Social, and Emotional Assessment of Children and Adolescents Sara Whitcomb, 2013-05-07 Generally recognized as the standard work in its field Behavioral Social and Emotional Assessment of Children and Adolescents provides a comprehensive foundation and guide for conducting conceptually sound culturally responsive and ecologically oriented assessments of student social and emotional behavior It is aimed at graduate students practitioners and researchers in the fields of school psychology child clinical psychology and special education but will also be of interest to those in related disciplines such as counseling psychology child psychiatry and social work Keeping intact many of the same premises and pedagogy of the previous editions this revised and updated fourth edition has been re organized to emphasize culturally responsive reflective practice with added content including updated assessment tools and strategies to be used within a Response to Intervention RtI framework In addition to updating all chapters to reflect current research and data authors Sara Whitcomb and Kenneth Merrell move

away from a more narrow view of social skills to reflect an expanded notion of strengths based assessment which includes such traits as coping skills resilience problem solving ability emotional knowledge and empathy Throughout they strive to increase professional standards in the practice of psychological and educational assessment of children and adolescents providing a solid evidence based foundation for assessment

Emotion: The Basics Michael Brady, 2018-12-07 While human beings might be rational animals they are emotional animals as well Emotions play a central role in all areas of our lives and if we are to have a proper understanding of human life and activity we ought to have a good grasp of the emotions Michael S Brady structures Emotion The Basics around two basic yet fundamental questions What are emotions And what do emotions do In answering these questions Brady provides insight into a core component of all our lives covering the nature of emotion emotion knowledge and understanding emotion and action emotions and social groups emotion morality and art In this concise and insightful introduction Brady explains why we are often better off as a result of emotion rather than reason being in the driving seat as our lives both individual and social would be significantly impoverished without the emotions With a glossary of key terms and suggestions for further reading Emotion The Basics is an ideal starting point for anyone seeking a full introduction to the philosophical study of emotion

A Study of the Major Emotions in Persons of Defective Intelligence Beulah May Morrison, 1924

The Emotional Brain Joseph LeDoux, 2015-09-22 What happens in our brains to make us feel fear love hate anger joy Do we control our emotions or do they control us Do animals have emotions How can traumatic experiences in early childhood influence adult behavior even though we have no conscious memory of them In The Emotional Brain Joseph LeDoux investigates the origins of human emotions and explains that many exist as part of complex neural systems that evolved to enable us to survive One of the principal researchers profiled in Daniel Goleman's Emotional Intelligence LeDoux is a leading authority in the field of neural science In this provocative book he explores the brain mechanisms underlying our emotions mechanisms that are only now being revealed
