Congress,1972 **Quindecennial Record of the Class of 1896, Sheffield Scientific School of Yale University** ,1912 *The Truth of the Technological World* Friedrich A Kittler,2014-09-17 Twenty three essays that document the intellectual itinerary of the philosopher and cultural historian one of the most original thinkers in recent times Friedrich Kittler 1943 2011 combined the study of literature cinema technology and philosophy in a manner sufficiently novel to be recognized as a new field of academic endeavor in his native Germany Media studies as Kittler conceived it meant reflecting on how books operate as films poetry as computer science and music as military equipment This volume collects writings from all stages of the author s prolific career Exemplary essays illustrate how matters of form and inscription make heterogeneous source material e g literary classics and computer design interchangeable on the level of function with far reaching consequences for our understanding of the humanities and the hard sciences Rich in counterintuitive propositions sly humor and vast erudition Kittler s work both challenges the assumptions of positivistic cultural history and exposes the over abstraction and language games of philosophers such as Heidegger and Derrida **Music, Books on Music, and Sound Recordings** Library of Congress,1984 **The Age of Electroacoustics** Roland Wittje,2025-02-18 The transformation of acoustics into electro acoustics a field at the intersection of science and technology guided by electrical engineering industry and the military At the end of the nineteenth century acoustics was a science of musical sounds the musically trained ear was the ultimate reference Just a few decades into the twentieth century acoustics had undergone a transformation from a scientific field based on the understanding of classical music to one guided by electrical engineering with industrial and military applications In this book Roland Wittje traces this transition from the late nineteenth century work of Hermann Helmholtz to the militarized research of World War I and media technology in the 1930s Wittje shows that physics in the early twentieth century was not only about relativity and atomic structure but encompassed a range of experimental applied and industrial research fields The emergence of technical acoustics and electroacoustics illustrates a scientific field at the intersection of science and technology Wittje starts with Helmholtz s and Rayleigh s work and its intersection with telegraphy and early wireless and continues with the industrialization of acoustics during World War I when sound measurement was automated and electrical engineering and

radio took over the concept of noise Researchers no longer appealed to the musically trained ear to understand sound but to the thinking and practices of electrical engineering Finally Wittje covers the demilitarization of acoustics during the Weimar Republic and its remilitarization at the beginning of the Third Reich He shows how technical acoustics fit well with the Nazi dismissal of pure science representing everything that German Physics under National Socialism should be experimental applied and relevant to the military
