Berman, 1984-06-30 This book examines the generally unrecognized role played by the Carnegie Ford and Rockefeller foundations in support of United States foreign policy particularly since 1945 The foundations efforts on behalf of

American interests abroad have focused primarily on their support for a number of institutions of higher education in strategically located Third World nations. These institutions modeled after foundation supported American universities were designed to train Third World leaders in norms that would encourage them minimally to assume a posture of neutrality toward American economic and political penetration of their societies. Dr. Berman's study challenges the oft asserted but undocumented thesis of the American political right that these liberal foundations historically have pursued policies detrimental to United States interests. The evidence indicates how foundation policies and programs were formulated after close consultation with leaders of the American corporate sector and government officials and how their activities were designed to further the objectives determined by those who influence the direction of United States foreign policy.

Foundations of International Politics Harold Hance Sprout, 2003-01-01 American Foundations and the Coproduction of World Order in the Twentieth Century John Krige, Helke Rausch, 2012-05-23 This volume studies the links between politics and science during the 20th century based on the example of the large US foundations. If the 20th century can be regarded in many ways as the American Century then the large US foundations such as Carnegie Rockefeller and Ford played a major role in this development. And yet they weren't simply stooges for official US power politics. The circumstances surrounding their actions were much more complicated and made great demands of the philanthropy of the day. This volume with articles in English and German shows the course of US philanthropy in Europe in the time between the world wars and following World War II it demonstrates how Europe became the setting for continually new versions of the postwar political and scientific landscape.

International Organizations and Military Affairs Hylke Dijkstra, 2016-02-05 From the UN Department of Peacekeeping Operations to the NATO International Staff and the European External Action Service international bureaucrats make decisions that affect life and death. In carrying out their functions these officials not only facilitate the work of the member states but also pursue their own distinct agendas. This book analyzes how states seek to control secretariats when it comes to military operations by international organizations. It introduces an innovative theoretical framework that identifies different types of control mechanisms. The book presents six empirical chapters on the UN, NATO and EU secretariats. It provides new data from a unique dataset and in depth interviews. It shows that member states employ a wide range of control mechanisms to reduce the potential loss of influence. They frequently forfeit the gains of delegation to avoid becoming dependent on the work of secretariats. Yet while states invest heavily in control this book also argues that they cannot benefit from the services of secretariats and keep full control over outcomes in international organizations. In their delegation and control decisions states face trade offs and have to weigh different cost categories: the costs of policy, administrative capacity and agency loss. This book will be of interest to scholars, postgraduates and officials in international organizations and national governments dealing with questions of international political economy, security studies and military affairs.

Nongovernmental Organizations in International Society V. Heins, 2008-04-14 Based on a

wealth of original information and research this book offers both a critical introduction to NGOs and a discussion of recent theoretical approaches which have either dismissed or wildly exaggerated their political significance American Philanthropy at Home and Abroad Ben Offler, Rachel Williams, 2022-08-11 American Philanthropy at Home and Abroad explores the different ways in which charities voluntary associations religious organisations philanthropic foundations and other non state actors have engaged with traditions of giving Using examples from the late eighteenth century to the Cold War the collection addresses a number of major themes in the history of philanthropy in the United States These examples include the role of religion the significance of cultural networks and the interplay between civil diplomacy and international development as well as individual case studies that challenge the very notion of philanthropy as a social good Led by Ben Offler and Rachel Williams the authors demonstrate the benefits of embracing a broad definition of philanthropy examining how American concepts including benevolence and charity have been used and interpreted by different groups and individuals in an effort to shape and at least nominally to improve people s lives both within and beyond the United States
