Income

Distribution Anthony Barnes Atkinson, François Bourguignon, Christian Morrisson, Martin Ravallion, 2001 This volume is a

comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender authority, female autonomy and

unruliness, courtship and marriage, language and speech, and performance and theatricality. Empirical Studies of Earnings

Mobility A. Atkinson, Bourguignon, C. Morris, 2013-07-04 Do individuals keep the same place on the earnings scale or is there a great deal of mobility? This volume discusses the empirical studies of this issue. *Sharing Social Science Data* Joan E.

Siebert, 1991-02-12 Although major funding agencies now require social scientists to share their documented raw data, scientists have been reluctant to comply. The reasons include unwillingness to divulge all of the conditions under which the data were generated, cost in time and money, and the desire by social scientists to carry the research further themselves. Data sharing, however, promises to foster more open, cost-effective and cumulative research and to improve the quality of methodology, data, and inference. *Sharing Social Science Data* presents the major accomplishments of social scientists who have pioneered in data sharing, highlighting the advantages for social science. It also includes an examination of the reasons for data sharing, the specific sharing practices in various disciplines, the factors affecting the usefulness of shared data, documentation, archiving, and marketing, and individual and institutional concerns about data sharing. A timely examination, this cohesive and well-written volume will interest graduate students and researchers in all areas of the social sciences. The chapters are thoughtful and well-written and they address many of the crucial issues faced by the social sciences in the 1990s. Anyone who wants to help shape the future of the social and behavioral sciences can benefit from giving this book at least a quick read. *Contemporary Psychology* *Bulletin of the American Society for Information Science* American Society for Information Science, 1974 **Catalog of Copyright Entries. Access, 1993-01-01 Americans are increasingly concerned about the privacy of personal data yet we demand more and more information for public decision making. This volume explores the seeming conflicts between privacy and data access, an issue

of concern to federal statistical agencies collecting the data research organizations using the data and individuals providing the data A panel of experts offers principles and specific recommendations for managing data and improving the balance between needed government use of data and the privacy of respondents The volume examines factors such as the growth of computer technology that are making confidentiality an increasingly critical problem The volume explores how data collectors communicate with data providers with a focus on informed consent to use data and describes the legal and ethical obligations data users have toward individual subjects as well as toward the agencies providing the data In the context of historical practices in the United States Canada and Sweden statistical techniques for protecting individuals identities are evaluated in detail Legislative and regulatory restraints on access to data are examined including a discussion about their effects on research This volume will be an important and thought provoking guide for policymakers and agencies working with statistics as well as researchers and concerned individuals *Mathematical Economics and Operations Research*
