Kotzé, 2015-06-29 Bringing together leading international scholars in the field this Research Handbook interrogates from various angles and positions the fractious relationship between human rights and the environment and between human rights and environmental law **Human Rights and the Environment** Linda Hajjar Leib, 2011 The book examines the genesis and development of environmental rights or the Right to Environment in international law and discusses their philosophical theoretical and legal underpinnings in the context of sustainable development and the notion of solidarity rights **The Human Rights-Based Approach to Carbon Finance** Damilola S. adjudication Other chapters examine how vulnerable groups women indigenous peoples and climate refugees would be disproportionately affected by climate change The book then goes on to discuss a new category of people created by climate change those who will be rendered stateless as a result of states disappearing and displaced by climate change and whether human rights law can adequately address these emerging issues

Children's Rights Law in the Global Human Rights Landscape Eva Brems, Ellen Desmet, Wouter Vandenhoele, 2017-04-21 Children's rights law is often studied and perceived in isolation from the broader field of human rights law This volume explores the inter relationship between children's rights law and more general human rights law in order to see whether elements from each could successfully inform the other Children's rights law has a number of distinctive characteristics such as the emphasis on the best interests of the child the use of general principles and the inclusion of third parties e.g. parents and other care takers in treaty provisions The first part of this book questions whether these features could be a source of inspiration for general human rights law In part two the reverse question is asked could children's rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders such as women persons with disabilities indigenous peoples or older persons Finally the interaction between children's rights law and human rights law and the potential for their isolation inspiration or integration may be coloured or determined by the thematic issue under consideration Therefore the third part of the book studies the interplay between children's rights law and human rights law in the context of specific topics intra family relations LGBTQI marginalization migration media the environment and transnational human rights obligations

Natural Resources and Human Rights Jérémie Gilbert, 2018 Examining the role human rights can play in the regulation of natural resource management this book shines light on the duties of states and private actors when exploiting natural resources and the procedural rights of affected citizens

Human Rights Approaches to Planetary Crises Samvel Varvastian, 2024-11-11 This book analyses over 20 years of rights based litigation in the areas of climate change and plastic pollution in order to assess the value of rights in confronting and overcoming planetary crises We live in an age of planetary crises such as climate change biodiversity loss and plastic pollution which take a huge toll on communities all around the world endangering their fundamental interests But can the lack of government action on these crises or action that worsens them amount to violations of human rights Many courts are grappling with this question as rights based litigation becomes increasingly common By focusing on climate change and plastic pollution as case studies this book examines the viability of rights claims when confronting planetary crises in courts From early attempts to pursue rights claims in response to planetary crises in the first decade of the 2000s to high profile court wins in such cases in the 2010s and the spread of such cases across dozens of jurisdictions by the 2020s rights claims in climate change and plastic pollution litigation have become a truly global phenomenon Through a systematic and in depth analysis of such litigation in more than thirty jurisdictions this book identifies factors that determine the viability of rights claims when confronting planetary crises It reveals that even

though not all litigation forums are equally favourable to such claims human rights can indeed be successfully invoked in different types of legal action This book will be of considerable interest to policymakers and legal scholars and practitioners as well as students who work in or study environmental and climate change law human rights law constitutional law and international and comparative law Environmental Law Dimensions of Human Rights Ben Boer, 2015-03-12 How can we guarantee a right to life or a right to health without also guaranteeing a decent environment in which to exercise these rights It is becoming increasingly obvious that a high quality environment is key to the fundamental human rights of life and health and associated rights such as the right to clean water adequate housing and food This book canvasses a range of law and policy issues concerning human rights and the environment Each chapter examines an aspect of the links between environmental law and human rights in substantive and or procedural terms loosely falling into four themes human rights and the environment in the context of the private sector analysis of decisions of the European and Inter American courts in respect of substantive and procedural aspects human rights and the environment in the Asian region including the issue of human displacement and the future direction of human rights and environment law **Research Handbook on International Law and Social Rights** Christina Binder, Jane A. Hofbauer, Flávia Piovesan, Amaya Úbeda de Torres, 2020-08-28 This comprehensive Research Handbook offers a comparative overview of the history nature and current status of social rights at the universal and regional level Tracing their evolution from rather modest beginnings to becoming the category of rights responding most accurately to the 21st century's policy objectives of poverty eradication and equitable resource allocation this Research Handbook assesses the mechanisms used to enhance the implementation and enforcement of social rights *Human Rights and Climate Change* Siobhan McInerney-Lankford, Mac Darrow, Lavanya Rajamani, 2011 This Study explores arguments about the impact of climate change on human rights examining the international legal frameworks governing human rights and climate change and identifying the relevant synergies and tensions between them It considers arguments about i the human rights impacts of climate change at a macro level and how these impacts are spread disparately across countries ii how climate change impacts human rights enjoyment within states and the equity and discrimination dimensions of those disparate impacts and iii the role of international legal frameworks and mechanisms including human rights instruments particularly in the context of supporting developing countries adaptation efforts The Study surveys the interface of human rights and climate change from the perspective of public international law It builds upon the work that has been carried out on this interface by reviewing the legal issues it raises and complementing existing analyses by providing a comprehensive legal overview of the area and a focus on obligations upon States and other actors connected with climate change The objective has therefore been to contribute to the global debate on climate change and human rights by offering a review of the legal dimensions of this interface as well as a survey of the sources of public international law potentially relevant to climate change and human rights in order to facilitate an understanding of what is

meant in legal terms by human rights impacts of climate change and help identify ways in which international law can respond to this interaction *The Routledge International Handbook of Criminology and Human Rights* Leanne Weber, Elaine Fishwick, Marinella Marmo, 2016-08-25 The Routledge International Handbook of Criminology and Human Rights brings together a diverse body of work from around the globe and across a wide range of criminological topics and perspectives united by its critical application of human rights law and principles This collection explores the interdisciplinary reach of criminology and is the first of its kind to link criminology and human rights This text is divided into six sections each with an introduction and an overview provided by one of the editors The opening section makes an assessment of the current standing of human rights within the discipline Each of the remaining sections corresponds to a substantive area of harm prevention and social control which together make up the main core of contemporary criminology namely criminal law in practice transitional justice peacemaking and community safety policing in all its guises traditional and emerging approaches to criminal justice and penalty both within and beyond the prison This Handbook forms an authoritative foundation on which future teaching and research about human rights and criminology can be built This multi disciplinary text is an essential companion for criminologists sociologists legal scholars and political scientists **International Law and Sustainable Development** Alistair Rieu-Clarke, 2005-11-01 Implementing the goal of sustainable development has long been heralded as the means by which the needs of both present and future generations can be met However finding a long term balance between economic social and environmental interests the basic tenet of sustainable development has proved largely illusive in practice This book shows that while a number of legal frameworks to help promote the goal of sustainable development have been proposed at the international level they fail to fully capture the essence of sustainable development and international law s capacity to support its implementation The book offers a critical analysis of past attempts to develop legal frameworks for promoting sustainable development at the international level and advocates for a fresh approach based on lessons learnt from the law of international watercourses The book is divided into four sections The first section includes an overview of the topic area and an understanding of international law In section two the book explores the meaning of sustainable development and considers the term s relationship with international law A detailed analysis of how the law of international watercourses seeks to reconcile competing economic social and environmental interests is carried out in section three The book concludes with a section advocating the need for a fresh approach to international law and sustainable development and offering the foundations for this approach based on lessons learnt from the law of international watercourses
