Nationalism and Populism Carsten Schapkow, Frank Jacob, 2022-08-22 Nationalism was declared dead too early At the end of the Cold War the postnational age was announced and liberalism claimed to have been victorious Simultaneously a postnational order was proclaimed Transnational alliances like the European Union were thought to become much more important in international relations Instead we witnessed the rise of various forms of strong nationalisms all over the globe during the early twenty first century and right wing parties gaining more and more votes in elections often characterized by heavily nationalist agendas This volume shows how nationalist dreams and fears determine politics in an age that was supposed to witness a rather peaceful coexistence amongst nations by those who consider transnational ideas more valuable than national demands The case studies in the book offer explanations of how and why nationalism made its way back to the common consciousness and which elements stimulated the re establishment of the aggressive nation state Continuities of empire actual or imagined as well as the role of foreign and otherness for nationalist narratives are key in order to explain how among other factors globalization stimulated the rise of twenty first century nationalisms **Link V.
