Introduction to Functional Programming Using Haskell Richard Bird, 1998. After the success of the first edition, *Introduction to Functional Programming using Haskell* has been thoroughly updated and revised to provide a complete grounding in the principles and techniques of programming with functions. The second edition uses the popular language Haskell to express functional programs. There are new chapters on program optimisation, abstract datatypes in a functional setting and programming in a monadic style. There are complete new case studies and many new exercises. As in the first edition, there is an emphasis on the fundamental techniques for reasoning about functional programs and for deriving them systematically from their specifications. The book is self-contained, assuming no prior knowledge of programming and is suitable as an introductory undergraduate text for first or second year students.

Subject Headings for School and Public Libraries Joanna F. Fountain, 2012-01-16. For public and school libraries, this resource reflects recent changes in Library of Congress subject headings and authority files and provides bilingual information essential to reference librarians and catalogers serving Spanish speakers. Libraries must provide better access to their collections for all users, including Spanish language materials. The American Library Association has recognized this increasing need. *Subject Headings for School and Public Libraries Bilingual* Fourth Edition is the only resource available that provides both authorized and reference entries in English and Spanish. A first check source for the most frequently used headings needed in school and public libraries, this book incorporates thousands of new and revised entries to assist in applying LCSH and CSH headings. Of the approximately 30,000 headings listed, most include cross references and all of the cross reference terms are translated. MARC21 tags are included for all authorized entries to simplify entering them into computerized catalogs, while indexes to all headings and free-floating subdivisions are provided in translation from Spanish to English. This book gives librarians access to accurate translations of the subject terms printed in books published and cataloged in English-speaking countries, invaluable information in settings with Spanish-speaking patrons.
