Empty World:

The Vindication of Nothingness Marco Simionato, 2021-11-17 The philosophical question of nothingness has often been controversial The main core of the question is the use of nothing or nothingness as a noun phrase rather than a quantifier phrase This work deals with the question of nothingness and metaphysical nihilism in analytic philosophy After evaluating an account of nothingness based on the notion of an empty possible world the present work proposes two original arguments for metaphysical nihilism With a preface by Graham Priest Simionato's book delivers a welcome deepening of our understanding of nothing Graham Priest *Absence and Nothing* Stephen Mumford, 2021 This book argues that nothing is not and explains how we can meaningfully speak about what is not *Sandtray Therapy* Linda E. Homeyer, Daniel S. Sweeney, 2011-01-07 This new edition of *Sandtray Therapy* is an essential read for professionals and students who wish to incorporate the use of sandtray therapy into their work with clients of all ages All aspects of this therapeutic technique are explored engagingly and in detail The authors describe how to select appropriate types of sand put together a sandtray and develop a collection of miniatures for their clients to use Their six step protocol guides beginners through a typical session including room set up creation of the client's sandtray and the therapist's role processing the sandtray cleanup and post session documentation New chapters discuss group sandtray therapy working with couples and families sandtray therapy and psychic trauma integrating cognitive and structural techniques and a review of the relevant research Numerous photos of sandtrays and miniatures are provided and case studies illustrate how to carry out an effective session Appendices offer sample forms and handouts as well as a detailed bibliography to help readers make the most of this innovative and creative therapy practice

Come On! Ernst Ulrich von Weizsäcker, Anders Wijkman, 2017-11-12 Current worldwide trends are not sustainable The Club of Rome's warnings published in the book *Limits to Growth* are still valid Remedies that are acceptable for the great majority tend to make things worse We seem to be in a philosophical crisis Pope Francis says it clearly our common home is in deadly danger Analyzing the philosophical crisis the book comes to the conclusion that the world may need a new enlightenment one that is not based solely on doctrine but instead addresses a balance between humans and nature as well as a balance between markets and the state and the short versus long term To do this we need to leave behind working in silos in favor of a more systemic approach that will require us to rethink the organization of science and education However we have to act now the world cannot wait until 7.6 billion people have struggled to reach a new enlightenment This book is full of optimistic case studies and policy proposals that will lead us back to a trajectory of sustainability But it is also necessary to address the taboo topic of population increase Countries with a stable population fare immensely better than those with continued increase Finally we are presenting an optimistic book from the Club of Rome **The Problem of Existence** Arthur Witherall, 2017-03-02 This book explores the question of why there is something instead of nothing Several responses to this question are possible but only some of them address the question seriously respecting its emotional aspects

as well as its cognitive dimension The author carefully distinguishes those answers that are truly satisfactory in both respects from those that are inadequate It can be argued that the existence of the world has no explanation at all or that there is a necessary being whose existence is self explanatory or that the world exists because it has value Each kind of response is defensible to some degree and it is argued that where they are defensible they have a common content Incorporating aspects of both the analytical and continental traditions this book also responds to several historical philosophers concerned with these questions including Plato Leibniz Kant and Nietzsche *Metaphysics, Sophistry, and Illusion* Mark Balaguer, 2021-01-26

Metaphysics Sophistry and Illusion does two things First it introduces a novel kind of non factualist view and argues that we should endorse views of this kind in connection with a wide class of metaphysical questions most notably the abstract object question and the composite object question More specifically Mark Balaguer argues that there is no fact of the matter whether there are any such things as abstract objects or composite objects or material objects of any other kind Second *Metaphysics Sophistry and Illusion* explains how these non factualist views fit into a general anti metaphysical view called neo positivism and explains how we could argue that neo positivism is true Neo positivism is the view that every metaphysical question decomposes into some subquestions call them Q1 Q2 Q3 etc such that for each of these subquestions one of the following three anti metaphysical views is true of it non factualism or scientism or metaphysically innocent modal truth ism These three views can be defined very roughly as follows non factualism about a question Q is the view that there is no fact of the matter about the answer to Q Scientism about Q is the view that Q is an ordinary empirical scientific question about some contingent aspect of physical reality and Q can't be settled with an a priori philosophical argument And metaphysically innocent modal truth ism about Q is the view that Q asks about the truth value of a modal sentence that is metaphysically innocent in the sense that it doesn't say anything about reality and if it is true isn't made true by reality
