Jacob Höglund, Rauno V. Alatalo

Fallow Deer Their History Distribution And Biology:

Fallow Deer Donald Chapman, Norma Chapman, 1975 **The Natural History of Deer** Rory Putman, 1988 This book reviews current knowledge of the biology and natural history of the world's 40 species of deer Deer of the World Mario Melletti, Stefano Focardi, 2025-06-11 This book is the first comprehensive reference work ever published on the systematics ecology conservation status and management of all the world's deer species Covering all 53 deer species worldwide this volume brings together the contributions of 160 international deer experts and provides A comprehensive overview of the current state of knowledge on the evolution phylogeny taxonomy and systematics of deer An in depth insight into the ecology and conservation status of each species with detailed accounts A series of case studies on conservation management hunting farming disease ecology and the impact of deer on forest ecosystems This beautifully illustrated book is an invaluable resource for researchers wildlife managers and students of conservation biology ecology and management as well as the interested layperson It reveals the fascinating story of deer evolution the long history of human interactions with deer and the major threats to this charismatic species group **The Handbook of New Zealand Mammals** Carolyn King, David Forsyth, 2021-01-20 The Handbook of New Zealand Mammals is the only definitive reference on all the land breeding mammals recorded in the New Zealand region including the New Zealand sector of Antarctica It lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions It describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources The description of each species is arranged under standardised headings for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora The book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers For this third edition the text and references have been completely updated and reorganised into Family chapters The colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps A History of the Animal World in the Ancient Near East Billie Jean Collins, 2001-12-01 This book is about all aspects of man's contact with the animal world sacrifice sacred animals diet domestication in short from the sublime to the mundane Chapters on art literature religion and animal husbandry provide the reader with a complete picture of the complex relationships between the peoples of the Ancient Near East and their animals A reference guide and key to the menagerie of the Ancient Near East with ample original illustrations **Competition and Resource Partitioning in Temperate Ungulate Assemblies** R.J. Putman, 2012-12-06 Rory Putman addresses the question of how in many temperate ecosystems diverse and species rich assemblies of ungulates manage to co exist despite often quite extensive overlap in ecological

requirements Putman explores the potential for competition competition tolerance and even positive facilitation amongst the members of such guilds of ungulates As a central worked example the author employs data resulting from over 20 years of personal research into the ecology and population dynamics of various large herbivores of the New Forest in Southern England With these he applies formal protocols in resource use evidence for resource limitation and evidence for interaction between species in changing population size over the years **Fallow Deer** Jochen Langbein,Norma Chapman,2003 *The History of British Mammals* Derek Yalden,2010-01-31 As ice retreated from Britain 15 000 years ago a host of large mammals including reindeer wild horses wooly mammoths moose wolves brown bears lynxes and wolverines established itself in Britain The largest surviving wild land mammal today the red deer the largest contemporary land carnivore the badger and another 65 or so extant wild mammals included about a quarter of the wild mammals that have been introduced in the last 15 000 years The contemporary fauna however is largely dominated by domestic animals such as cattle sheep pigs and humans This book explores the fate of the large extinct species as well as how why and when the introduced species appeared

Strahan's Mammals of Australia Andrew M. Baker,2023-11-23 Fully updated and with completely reworked text and images this is the Fourth Edition of the acclaimed The Mammals of Australia Strahan s Mammals of Australia is the best book available on the subject being the most definitive comprehensive and up to date It provides a written account of every species of native mammal known to have existed in Australia since European settlement with 403 species covered in total It is beautifully illustrated with more than 1 500 colour photographs while each species account includes a detailed description of the animal and its behaviour Species covered range from marsupials monotremes and rodents through to bats seals and whales The new edition sees the addition of 14 newly described species and includes all the latest taxonomic treatments and many changes to names common and scientific and other features that have been accepted in the 14 years that have passed since the publication of the Third Edition **European Ungulates and Their Management in the 21st Century** Marco Apollonio,Reidar Andersen,Rory Putman,2010-02-04 The first book to summarise management objectives for ungulates across Europe **Deer Veterinary Medicine** Aiden P. Foster,2025-05-15 A guide to the care and treatment of deer for veterinary professionals Deer Veterinary Medicine is an essential reference for veterinary professionals preparing for deer encounters Rooted in extensive field experience the contributions from a range of authors provide details of common conditions across multiple deer species and the knowledge required by the veterinary professionals who deal with them The book considers the different contexts where deer are encountered including wild populations and deer held in captivity as farm park and zoo collections The chapters topics range from handling and sedating deer through to nutrition and postmortem examination and pathology They cover key body systems including the gut nervous ocular and respiratory systems and the skin Deer Veterinary Medicine readers will also find Detailed consideration of the use of sedation in deer providing analgesia and methods of euthanasia Coverage of species including red roe fallow water deer Reeves muntjac

reindeer and white tailed deer Coverage of veterinary interventions for reproductive purposes Detailed consideration of the management of parasitic diseases Detailed consideration of notifiable including TB and CWD and zoonotic diseases including E coli and cryptosporidiosis A detailed drug formulary including where available evidence from published studies Edited by the past president of the British Deer Veterinary Association BDVA this book is a fitting successor to Management and Diseases of Deer A Handbook for Veterinary Surgeons last published in 1994 by the Veterinary Deer Society now the BDVA Synthesizing key contributions by a range of experts from Europe and the US the new Deer Veterinary Medicine is ideal for veterinarians veterinary surgeons and veterinary students as well as readers interested in the management of captive and wild deer

Deer George A. Feldhamer, William J. McShea, 2012-01-26 Think of deer and the image that pops into most American's minds is that of a white tailed deer the most common large mammal in North America Most Europeans are more familiar with red deer It may surprise many people to know that there are actually about 50 species of deer found throughout the world Here readers will find nontechnical expert information about the wide range of diverse deer species Did you know that elk and caribou are deer Or that the earliest fossils of deer are 15 to 20 million years old Have you ever wondered whether deer swim play or see color How do deer avoid predators and survive the winter Do deer make good pets or carry contagious diseases George A Feldhamer and William J McShea answer these and other intriguing questions about members of the deer family Cervidae From the diminutive pudu of South America that weighs 17 pounds to male moose that weigh close to 2 000 pounds Feldhamer and McShea explore the biology evolution ecology feeding habits reproduction and behavior of deer They chronicle the relationships between humans and deer both positive and negative and discuss the challenges of deer conservation and management With vivid color photographs and an accessible and engaging question and answer format this easy to read book is the go to resource on deer Nature lovers hunters and anyone curious about deer will find this fact filled book both fascinating and full of surprises

Leks Jacob Höglund, Rauno V. Alatalo, 1995 The evolution of leks clusters of small territories where males congregate and display in order to attract mates is of central issue in behavioral ecology because of the insights it offers into female mate choice sexual selection and the evolution of mating systems In the first book on the subject Jacob Höglund and Rauno Alatalo draw together existing knowledge on two main aspects of lekking Why do leks evolve in some species and not in others Why do females of certain lekking species select their mates even though such behavior reaps few or no material benefits for them In each case they emphasize the importance of understanding the selective forces that act on individuals in natural populations Höglund and Alatalo synthesize the available information on lekking in all animal groups and suggest new areas of research Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase

access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Publication: Fallow deer by N. Chapman and D. Chapman** British Deer Society,1970 **Bioenergetics Of Wild Herbivores** Robert J. Hudson,2018-01-18 Bioenergetics is an emerging discipline which offers a more profound understanding of the ecology behaviour and evolution of wild herbivores Increasingly bioenergetic principles have been applied in management since they provide insight into population dynamics and are relevant to manipulation of habitats and assessment of the impacts of resource development Growing interest in the agricultural potential of wild herbivores has provided further impetus In spite of this promise there are few comprehensive syntheses of the concept and its application to wild herbivores This volume attempts to fill this need This book provides a great amount of detail but its expressive aim is to lead us to the whole animal to a herd to population as integral parts of an ecological entity which in turn is the result of evolutionary forces The concept of this book promises the realization of an overdue change in the approach to bioenergetics to nutrition and husbandry and thus to the management of wild herbivores the final emancipation from rules and views based primarily on domesticated herbivores or on experimental animals held under unnatural conditions necessarily impending them behaviourally physically and psychically **Hoofed Mammals of British Columbia** David M. Shackleton,Royal British Columbia Museum,1999 Hoofed mammals ungulates are the most abundant large mammals in the world They are also plentiful in British Columbia which is home to nine wild native species moose elk caribou bison mountain goat two species of deer and two of sheep There are also several introduced species In Hoofed Mammals of British Columbia David Shackleton presents a comprehensive summary of the most up to date information on these ungulates In the well illustrated introduction he discusses their evolution and biology survival adaptations and social organization He also covers conservation issues tracking and taxonomy In the species accounts he describes each species and subspecies and discusses their natural history habitat diet behaviour reproduction life expectancy and mortality factors and predators Each account includes a distribution map and data on taxonomy recent population estimates conservation status and traditional aboriginal use Excellent illustrations and two keys help identify each species by its external features or its skull Hoofed Mammals of British Columbia is the third of six handbooks on the mammals of British Columbia a Royal B C Museum project to update and expand the classic treatment by Ian McTaggart Cowan and Charles Guiguet The Mammals of British Columbia last revised in 1965

Ungulate Management in Europe Rory Putman,Marco Apollonio,Reidar Andersen,2011-04-28 This book considers a number of problems posed by ungulates and their management in Europe Through a synthesis of the underlying biology and a comparison of the management techniques adopted in different countries the book explores which management approaches seem effective and in which circumstances Experts in a number of different areas of applied wildlife biology review various management problems and alternative solutions including the impact of large ungulates on agriculture forestry and conservation habitats the impact of disease and predation on ungulate populations and the involvement of ungulates in road

traffic accidents and possible measures for mitigation This book is directed at practising wildlife managers those involved in research to improve methods of wildlife management and policy makers in local regional and national administrations

BIOL & MGMT CERVIDAE Christen M. Wemmer,1987-11-17 A conference held at the Conservation and Research Center National Zoological Park Smithsonian Institution Front Royal Virginia August 1 5 1982 *Terrestrial Cetartiodactyla*
Luca Corlatti, Frank E. Zachos, 2022-09-29 This volume provides comprehensive overviews of each terrestrial cetartiodactyl species biology including palaeontology physiology genetics reproduction and development ecology habitat and diet Their economic significance and management as well as future challenges for research and conservation are also addressed Each chapter includes a distribution map a photograph of the animal and key literature This authoritative volume of the Handbook of the Mammals of Europe is a timely and detailed compilation of all European terrestrial cetartiodactyls and will appeal to academics and students in mammal research as well as to professionals dealing with mammal management including control use and conservation *Fallow Deer (Dama Dama)* Norma G. Chapman, Donald I. Chapman, British Deer Society, 1978

Eventually, you will utterly discover a new experience and expertise by spending more cash. still when? attain you consent that you require to acquire those every needs subsequently having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will guide you to comprehend even more concerning the globe, experience, some places, in imitation of history, amusement, and a lot more?

It is your certainly own mature to play-act reviewing habit. in the midst of guides you could enjoy now is **Fallow Deer Their History Distribution And Biology** below.
