Familial Cancer Control Walter Weber, 2012-12-06 The European School of Oncology came into existence to respond to a need for information education and training in the field of the diagnosis and treatment of cancer There are two main reasons why such an initiative was considered necessary Firstly the teaching of oncology requires a rigorously multidisciplinary approach which is difficult for the Universities to put into practice since their system is mainly disciplinary orientated Secondly the rate of technological development that impinges on the diagnosis and treatment of cancer has been so rapid that it is not an easy task for medical faculties to adapt their curricula flexibly With its residential courses for organ pathologies and the seminars on new techniques laser monoclonal antibodies imaging techniques etc or on the principal therapeutic controversies conservative or mutilating surgery primary or adjuvant chemotherapy radiotherapy alone or integrated it is the ambition of the European School of Oncology to fill a cultural and scientific gap and thereby create a bridge between the University and Industry and between these two and daily medical practice One of the more recent initiatives of ESO has been the institution of permanent study groups also called task forces where a limited number of leading experts are invited to meet once a year with the aim of defining the state of the art and possibly reaching a consensus on future developments in specific fields of oncology
