Family Violence Vol 1 Prevention And Treatment:

Handbook of Family Violence Alan S. Bellack, Michel Hersen, R.L. Morrison, Vincent B. Van Hasselt, 2013-06-29 In the last decade there has been heightened clinical and investigative activity in the area of family violence This of course is partly attributable to recent surveys showing a high incidence of family violence in the United States For example there are indications that nearly 30% of married women in this country are victims of physical abuse by spouses at some point in their marriage Further FBI statistics show that approximately 13% of all homicides are husband wife killings Moreover it has been projected that such figures are likely to increase over the next several years Consistent with these trends funding of family violence research by both federal and private agencies has increased Indeed federal agencies such as the National Institute of Mental Health and the National Institute of Law Enforcement and Criminal Justice have provided considerable support for work in this area In addition family violence particularly wife battering child abuse and sexual abuse of children has been the focus of media attention at the national level and has generated intensive interest in both lay and professional publications Moreover there have been several recent governmental hearings and investigations regarding the prevalence of these problems *Family Violence* Douglas J. protection to have their voices heard Second it acknowledges the centrality of mothers subjective experience in keeping children safe Finally it challenges dominant often dehumanizing narratives of mothers involved in child protection through providing a more nuanced understanding of their lives Ultimately this anthology calls for a fundamental rethinking of how mothers involved in child protection proceedings are conceptualized in child protection research policy and practice It is recommended that mothers voices must be central to humanely reforming child protection systems

Substance Abuse Treatment and Domestic Violence Patricia Anne Fazzone, 1997 clients Child abuse and neglect elder abuse women s abuse of men and domestic violence within same sex relationships are important issues that are not addressed in depth in this document largely because each requires separate comprehensive review Other patterns of domestic violence outside the scope of this TIP are abused women who in turn abuse their children or react violently to their partners continued attacks and adult or teenage children who abuse their parents Researchers have found that one fourth to one half of men who commit acts of domestic violence also have substance abuse problems Gondolf 1995 Leonard and Jacob 1987 Kantor and Straus 1987 Coleman and Straus 1983 Hamilton and Collins 1981 Pernanen 1976 and that a sizable percentage of convicted batterers were raised by parents who abused drugs or alcohol Bureau of Justice Statistics 1994 Studies also show that women who abuse alcohol and other drugs are more likely to be victims of domestic violence Miller et al 1989 The primary purpose of this document is to provide the substance abuse treatment field with an overview of domestic violence so that providers can understand the particular needs and behaviors of batterers and survivors as defined above and tailor treatment plans accordingly This requires an understanding not only of clients issues but also of when it is necessary to seek help from domestic violence experts The TIP also may prove useful to domestic violence support workers whose clients suffer from substance related problems As the TIP makes clear each field can benefit enormously from the expertise of the other and cooperation and sharing of knowledge will pave the way for the more coordinated system of care discussed in Chapter 6 Future publications will examine those aspects of the problem that concern such special populations as adolescent

Handbook of Marriage and the Family Marvin B. Sussman,Suzanne K. Steinmetz,Gary W. Peterson,2013-06-29 To know where we are going as scholars educators and practitioners in the field of marriage and family life we first need to know where we have been A perusal of early texts on marriage and family life provides some thought provoking insights into the accuracy of the saying what goes around comes around It is interesting to note who has been considered to be in a position to provide information on marriage and family life Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease who emphasized cleanliness order fighting germs and eliminating rodents and insects There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics An insightful essay of this type is by Marta Karlweis 1926 in which she notes There is no other fetish that society holds to so firmly as the conception woman with all its usual associations of infantilism and dependence The child requires protection is a minor and consequently a serf but above all it possesses no spiritual existence Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes p **The Emerald International**

Miville,Angela D. Ferguson,2014-02-06 Multicultural aspects of psychology have received some attention in the literature in the last decade A number of texts currently address these significant concerns for example Counseling the Culturally Different Sue Handbook of Multicultural Counseling Poterotto et l 2009 and Handbook of Multicultural Counseling Competencies Pope Davis Coleman 2005 In their most recent editions several of these books address more nuanced complexities of diversity for example the intersections of gender or social class with race ethnicity Meanwhile other texts

have addressed gender issues in psychology Handbook of Counseling Women Counseling Men with some attention paid to racial ethnic and other diversity concerns Clearly the progression of scholarship in this field reflects the importance of incorporating multiple aspects of diversity within psychology However no book currently exists that fully addresses the complexities of race ethnicity and gender together Better understanding of the dual impact of race ethnicity and gender on psychological functioning may lead to more effective conceptualizations of a number of mental health issues such as domestic violence addictions health related behaviors and achievement Exploring the impact of race ethnicity and gender also may provide a broader understanding of self in community as this affects individuals families and other social groups and work and career development Topics of interest may include identity development worldviews and belief systems parenting styles interventions for promoting resilience and persistence and strategies for enhancing more accurate diagnostic and treatment modalities Today s world is comprised of multiple and intersecting communities that remain in need of psychological models and interventions that support and promote both individual and collective mental health We believe that utilizing unidimensional conceptual models e g focusing solely on race ethnicity or gender no longer adequately addresses psychological concerns that are dynamic complex and multi faceted The proposed Handbook will focus on timely topics which historically have been under addressed for a number of diverse populations
