Family Law Cases Text Problems 3rd Edition:

Family Law in America Sanford N. Katz, 2011-07-01 For many years family law was viewed as a study of the regulation of relationships of husband and wife and parent and child Both relationships were clearly defined In the case of husband and wife it was through formal legal procedures or informal arrangements called marriage In the case of parent and child it was either through biology or adoption Equally defined were the stages by which these relationships were established maintained and terminated By the close of the twentieth century basic questions about who should be officially designated a family member and by what procedure were being raised both in the legislature and in litigation In addition conventional models that had defined domestic relations such as marriage divorce and adoption were either being expanded to include contemporary patterns of living arrangements and the current reality or new models were being constructed In *Family Law in America* Professor Sanford N Katz examines the present state of family law in America Themes include the tension between individual autonomy and governmental regulation in all aspects of family law the extent to which relationships established before marriage are being regulated and how marriage is being redefined to take into account equality of the sexes It demonstrates how the definition of marriage as a partnership in which the individual spouse's rights are recognized has resulted in protection of the vulnerable spouse and examines fault and no fault divorce procedures and the extent to which these procedures reflect social realities This volume describes state intervention into the parent and child relationship and how this is reflected in the reexamination of the privacy of the family unit It concludes with a discussion of the conventional model of adoption of children and how additional models are being developed to take into account new family forms
