In the Public's Interest Gautam Bhan, 2016-11-15 This book studies the recent legacy of basti evictions in Delhi mass clearings of some of the city's poorest neighborhoods as a way to understand how the urban poor are disenfranchised in the name of public interest and in the case of Delhi by the very courts meant to empower and protect them Studying bastis says Gautam Bhan provokes six clear lines of inquiry applicable to studies of urbanism across the global south The first is the long standing debate over urban informality and illegality the debate's impact on conceptions and practices of urban planning the production of space and the regulation of value The second is a set of debates on good governance read through their intersections with ideas of planned development within rapidly transforming cities The third is the political field of urban citizenship and the possibilities of substantive rights and belonging in the city The fourth is resistance and the ability of a city's subaltern residents to struggle against exclusion The two remaining inquiries both cut across and unify the first four One of these is the role of the judiciary and the relationships between law and urbanism in cities of the global south The other is the relationship between democracy and inequality in the city What emerges about Delhi in particular are a set of new modes for the reproduction of inequality When rights are lost citizenship is unequal and differentiated the promise of development is refused and poverty and inequality are reproduced and deepened The task at hand says Bhan is not just to explain evictions but also to listen to what they are telling us about the city that is as well as the city that can be

**In the public interest** G. B. C. Palmer, 1956 *Public Interest Law* Burton A. Weisbrod, Joel F. Handler, Neil K. Komesar, 2021 What is public interest law How effective is it What are the limits to litigation as a mechanism for conflict resolution In this study economists lawyers and sociologists evaluate an institutional form that is new to American society and indeed to the world the public interest law PIL organization The book introduces the reader to the structure resources and activities of this nonprofit industry and also to the factors that affect PIL firms in their choices of cases and methods of handling them The authors examine PIL s vast range of contemporary public policy concerns These include such general topics as the environment consumerism housing employment discrimination medical care occupational health and safety education finance and taxation A number of base studies are presented and a method for economic analysis and evaluation is introduced and applied The study points to PIL s success in advocating under represented interests in winning courtroom decisions and in translating legal victories into reallocations of resources At the same time it notes the bias of PIL towards test case litigation a propensity to focus on judicial victories rather than on real social change and a tendency to use lawyers even when other types of professionals might be more effective Many of these problems stem from uncertainty of funding and legal restrictions on nonprofit organizations The result is a set of hurdles that distracts PIL firms from their principal goals The authors do not limit themselves to PIL but comment on the effectiveness of legal instruments as devices for social change and on the behavior of the voluntary nonprofit sector a little studied portion of the economy The book presents a fresh approach to the study of both collective type economic problems and institutional setting in which public interest law works This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1978

**Copyright Law and the Public Interest in the Nineteenth Century** Isabella Alexander, 2010-03-03  
Copyright law is commonly described as carrying out a balancing act between the interests of authors or owners and those of the public While much academic work both historical and contemporary has been done on the authorship side of the equation this book examines the notion of public interest and the way that concepts of public interest and the rhetoric surrounding it have been involved in shaping the law of copyright While many histories of copyright focus on the eighteenth century this book's main concern is with the period after 1774 The nineteenth century was the period during which the boundaries of copyright as we know it today were drawn and ideas of public interest were integral to this process but in different and complex ways The book engages with this complexity by moving beyond debates about the appropriate duration of copyright and considers the development of other important features of copyright law such as the requirement of legal deposit the principle that some works will not be subject to copyright protection on the grounds of public interest and the law of infringement While the focus of the book is on literary copyright it also traces the expansion of copyright to cover new subject matters such as music dramatic works and lectures The book concludes by examining the making of the 1911 Imperial Copyright Act the statute upon which the law of copyright in Britain and in all former British colonies is based The history traced in this book has considerable relevance to debates over the scope of copyright law in the present day it emphasises the contingency and complexity of copyright law's development and current shape as well as encouraging a critical approach to the justifications for copyright law

**Environmental Public Interest Litigation in China** Xi Wang, Xiaobo Zhao, Noeleen McNamara, 2023-06-24 This book offers readers an accessible and broad ranging guide to Environmental Public Interest Litigation EPIL which has burgeoned in China over the past decade The aim of this book is to provide a systematic review of Chinese experiences with EPIL in environmental matters both with a view to gauging its success to date and well as discussing some more critical aspects To this end the book

systematically examines the establishment and development of EPIL in China's legal, social and political contexts. It examines particularly the significant role and functions of EPIL in China's environmental governance and the far-reaching impacts on Chinese civil society and governments. It also offers readers an insiders' perspective in terms of procedural and substantive issues with respect to EPIL by reviewing the institutional designs, theoretical underpinnings and specific mechanisms, the roles of various participants and stakeholders involved in this legal process. At the same time, it studies leading EPIL cases raised from environmental pollution, natural resource damage and ecological damage and the effectiveness of environmental adjudication that sustains EPIL as a new form of judicial instrument. This book is written to remedy the gap between Chinese and English literature in this area of law. The analysis of these issues through a historic and comparative perspective reveals the strengths and weaknesses of the current legal regime and serves as a basis for recommendations for bringing about more effective EPIL in China.

*Copyright and the Public Interest in China* G. H. Tang, 2011-11-30. This brilliant amalgam of law, history, social analysis and some Confucian philosophy argues for a distinctive Chinese approach to copyright and the public interest, aligning not only the Western commitment to individual creativity but also supporting public access to and use of works without the consent of the copyright holder. The argument involves fascinating analysis not only of evolving Chinese attitudes to education, libraries, archives and censorship but also of the profound significance of the Internet in China today. Hector MacQueen, University of Edinburgh, UK. Guan Hong Tang's book offers a fresh, insightful and scholarly treatment of the relationship between the law of copyright and the public interest in China. Copyright legislation in China is a novelty dating from 1990 and Dr Tang provides a vivid overview of the historical and cultural tensions between traditional Chinese Confucianism and the very concept of copyright, tensions which more recent legislation and case law seek to address. Gillian Davies, Hogarth Chambers, UK. Guan Hong Tang expertly highlights how the multidimensional concept of public interest has influenced the development and limitations of Chinese copyright. Since 1990, China has awarded copyright individual rights but also provides for public non-criminal enforcement. The author reveals that pressures of development, globalisation and participation in a world economy have hastened the loss of public interest from copyright. However, for a socialist country placing the common ahead of the individual interest, the public interest also constitutes a phenomenological tool with which to limit copyright. The author also discusses how the rise of the Internet, which has had a major social and economic impact on China, raises problems for Chinese copyright law. Comparing Chinese copyright law with the USA and the UK, topical issues are presented in this unique book, including those arising within education, library and archives sectors. This insightful book will strongly appeal to students and researchers in IP law, comparative law, Chinese studies, international commerce and information science. It will also prove invaluable for lawyers and consultants with expertise in IP and China.
