## **In The Space Of Theory Postfoundational Geographies Of The Nation State:**

In the Space of Theory, 2005      **War, Citizenship, Territory** Deborah Cowen, Emily Gilbert, 2008-03-25 For all too obvious reasons war empire and military conflict have become extremely hot topics in the academy Given the changing nature of war one of the more promising areas of scholarly investigation has been the development of new theories of war and war's impact on society War Citizenship Territory features 19 chapters that look at the impact of war and militarism on citizenship whether traditional territorially bound national citizenship or transnational citizenship Cowen and Gilbert argue that while there has been an explosion of work on citizenship and territory Western academia's avoidance of the immediate effects of war among other things has led them to ignore war which they contend is both pervasive and well nigh permanent This volume sets forth a new geopolitically based theory of war's transformative role on contemporary forms of citizenship and territoriality and includes empirical chapters that offer global coverage      *Managing the Infosphere* Stephen D. McDowell, Philip E. Steinberg, Tami K. Tomasello, 2008-08-13 Managing the Infosphere examines the global world of communications as a mobile space that overlaps uneasily with the world of sovereign territorial nation states Drawing on their expertise in geography political science international relations and communication studies the authors investigate specific policy problems encountered when international organizations corporations and individual users try to manage a space that simultaneously contradicts and supports existing institutions and systems of governance identity and technology The authors argue that the roles of these systems in cyberspace cannot be fully understood unless they are seen as mutually constituting each other in specific historical structures institutions and practices With vision and insight the authors look beyond the Internet to examine the entire networked world from cell phones and satellites to global tourism and business travel      **Post-Politics in Context** Ali Riza Taskale, 2016-04-28 As disciplines Politics and International Relations remain dominated by ideas drawn from traditions of liberal internationalism and political realism in which political imagination is preoccupied with command and order rather than with disruption and emancipation Yet they have failed to offer adequate answers to why political action is foreclosed in contemporary times Proposed through a historically informed engagement with seminal thinkers including Walter Benjamin Friedrich Nietzsche Gilles Deleuze and Michel Foucault and examples from films and contemporary events Ali R za Ta kale presents an original and much needed new perspective to interpret politics in our contemporary societies He argues that post politics is a counterrevolutionary logic which aims to create a society without conflict struggle and radical systemic change Post Politics in Context serves as seminal intervention upon the debate over the depoliticised conditions of contemporary neoliberal society as well as functioning as an introduction to the core theoretical frameworks of alternative tradition of social and political thought in a manner that is lacking in current debates about Politics and International Relations      *Handbook of Neoliberalism* Simon Springer, Kean Birch, Julie MacLeavy, 2016-07-07 Neoliberalism is easily one of the most powerful discourses to emerge within the social sciences in the last two decades and

the number of scholars who write about this dynamic and unfolding process of socio spatial transformation is astonishing Even more surprising though is that there has until now not been an attempt to provide a wide ranging volume that engages with the multiple registers in which neoliberalism has evolved The Routledge Handbook of Neoliberalism seeks to offer a comprehensive overview of the phenomenon of neoliberalism by examining the range of ways that it has been theorized promoted critiqued and put into practice in a variety of geographical locations and institutional frameworks With contributions from over 50 leading authors working at institutions around the world the volumes seven sections will offer a systematic overview of neoliberalism s origins political implications social tensions spaces natures and environments and aftermaths in addressing ongoing and emerging debates The volume aims to provide the first comprehensive overview of the field and to advance the established and emergent debates in a field that has grown exponentially over the past two decades coinciding with the meteoric rise of neoliberalism as a hegemonic ideology state form policy and program and governmentality It includes a substantive introductory chapter and will serve as an invaluable resource for undergraduates graduate students and professional scholars alike

*Beyond Walls: Re-inventing the Canada-United States Borderlands*  
Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations

**The Persistence of Nationalism**  
Angharad Closs Stephens, 2013-03-12 This is a book about the difficulties of thinking and acting politically in ways that refuse the politics of nationalism The book offers a detailed study of how contemporary attempts by theorists of cosmopolitanism citizenship globalism and multiculturalism to go beyond nationalism often reproduce key aspects of a nationalist imaginary It argues that the challenge of resisting nationalism will require more than a shift in the scale of politics from the national up to the global or down to the local and more than a shift in the count of politics to an emphasis on diversity and multiculturalism In order to avoid the grip of nationalist thinking we need to re open the question of what it means to imagine community Set against the backdrop of the imaginative geographies of the War in Terror and the new

beginning promised by the Presidency of Barack Obama the book shows how critical interventions often work in collaboration with nationalist politics even when the aim is to resist nationalism It claims that a nationalist imaginary includes powerful understandings of freedom subjectivity sovereignty and political space time which must also be placed under question if we want to avoid reproducing ideas about us and them Drawing on insights from feminist cultural and postcolonial studies as well as critical approaches to International Relations and Geography this book presents a unique and refreshing approach to the politics of nationalism

The Ashgate Research Companion to Critical Geopolitics Merje Kuus, 2016-04-01 Since the late 1980s critical geopolitics has gone from being a radical critical perspective on the disciplines of political geography and international relations theory to becoming a recognised area of research in its own right Influenced by poststructuralist concerns with the politics of

representation critical geopolitics considers the ways in which the use of particular discourses shape political practices Initially critical geopolitics analysed the practical geopolitical language of the elites and intellectuals of statecraft Subsequent iterations have considered the role that popular representations of the international political world play As critical geopolitics has become a more established part of political geography it has attracted ever more critique from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus while others have challenged critical geopolitics to address alternative resistant forms of geopolitical practice Again critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas non representational theory emotional geographies and affect It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set Bringing together leading researchers associated with the different forms of critical geopolitics this volume produces an overview of its achievements limitations and areas of new and potential future development The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics

Critical Border Studies Noel Parker, Nick Vaughan-Williams, 2016-03-23 This edited collection formalises Critical Border Studies CBS as a distinctive approach within the interdisciplinary border studies literature Although CBS represents a heterogeneous assemblage of thought the hallmark of the approach is a basic dissatisfaction with the Line in the Sand metaphor as an unexamined starting point for the study of borders A headline feature of each contribution gathered here is a concerted effort to decentre the border By decentring we

mean an effort to problematise the border not as taken for granted entity but precisely as a site of investigation On this view the border is not something that straightforwardly presents itself in an unmediated way It is never simply present nor fully established nor obviously accessible Rather it is manifold and in a constant state of becoming Empirically contributors examine the changing nature of the border in a range of cases including the Arctic Circle German Dutch borderlands the India Pakistan region and the Mediterranean Sea Theoretically chapters draw on a range of critical thinkers in support of a new paradigm for border research The volume will be of particular interest to border studies scholars in anthropology human geography international relations and political science Critical Border Studies was published as a special issue of Geopolitics

**Decolonizing the Map** James R. Akerman,2017-06-16 Almost universally newly independent states seek to affirm their independence and identity by making the production of new maps and atlases a top priority For formerly colonized peoples however this process neither begins nor ends with independence and it is rarely straightforward Mapping their own land is fraught with a fresh set of issues how to define and administer their territories develop their national identity establish their role in the community of nations and more The contributors to Decolonizing the Map explore this complicated relationship between mapping and decolonization while engaging with recent theoretical debates about the nature of decolonization itself These essays originally delivered as the 2010 Kenneth Nebenzahl Jr Lectures in the History of Cartography at the Newberry Library encompass more than two centuries and three continents Latin America Africa and Asia Ranging from the late eighteenth century through the mid twentieth contributors study topics from mapping and national identity in late colonial Mexico to the enduring complications created by the partition of British India and the racialized organization of space in apartheid and post apartheid South Africa A vital contribution to studies of both colonization and cartography Decolonizing

the Map is the first book to systematically and comprehensively examine the engagement of mapping in the long and clearly unfinished parallel processes of decolonization and nation building in the modern world      **Gender, Violence and Security**

Laura Shepherd, 2013-07-04 How do understandings of the relationships between gender violence security and the international inform policy and practice in which these notions are central What are the practical implications of basing policy on problematic discourses In this highly original poststructural feminist critique the author maps the discursive terrains of institutions both NGOs and the UN which formulate and implement resolutions and guides of practice that affect gender issues in the context of international policy practices The author investigates UN Security Council Resolution 1325 passed in 2000 to address gender issues in conflict areas in order to examine the discursive construction of security policy that takes gender seriously In doing so she argues that language is not merely descriptive of social political reality but rather constitutive of it Moving from concept to discourse and in turn to practice the author analyses the ways in which the resolution s discursive construction had an enormous influence over the practicalities of its implementation and how the resulting tensions and inconsistencies in its construction contributed to its failures The book argues for a re conceptualisation of gendered violence in conjunction with security in order to avoid partial and highly problematic understandings of their practical relationship Drawing together theoretical work on discourses of gender violence and international security sexualised violence in war gender and peace processes and the domestic international dichotomy with her own rigorous empirical investigation the author develops a compelling discourse theoretical analysis that promises to have far reaching impact in both academic and policy environments      **Seeking Asylum** Alison Mountz, In July 1999 Canadian authorities intercepted four boats off the coast of British Columbia carrying nearly six hundred Chinese citizens who were being smuggled into Canada Government officials held the migrants on a Canadian naval base which it designated a port of entry As one official later recounted to the author the Chinese migrants entered a legal limbo treated as though they were walking through a long tunnel of bureaucracy to reach Canadian soil The long tunnel thesis is the basis of Alison Mountz s wide ranging investigation into the power of states to change the relationship between geography and law as they negotiate border crossings Mountz draws from many sources to argue that refugee receiving states capitalize on crises generated by high profile human smuggling events to implement restrictive measures designed to regulate migration Whether states view themselves as powerful actors who can successfully exclude outsiders or as vulnerable actors in need of stronger policies to repel potential threats they end up subverting access to human rights altering laws and extending power beyond their own borders Using examples from Canada Australia and the United States Mountz demonstrates the centrality of space and place in efforts to control the fate of unwanted migrants      **Borders, Boundaries, Frontiers** Thomas M. Wilson, 2023-11-30 International borders are among the most significant political inventions of modern times The borders between national states are not just important to the peoples and governments who face each other across the borderline any

international border can become a regional hotspot of global concern But aside from the significant role borders play in national and international affairs borders are also places and spaces where people live work raise families and build businesses Written for students across disciplines *Borders Boundaries Frontiers* introduces readers to the study of borders and border cultures Thomas M Wilson examines both historical foundations and current developments in the field with an emphasis on anthropological contributions Ultimately *Borders Boundaries Frontiers* encourages students to explore the role anthropology plays in the understanding of contemporary borders
