scarce and expensive It is with this in mind that we are republishing this volume now in an affordable modern high quality edition complete with the original text and artwork *The Right of Individual Self-Defense in Public International Law* Jan Kittrich, 2008 The book examines in detail one of the most controversial topic in current international law namely the scope and extent of the right of individual self defense The book carefully traces the paths which have been followed in the developing legal debate on self defense The author uses numerous case studies of incidents involving the use of force in alleged self defense such as the Entebbe Incident 1976 the Nicaragua Case 1986 or the Israeli Lebanese conflict of 2006 which have formed the central point of scholarly debate The author's conclusions are based not only on thorough analysis of academic discussions but also of the practice of States and international bodies especially of the United Nations Organization At the outset of the book the author reviews the historical context and the customary evolution of the right of self defense Reference is made to the famous Caroline Case of 1837 which set the necessary conditions of lawful exercise of self defense Next the author examines the concept and legal nature of self defense carefully assessing the customary conditions of necessity proportionality and immediacy derived from the Caroline Case As the occurrence of an armed attack is a condition sine qua non of lawful invocation of self defense several modalities of an armed attack are attentively evaluated such as its constituent elements beginning or scale The author explores whether reactions to acts of international terrorism committed by a non State may be based on the right of self defense In times of global terrorist networks it is highly desirable to attach special attention to use of force in self defense as a remedy against serious acts of terrorism Thorough analysis of State practice is shown on several examples from recent history the U S air raid on Libya in 1986 and on Baghdad in 1993 and relatively recent air strikes on Sudan and Afghanistan in 1998 Reference is also made to the most striking example the Al Qaeda attack on the United States in 2001 The validity of claims of anticipatory preventive self defense is examined on a theoretical level and then applied to the specific details of the Israeli air strike on the Osiraq Nuclear Reactor in 1981 The two main approaches to preventive self defense restrictive and traditional are then discussed in detail Brief analysis is also devoted to the nature of the so called pre-emptive self defense indicating its current position under international law

Bradley CCP,2013-07-11 SDT 1 is a Self Defense Manual written and designed for College Students taking a semester long Self Defense course The manual gives the reader insight into the psychology of awareness preparing for eminent violence and the troubling mind set of criminals This manual is also the perfect tool for anyone who wants to practice Self Defense techniques at home The manual plainly describes the techniques and how to use them and has pictures to illustrate proper form *Killing in Self-Defence* Fiona Leverick,2006-12-07 This book is a comprehensive analysis of the criminal defence of self defence from a philosophical legal and human rights perspective The primary focus is on self

defence as a defence to homicide as this is the most difficult type of self defensive force to justify Although not always recognised as such self defence is a contentious defence permitting as it does the victim of an attack to preserve her life at the expense of another If one holds that all human life is of equal value explaining why this is permissible poses something of a challenge It is particularly difficult to explain where the aggressor is for reasons of non age or insanity for example not responsible for her actions The first part of the book is devoted to identifying the proper theoretical basis of a claim of self defence It examines the classification of defences and the concepts of justification and excuse in particular and locates self defence within this classification It considers the relationship between self defence and the closely related defences of duress and necessity It then proceeds critically to analyse various philosophical explanations of why self defensive killing is justified before concluding that the most convincing account is one that draws on the right to life with an accompanying theory of forfeiture The book then proceeds to draw upon this analysis to examine various aspects of the law of self defence There is detailed analysis of the way in which on a human rights approach it is appropriate to treat the issues of retreat imminence of harm self generated self defence mistake and proportionality with a particular focus on whether lethal force is ever permissible in protecting property or in preventing rape The analysis draws on material from all of the major common law jurisdictions The book concludes with an examination of the implications that the European Convention on Human Rights might have for the law of self defence especially in the areas of mistaken belief and the degree of force permissible to protect property

War and Self-Defense David Rodin, 2002-10-17 When is it right to go to war The most persuasive answer to this question has always been in self defense In a penetrating new analysis bringing together moral philosophy political science and law David Rodin shows what's wrong with this answer He proposes a comprehensive new theory of the right of self defense which resolves many of the perplexing questions that have dogged both jurists and moral philosophers By applying the theory of self defense to international relations Rodin produces a far reaching critique of the canonical Just War theory The simple analogy between self defense and national defense between the individual and the state needs to be fundamentally rethought and with it many of the basic elements of international law and the ethics of international relations
