In The Hall:

Discourses on a new System of Society, as delivered in the Hall of Representatives of the United States, etc Robert Owen, 1825 **Yankees in the Hall of Fame** Kerry Keene, David Hickey and Raymond Sinibaldi, 2023-05-08 The New York Yankees are the most successful franchise in the history of sports When they were founded as the New York Highlanders no one could have imagined how high they would land capturing 40 American League pennants and a staggering 27 World Series championships Many of baseball's all time greats have shined in Yankee pinstripes on their way to the Baseball Hall of Fame The dynasty's birth featured Babe Ruth and Lou Gehrig in the House that Ruth Built Legendary greats followed Joe DiMaggio Yogi Berra Mickey Mantle Whitey Ford Casey Stengel and Reggie Jackson In the new millennium Derek Jeter and Mariano Rivera picked up the torch carrying it from the Bronx to Cooperstown *Dance and Dancers in the Victorian and Edwardian Music Hall Ballet* Alexandra Carter, 2017-11-28 First published in 2005 The Victorian and Edwardian music hall ballet has been a neglected facet of dance historiography falling prey principally to the misguided assumption that any ballet not performed at the Opera House or legitimate theatre necessarily meant it was of low cultural and artistic merit Here Alexandra Carter identifies the traditional marginalization of the working class female participants in ballet historiography and moves on to reinstate the lost period of the music hall ballet and to apply a critical account of that period Carter examines the working conditions of the dancers the identities and professional lives of the ballet girls and the ways in which the ballet of the music hall embodied the sexual psyche of the period particularly in its representations of the ballet girl and the ballerina By drawing on newspapers journals theatre programmes contemporary fiction poetry and autobiography Carter firmly locates the period in its social economic and artistic context The book culminates in the argument that there are direct links between the music hall ballet and what has been termed the birth of British ballet in the 1930s a link so long ignored by dance historians This work will appeal not only to those interested in nineteenth century studies but also to those working in the fields of dance studies gender studies cultural studies and the performing arts *The King's Hall Within the University of Cambridge in the Later Middle Ages* Alan B. Cobban, 2007-01-11 A detailed study of the King's Hall Cambridge from its foundation in the early fourteenth century until its dissolution in 1546 It is based largely on the 26 extant volumes of the King's Hall accounts which form one of the most remarkable sequences of medieval collegiate records in Europe The rich profusion of the material has made it possible to reconstruct the economic constitutional and business organisation of a medieval academic society thereby providing for the college that same kind of exhaustive treatment which has been lavished upon other categories of medieval institutions Dr Cobban discusses the vital contribution made by the King's Hall to the evolution of the University of Cambridge and shows how the interpretation of medieval Cambridge history has to be considerably modified He demonstrates the important formative influence of the King's Hall in shaping the course of English collegiate development and the ways in which this College was finely attuned to the new educational trends of the age

object caught the physics world totally by surprise and it continues to mesmerize physicists and mathematicians today The butterfly plot is intimately related to many other important phenomena in number theory and physics including Apollonian gaskets the Foucault pendulum quasicrystals the quantum Hall effect and many more Its story reflects the magic the mystery and the simplicity of the laws of nature and Indu Satija in a wonderfully personal style relates this story enriching it with a vast number of lively historical anecdotes many photographs beautiful visual images and even poems making her book a great feast for the eyes for the mind and for the soul

Mettetal v. Hall, 288 MICH 200 (1939), 1939 10 **Reports of Cases Argued and Determined in the Supreme Judicial Court of the State of Maine** Maine. Supreme Judicial Court, 1831 **Quantum Chaos Y2k, Proceedings Of Nobel Symposium 116** Sven Aberg, Karl-fredrik

Berggren, 2001-10-09 Quantum chaos is becoming a very wide field that ranges from experiments to theoretical physics and purely mathematical issues In view of this grand span Nobel Symposium 116 focused on experiments and theory and attempted to encourage interplay between them There was emphasis on the interdisciplinary character of the subject involving a broad range of subjects in physics including condensed matter physics nuclear physics atomic physics and elementary particle physics The physics involved in quantum chaos has much in common with acoustics microwaves optics etc and therefore the symposium also covered aspects of wave chaos in this broader sense The program was structured according to the following areas manifestations of classical chaos in quantum systems transport phenomena quantal spectra in terms of periodic orbits semiclassical and random matrix approaches quantum chaos in interacting systems chaos and tunneling wave dynamic chaos This important book constitutes the proceedings of the symposium *Carving Devotion in the Jain Caves at Ellora* Lisa Owen, 2012-04-03 Drawing on art historical epigraphical and textual evidence this book is the first full scale reconstruction of medieval Jain artistic and devotional practices at the rock cut site of Ellora in Maharashtra India Created during the ninth and tenth centuries Ellora's Jain caves are among the best preserved examples of medieval Jain art in India While this book briefly addresses traditional art historical issues of date and iconography it primarily considers the articulation of sacred space within the caves and the role of imagery in shaping devotional practices Building upon scholarship that examines Jainism within its larger South Asian context this book also explores connections between the Jain monuments and their Hindu and Buddhist counterparts to reveal a lived religious world at Ellora Women and Peace in the Islamic World Yasmin Saikia, Chad Haines, 2015-01-20 How realistic is the prospect of peace in the Muslim world This question is the predominant focus for global analysis today but its debate frequently ignores the cultural and social complexity of the Muslim world reducing it into a system of states and select actors This book addresses such a failing by exploring how the everyday interactions of women in accordance with Islamic personal ethics can offer the world a new interpretation of peace In particular it focuses on the women in Islamic societies from Aceh to Bosnia Morocco to Bangladesh initiating a dialogue on the role of these women in peacemaking This concentration upon the complex issues of the everyday

both enables a detailed exploration of how people conceptualise peace and opens up new frameworks for conflict resolution. The discussions that emerge lead to a critical questioning of assumptions about peace as a state policy and cessation of violence. Drawing upon original research from different parts of the Middle East, North Africa and Asia including Iran, India, Afghanistan, Bangladesh, Bosnia, Egypt and Sudan, the contributors offer a refreshing new look at Muslim women as peacemakers, challenging any assumptions of Islam as an inherently violent religion. Such a timely work provides new and important analyses on the role of Muslim women in forging new pathways of peace in the contemporary world. *Recreation in the United States* James H. Mind in the Cave: Consciousness and the Origins of Art David Lewis-Williams, 2004-04-17

The breathtakingly beautiful art created deep inside the caves of western Europe has the power to dazzle even the most jaded observers. Emerging from the narrow underground passages into the chambers of caves such as Lascaux, Chauvet and Altamira, visitors are confronted with symbols, patterns and depictions of bison, woolly mammoths, ibexes and other animals. Since its discovery, cave art has provoked great curiosity about why it appeared, when and where it did, how it was made and what it meant to the communities that created it. David Lewis-Williams proposes that the explanation for this lies in the evolution of the human mind. Cro-Magnons, unlike the Neanderthals, possessed a more advanced neurological makeup that enabled them to experience shamanistic trances and vivid mental imagery. It became important for people to fix or paint these images on cave walls, which they perceived as the membrane between their world and the spirit world from which the visions came. Over time, new social distinctions developed as individuals exploited their hallucinations for personal advancement and the first truly modern society emerged. Illuminating glimpses into the ancient mind are skillfully interwoven here with the still evolving story of modern day cave discoveries and research. *The Mind in the Cave* is a superb piece of detective work, casting light on the darkest mysteries of our earliest ancestors while strengthening our wonder at their aesthetic achievements.
