**Nordic Contributions in IS Research** Ulrika Lundh Snis, 2016-08-05 This book contains the refereed proceedings of the 7th Scandinavian Conference on Information Systems SCIS 2016 as well as of the IFIP Working Group 8.6 Conference both held together in Ljungskile Sweden August 2016 The 7th SCIS conference had the theme Living in the cloud and highlighted the digitalization of society that has proceeded and entered almost all aspects of our lives The double blind review process led to the acceptance of 9 out of 25 paper submitted For the IFIP 8.6 conference the theme in 2016 was Diffusion of IS for Learning New Practices and addressed issues related to learning of new practices from both organizational and societal perspectives traditionally covered by the IFIP Working Group 8.6 For this conference 4 out of 11 manuscript were accepted for presentation      Gender Issues in Learning and Working with Information Technology: Social Constructs and Cultural Contexts Booth, Shirley, Goodman, Sara, Kirkup, Gill, 2010-05-31 This book deals with different features of the burgeoning knowledge society gender equity learning and information technology with the focus on gender not in the taken for granted biological sense of sex but in the socially constituted sense of it Provided by publisher      Information Society and the Workplace Jeff Hearn, Tuula Heiskanen, 2012-12-06 Much has been written on the grand prospects for Information Society much less on what this might mean in everyday terms So what do we find when we look at what is happening in a society Finland that is one of closest to an information society Bringing together studies of everyday local practices in workplaces within information society this book has a special focus on social space and the agency of actors It includes both theoretical reviews and detailed qualitative research It also highlights the political challenges of the information society challenges which are likely to become subjects of international concern      CSCW 2006 ,2006      Design, Development and Sensemaking of Human-Robot Interaction in Care Settings Felix Carro, 2024-09-12 Social robots have significantly advanced in capabilities and availability gradually becoming part of everyday life Their new interactive features are relevant to the struggling care sector As Western societies age the demand for care services rises yet the workforce does not grow at the same rate This book explores the potential of social robots to support the workforce and enhance the well being of residents in care homes Using a socio informatics approach this research investigates how residents and caregivers interact with social

robots examines and facilitates their appropriation and provides insights into the development of the robots software and hardware The research and development were carried out collaboratively in care homes with the people who work and live there The findings indicate that social robots can be beneficial in care homes They broaden the options for social care workers and when integrated into daily routines can provide brief respite periods Additionally they positively impact residents by engaging them in cognitive and physical activities However the robots can only assist and not replace care workers

**The Evolving Landscape of Ethical Digital Technology** Simon Rogerson, 2021-09-16 In a world that is awash in ubiquitous technology even the least tech savvy know that we must take care how that technology affects individuals and society That governments and organizations around the world now focus on these issues that universities and research institutes in many different languages dedicate significant resources to study the issues and that international professional organizations have adopted standards and directed resources toward ethical issues in technology is in no small part the result of the work of Simon Rogerson Chuck Huff Professor of Social Psychology at Saint Olaf College Northfield Minnesota In 1995 Apple launched its first WWW server Quick Time On line It was the year Microsoft released Internet Explorer and sold 7 million copies of Windows 95 in just 2 months In March 1995 the author Simon Rogerson opened the first ETHICOMP conference with these words We live in a turbulent society where there is social political economic and technological turbulence it is causing a vast amount of restructuring within all these organisations which impacts on individuals which impacts on the way departments are set up organisational hierarchies job content span of control social interaction and so on and so forth Information is very much the fuel of modern technological change Almost anything now can be represented by the technology and transported to somewhere else It s a situation where the more information a computer can process the more of the world it can actually turn into information That may well be very exciting but it is also very concerning That could be describing today More than 25 years later these issues are still at the forefront of how ethical digital technology can be developed and utilised This book is an anthology of the author s work over the past 25 years of pioneering research in digital ethics It is structured into five themes Journey Process Product Future and Education Each theme commences with an introductory explanation of the papers their relevance and their interrelationship The anthology finishes with a concluding chapter which summarises the key messages and suggests what might happen in the future Included in this chapter are insights from some younger leading academics who are part of the community charged with ensuring that ethical digital technology is realised

*More-Than-Human Design in Practice* Anton Poikolainen Rosén, Antti Salovaara, Andrea Botero, Marie Louise Juul Søndergaard, 2024-11-29 This book provides an overview of the diverse multidisciplinary field of more than human design offering a philosophical grounding of more than human design in posthumanism while putting practical design examples and methods to the forefront There is an urgent need to radically re imagine design as its current processes are contributing to global warming pollution deforestation ocean acidification ozone layer depletion loss of

biodiversity and species extinction Given this need more than human design has emerged as a perspective that widens our thinking beyond solely human oriented considerations and needs such as animals plants and microbes The book explores the relationship between sustainability and design touching on topics such as AI systems thinking futures studies and pedagogy and discusses a range of case study projects that are grounded in more than human thinking demonstrating how this can be incorporated into practice This easily accessible and theoretically grounded book will provide design researchers and educators an excellent introduction to more than human thinking It will also be of interest to students and scholars studying design more broadly sustainability environmental studies and service design as well as to practicing designers interested in sustainability Chapters Introduction 7 10 and 15 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

**Designing Gender Sensitive Spaces for Consenting Cities** Jess Berry, Nicole Kalms, Timothy Moore, Gene Bawden, 2025-03-18 This edited collection investigates gender sensitive spaces design practices and provocations that challenge the complex social and material structures that shape inequities of access and inclusion in the urban environment Designing Gender Sensitive Spaces for Consenting Cities Practices and Provocations centres intersectional gender sensitive approaches to design in the urban environment as an integral strategy in combating spatial inequities Through an investigation of design led methods project case studies activist interventions and processes of resistance and agency this volume offers new thinking and practical approaches to demonstrate how design might shift towards safer and more inclusive cities for women gender diverse people and LGBTIQ communities This book will appeal to practitioners scholars and students of urbanism design planning architecture and geography as well as government and non profit organisations that are interested in gender and equality and can influence the future narratives of cities

**Trust in Technology: A Socio-Technical Perspective** Karen Clarke, 2006-03-02 This book encapsulates some work done in the DIRC project concerned with trust and responsibility in socio technical systems It brings together a range of disciplinary approaches computer science sociology and software engineering to produce a socio technical systems perspective on the issues surrounding trust in technology in complex settings Computer systems can only bring about their purported benefits if functionality users and usability are central to their design and deployment Thus technology can only be trusted in situ and in everyday use if these issues have been brought to bear on the process of technology design implementation and use The studies detailed in this book analyse the ways in which trust in technology is achieved and or worked around in everyday

situations in a range of settings including hospitals a steelworks a public enquiry the financial services sector and air traffic control Whilst many of the authors here may already be known for their ethnographic work this book moves on from accounts of field studies to show how the DIRC project has utilised the data from these studies in an interdisciplinary fashion involving computer scientists software engineers and psychologists as well as sociologists Chapters draw on the empirical studies but are organised around analytical themes related to trust which are at the heart of the authors socio technical approach which shows the nuanced ways in which technology is used ignored refined and so on in everyday settings
