Individualized Society:

The Individualized Society Zygmunt Bauman, 2013-04-25 We are spurred into action by our troubles and fears but all too often our action fails to address the true causes of our worries When trying to make sense of our lives we tend to blame our own failings and weaknesses for our discomforts and defeats And in doing so we make things worse rather than better Reasonable beings that we are how does this happen and why does it go on happening These are the questions addressed in this new book by Zygmunt Bauman one of the most original and perceptive social thinkers writing today For Bauman the task of sociology is not to censor or correct the stories we tell of our lives but to show that there are more ways in which our life stories can be told By bringing into view the many complex dependencies invisible from the vantage point of private experience sociology can help us to link our individual decisions and actions to the deeper causes of our troubles and fears to the ways we live to the conditions under which we act to the socially drawn limits of our imagination and ambition Sociology can help us to understand the processes that have shaped the society in which we live today a society in which individualization has become our fate And sociology can also help us to see that if our individual but shared anxieties are to be effectively tackled they need to be addressed collectively true to their social not individual nature The Individualized Society will be of great interest to students of sociology politics and the social sciences and humanities generally It will also appeal to a broader range of readers who are interested in the changing nature of our social and political life today *The Individualized Society* Zygmunt Bauman, 2008 *The Individualized Society* Zygmunt Bauman, 2003 **Solidarity in**

Individualized Societies Søren Juul, 2013 In today's individualized culturally diverse and globalized society many sociologists have concluded that the conceptualizations developed by classical sociology are no longer sufficient to promote social cohesion So what kind of solidarity can achieve this Engaging with recent thought in social and political theory and philosophy including Honneth Forst Ricoeur Bauman Sennett Taylor Rawls MacIntyre and many others this book develops a renewed concept of solidarity based on the notion of recognition with regard to others With attention to the implications of such an account for justice and judgement particularly where competing claims for recognition arise Solidarity in Individualized Societies examines what in a society based on recognition a fair distribution of recognition would mean The book provides a critical analysis of trends in modern culture and in the policy on welfare that seem to constitute obstacles to solidarity and social cohesion It is a rigorous examination of forms of solidarity that may sustain social cohesion in the contemporary Western world This book will appeal to scholars and students of sociology social theory politics and philosophy

The Individualizing Society Loek Halman, Peter Ester, Ruud de Moor, 2024-07-15 The European Values Study is a large scale cross national and longitudinal survey research program on basic human values initiated by the European Value Systems Study Group EVSSG in the late 1970s at that time an informal grouping of academics Now it is carried on in the setting of a foundation using the abbreviated name of the group European Values Study EVS The EVSSG aimed at designing

and conducting a major empirical study of the moral and social values underlying European social and political institutions and governing conduct A rich academic literature has now been created around the original survey and numerous other works have made use of the findings **Modern Japanese society / edited by Josef Kreiner, Ulrich Hohwald and Hans Dieter Olschleger.** Josef Kreiner,Ulrich Mèohwald,Hans Dieter Ölschleger,2004 Is Japanese society essentially different from other modern industrialized societies or not This survey work with contributions from the leading scholars in this complicated field presents a full overview of the most important aspects of Japanese society which may lead the reader to find an answer to these two often asked questions Japanese society defined as those institutions shaping the life of individuals and groups as well as being responsible for the dynamics of social development is shown to be as modern as any other industrialized society definitely distinct though are the ways in which institutions are defined and organised as a result of different social and historical roots of the process of modernization *Doping and Public Health* Nader Ahmadi,Arne Ljungqvist,Göran Svedsäter,2016-03-31 Doping the use of performance enhancing substances and methods has long been a high profile issue in sport but in recent years it has also become an issue in wider society This important new book examines doping as a public health issue drawing on a multi disciplinary set of perspectives to explore the prevalence significance and consequences of doping in wider society It introduces the epidemiology of doping examines the historical context and explores the social behavioural legal ethical and political aspects of doping The book also discusses possible interventions for addressing the problem on organisational and societal levels Doping and Public Health incorporates the latest research to provide a comprehensive guide to the key aspects of doping as a social phenomenon Divided into six parts this collection of studies offers detailed insight into ideals of health and fitness in today s society reasons behind the use of doping medical and social consequences of doping the importance of a doping free society challenges to the detection and prevention of doping the global anti doping movement This book is a valuable resource for sport students instructors and sport professionals and will also be of interest to educators and policy makers working in the areas of health criminology sociology and law The Individual After Modernity Mira Marody,2020-10-29 Moving beyond the individualisation paradigm in sociological theory this book develops an approach to the analysis of human activities and the social phenomena produced by them that centres on the processes that generate coordinated behaviours among individuals Emphasising the relational and processual character of social phenomena as well as the importance of a broader cultural and historical context for analysing them the author questions the view of contemporary society that sees individuals acting in a context in which social bonds are dissolving and unveils the rationale hidden behind the chaos of everyday activities Through an analysis of the continued importance of cooperation and the consequent emergence in society of various kinds of communities this volume examines the changing character of social ties An overview of transformation of social bonds and the intensification of mutual influences among individuals as they seek to address social dilemmas in new contexts The Individual after Modernity will appeal to social

scientists with interests in social theory *Legitimization in World Society* Aldo Mascareño, Kathya Araujo, 2016-04-22

Emerging traits of late global modernity such as transnationalism multiculturalism individualization and supranational contexts of action raise the question of what holds society together Responses have typically made reference to legitimization but the modern world presents challenges to such responses for in such a differentiated globalized setting legitimization can no longer appeal to the previous national ideological or religious foundations of early modernity From a variety of theoretical and empirical perspectives this book explores the manner in which legitimization can be constructed by people groups or institutions under the contemporary pressures and possibilities of modern world society Drawing on cosmopolitan theory postcolonial sociology systems theory and historical sociology it engages with questions of human rights processes of individualization and the constitution of transnational spaces in its examination of the challenges to legitimization As such it will be of interest to scholars of sociology political science and social and legal theory concerned with questions of globalization and the problems of social cohesion and legitimacy *Chinese Society on the Eve of Tiananmen* Deborah Davis, Ezra Vogel, 2020-10-26

By the late 1970s state communism was everywhere in retreat First in Eastern Europe then in China and the Soviet Union party leaders were compelled to devise fundamental departures from the economic procedures and structures they had confidently installed at the outset of their revolutionary victories Perhaps no country departed more rapidly from communist economic structures than China Within five years of Mao Zedong's death reformers led by Deng Xiaoping had dismantled the people's communes and created a range of markets that established the institutional foundations for a new form of socialism But unlike the Soviets and Eastern Europeans the Chinese reformers refused to consider parallel changes in political institutions The demonstrations in Beijing in 1989 made it clear that post Mao economic policies had created unavoidable political consequences for the society and its leaders In individual case studies the twelve contributors to this volume document the uneven decollectivization and decentralization of China's economy in the post Mao years and the great diversity of the social and political consequences They deal with the effects of the more materialistic and individualistic reward system on both public and private life in the countryside and in urban settings and the new expectations that economic changes engendered **Advanced Introduction to the Sociology of the Self** Zhao, Shanyang, 2022-07-19

Shanyang Zhao provides a unique examination of this evolving topic with a framework to address the common questions What is self How is self formed and Why does self matter Drawing a fascinating distinction between self and self concept Zhao regards both as part of a larger constellation named the self phenomenon He separates social determinants of self from neurocognitive prerequisites of self Focusing on the social determinants he reviews how social schemas shape self concept through three intertwined mechanisms and how social resources affect self conscious action through social position and social capital **Risk Society** Ulrich Beck, 1992-09-03

An analysis of the condition of Western societies that will take its place as a core text of contemporary sociology alongside earlier typifications of society as

postindustrial and current debates about the social dimensions of the postmodern **Risk Society** Professor Ulrich Beck, 1992-07-01 This panoramic analysis of the condition of Western societies has been hailed as a classic This first English edition has taken its place as a core text of contemporary sociology alongside earlier typifications of society as postindustrial and current debates about the social dimensions of the postmodern Underpinning the analysis is the notion of the risk society The changing nature of society's relation to production and distribution is related to the environmental impact as a totalizing globalizing economy based on scientific and technical knowledge becomes more central to social organization and social conflict

Religion, Discourse, and Society Marcus Moberg, 2021-12-30 This book focuses on the utility and application of discourse theory and discourse analysis in the sociological study of religious change It presents an outline of what a discursive sociology of religion looks like and brings scholarly attention to the role of language and discourse as a significant component in contemporary processes of religious change Marcus Moberg addresses the concept of discourse and its main meta-theoretical underpinnings and discusses the relationship between discourse and religion in light of previous research The chapters explore key notions such as secularism and public religion as well as the ideational and discursive impact of individualism and market society on the contemporary Western religious field In addition to providing scholars with a thorough understanding and appreciation of the analytic utility of discourse theory and analysis in the sociological study of religious change the book offers a cohesive and systematized framework for actual empirical analysis

Inner Experience of the Chinese People Xiaohong Zhou, 2017-10-24 This book comprehensively explores the changes in the Chinese spiritual world from the perspective of transition and transformation Chinese feeling a brand new concept corresponding to Chinese experience refers to the vicissitudes that 1.3 billion Chinese people have been through in their spiritual worlds The book discusses this concept together with Chinese experience two aspects of the transformation of the Chinese mentality that resulted from the unprecedented social changes since 1978 and which have given this unique era historical meaning and cultural values At the same time they offer a dual perspective for understanding this great social transition Further the book considers what will happen if we only focus on the Chinese Experience while neglecting the Chinese Feeling the changes the Chinese people undergo when their desires wishes and personalities have changed China and how their emotionally charged social mentality follow ebbs and flows of the changing society Lastly it asks what embarrassment and frustration the population will be faced with next after the tribulations their spiritual world has already been through

Education for Self-transformation Duck-Joo Kwak, 2011-10-12 Exemplifying what it advocates this book is an innovative attempt to retrieve the essay form from its degenerate condition in academic writing Its purpose is to create pedagogical space in which the inner struggle of lived experience can articulate itself in the first person Working through essays the modern post-secular self can guide, understand and express its own transformation This is not merely a book about writing methods it has a sharp existential edge Beginning by defining key terms such as self-transformation Kwak sketches the contemporary debates

between Jürgen Habermas and Charles Taylor on the status of religious language in the public domain and its relationship to secular language This allows her to contextualize her book's central questions how can philosophical practice reduce the experiential rift between knowledge and wisdom How can the essay form be developed so that it facilitates as praxis pedagogical self transformation Kwak develops her answers by working through ideas of George Lukács and Stanley Cavell of Hans Blumenberg and Søren Kierkegaard whose work is much less familiar in this context than it deserves to be Kwak's work provides templates for new forms of educational writing new approaches to teaching educators and new ways of writing methodology for educational researchers Yet the importance of her ideas extends far beyond teaching academies to classroom teachers curriculum developers and to anyone engaged in the quest to lead a reflective life of one's own

Social Isolation in Modern Society Roelof Hortulanus, Anja Machielse, Ludwien Meeuwesen, 2006-06-28 Social isolation has serious repercussions for people and communities across the globe yet knowledge about this phenomenon has remained rather limited until now The first multidisciplinary study to explore this issue Social Isolation in Modern Society integrates relevant research traditions in the social sciences and brings together sociological theories of social networks and psychological theories of feelings of loneliness Both traditions are embedded in research with the results of a large scale international study being used to describe the extent nature and divergent manifestations of social isolation With a new approach to social inequality this empirically based study includes concrete policy recommendations and presents a clear insight into personal social and socio economic causes and the consequences of social isolation *Post Society* Carlo Bordoni, 2022-07-22 Our societies are in transition spurred on by a pandemic that disrupted many aspects of the social world we once took for granted We've left behind the solid modernity of the twentieth century and even the liquid modernity so brilliantly analysed by Zygmunt Bauman but what kind of society is now taking shape around us In this highly original reflection on the current state of our world Carlo Bordoni argues that we are on the threshold of post society a condition in which social distancing becomes the norm real social relations are diminishing in favour of those mediated by technology existential loneliness is becoming widespread and we find ourselves voluntarily submitting to new forms of surveillance and control in the hope of increasing our security Emotions are increasingly assuming a central role in social life not only because of the growing prevalence of social media which provide platforms for the public expression of emotion but also because emotions have been freed from the repression of emotionality that had characterized modern society While many of these developments are rooted in broader social transformations they were all deepened and accelerated by the pandemic which propelled us headlong into a brave new world where social relations are sustained without physical contact but with intense communication This is the new post social condition more humanity less sociality *The New Individualism* Anthony Elliott, Charles C. Lemert, 2006 This fascinating and easy to read book offers new insights into the interplay between increasing globalization and the rise of the new individualism It will be of interest to everyone concerned with the future of

the public spheres progressive **Civil Society Organizations, Unemployment, and Precarity in Europe** Simone Baglioni, 2014-04-14 This book provides a Europe wide comparative analysis of the role of civil society organizations active in the field of unemployment and precarity It illustrates how crucial civil society organizations are for the inclusion of the young unemployed mainly in two ways by delivering services and by advocating policy
