Wise, V. David Hopkin, Paul Stager, 2013-06-29 Despite its increasing importance the verification and validation of the human machine interface is perhaps the most overlooked aspect of system development Although much has been written about the design and development process very little organized information is available on how to verify and validate highly complex and highly

coupled dynamic systems Inability to evaluate such systems adequately may become the limiting factor in our ability to employ systems that our technology and knowledge allow us to design This volume based on a NATO Advanced Science Institute held in 1992 is designed to provide guidance for the verification and validation of all highly complex and coupled systems Air traffic control is used as an example to ensure that the theory is described in terms that will allow its implementation but the results can be applied to all complex and coupled systems The volume presents the knowledge and theory in a format that will allow readers from a wide variety of backgrounds to apply it to the systems for which they are responsible The emphasis is on domains where significant advances have been made in the methods of identifying potential problems and in new testing methods and tools Also emphasized are techniques to identify the assumptions on which a system is built and to spot their weaknesses

**Soft Computing Applications** Valentina Emilia Balas, Lakhmi C. Jain, Marius Mircea Balas, 2017-08-31 These two volumes constitute the Proceedings of the 7th International

Workshop on Soft Computing Applications SOFA 2016 held on 24-26 August 2016 in Arad, Romania. This edition was organized by Aurel Vlaicu University of Arad, Romania; University of Belgrade, Serbia; in conjunction with the Institute of Computer Science, Iasi Branch of the Romanian Academy; IEEE Romanian Section; Romanian Society of Control Engineering and Technical Informatics; SRAIT Arad; Section General Association of Engineers in Romania; Arad Section and BTM Resources Arad. The soft computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability, robustness and lower costs. Soft computing facilitates the combined use of fuzzy logic, neurocomputing, evolutionary computing and probabilistic computing leading to the concept of hybrid intelligent systems. The rapid emergence of new tools and applications calls for a synergy of scientific and technological disciplines in order to reveal the great potential of soft computing in all domains. The conference papers included in these proceedings published post-conference were grouped into the following areas of research: Methods and Applications in Electrical Engineering; Knowledge Based Technologies for Web Applications; Cloud Computing; Security Algorithms and Computer Networks; Biomedical Applications; Image, Text and Signal Processing; Machine Learning and Applications; Business Process Management; Fuzzy Applications; Theory and Fuzzy Control; Computational Intelligence in Education; Soft Computing; Fuzzy Logic in Biometrics; SCFLB; Soft Computing Algorithms Applied in Economy, Industry and Communication Technology; Modelling and Applications in Textiles. The book helps to disseminate advances in selected active research directions in the field of soft computing along with current issues and applications of related topics. As such, it provides valuable information for professors, researchers and graduate students in the area of soft computing techniques and applications.

### **Dictionary of Acronyms and Technical**

**Abbreviations** Jakob Vlietstra, 2012-12-06. My first encounter with acronyms took place when I was ten years old and growing up in an occupied country during the Second World War. My father proudly announced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the BBC. All acronyms used in this introduction are listed in this dictionary. To me, the meaning of BBC was that we would receive different information about the war than we got from the usual censored broadcasts. There was, of course, the well-known acronym associated with the NT, but at that time I did not realize that it meant more than the postal service. In those years, a deteriorated service. Gradually, the daily use of acronyms grew. Most of the newly acquired three and four letter abbreviations referred to organizations such as the broadcasting corporations in The Netherlands and Belgium and references to countries such as the USA, USSR and UK. When attending high school, the HBS, after the war, my knowledge of acronyms grew slowly. Even during the ten years I spent in the Dutch Merchant Marine, the GHV, the number of acronyms was limited to advanced equipment that eventually became known as RADAR, LORAN and DECCA.
