symposium organised by the Metallurgical Society of the Canadian Institute of Mining and Metallurgy. The aims of the symposium were to discuss fundamental and practical aspects of the technology for the production of fine inorganic particles for the metals, industrial minerals and advanced ceramics sectors; to highlight particle characterization methods and developments; and to review major advances in the processing and extractive metallurgy of finely sized minerals. 96 conference papers by authors from 19 countries addressed such topics as particle morphology and size analysis, physical and chemical methods for producing fine particles, processing of minerals using gravity, magnetic and electrostatic separation.

flotation and flocculation phase separation involving fine particles and the hydrometallurgy and pyroprocessing of fine particles This book will be of interest to mineral processing scientists and engineers ceramicists extractive metallurgists and chemical engineers who are faced with the increasing significance of inorganic fine particles either as valuable products or as materials to be treated in mineral processing systems **Books in Series, 1876-1949** R.R. Matis,2013-03-14 The present book is the outcome of an Advanced Study Institute meeting which was held in Kallithea Chalkidiki in Northern Greece from 12 25 May 1991 and attended by 69 delegates from 18 countries The Institute brought together scientists engineers and technologists currently involved in basic and applied research on the different aspects of flotation The Institute covered subjects in four major areas of flotation a fundamentals b chemical technology aspects c mineral processing and d water and wastewater treatment Apart from the papers reproduced in this volume several short

oral communications were also presented Participants also had the opportunity to visit the Hellenic Chemical Products Fertilizers Co Ltd mixed sulphides plant in Chalkidiki Conference participants whose interest and research projects are in this broad field of science and engineering provided a well informed discussion of the problems encountered as well as possible directions of future technological developments It is hoped that this book is not only a good record of the presentations made formal and informal analyzing the state of the art in flotation but will also be helpful for students scientists and technologists working in the fields of separation processes and in particular mineral processing and wastewater engineering All the invited speakers and the participants made this summer school possible worthwhile and enjoyable The sponsorship by the NATO Scientific Affairs Division is gratefully acknowledged The Editors would like to thank the members of the Organizing Committee Dr B A     **Interfacial Phenomena in Biotechnology and Materials Processing** ,1988     **Bibliographic Guide to Conference Publications** New York Public Library.
