**North Korea's Military Threat** Andrew Scobell, 2007

**Non-Traditional Security Issues in North Korea** Kyung-Ae Park, 2013-07-31 The concept of security has undergone significant change in the past few decades Traditionally thought of in terms of the state centric militarily focused realist discourse the concept of security has been broadened to include a greater number of potential threats and an increased number of relevant actors Yet despite the great changes in security scholarship the vast majority of studies on North Korea continue to focus primarily on the country's nuclear weapons program its military and other traditional security issues surrounding Pyongyang While North Korea captures headlines with its aggressive behavior and growing nuclear arsenal the ground level threats to average everyday North Koreans go largely unnoticed This groundbreaking volume seeks to refocus research on North Korean security from the traditional to largely unexplored non traditional security NTS issues In the wake of political succession to Kim Jung Un the issue of non traditional security is increasingly important From the lasting effects of the famine of the 1990s to continued food shortages and the growing marketization of North Korean society the Pyongyang regime is facing diverse and unprecedented challenges This book offers cutting edge analyses of emerging North Korean NTS issues by the world's leading specialists in the field It looks at these issues and their effects at the local regional and international level as well as examining the international community's efforts to promote an NTS approach to North Korea

More specifically the volume addresses the traditional and non traditional security paradigms energy security gender security transnational organized crime the internal and external dimensions of North Korea s food security the Responsibility to Protect refugee issues and international law and the role of NGOs in promoting NTS in North Korea As the global community begins to move toward a more people centered approach to security and foreign policy work such as that presented in this thought provoking volume will be increasingly vital to scholars policymakers and interested citizens Contributors Tsuneo Akaha Peter Hayes Brendan Howe W Randall Ireson David C Kang Shin wha Lee Mark Manyin Kyung Ae Park Scott Snyder Jae Jung Suh David von Hippel      *Decoding the Chessboard of Asian Geopolitics* Debasish Nandy, Monojit Das, 2025-05-20 This book is part of a two volumes exploration comprising 18 chapters organized into four distinct thematic sections This volume delves into the geopolitical dynamics and power relations in East and Southeast Asia and the Global North It examines the interactions of regional and extra regional powers from both military and soft power perspectives It highlights China s influence in the Indo Pacific region Russia s involvement in Myanmar s political economy and Taiwan s situation It also examines the dynamics of India Taiwan relations and North Korea s foreign policy This book presents interconnected discussions on various themes offering valuable insights for readers It provides useful insights into the role of the Global North from multiple perspectives This will benefit students scholars and academicians from diverse disciplines such as International Relations Foreign Policy Defence and Strategic Studies Political Science Peace and Conflict Studies and Journalism The other volume provides an in depth analysis of the intricate power struggles within this Asian region with a particular focus on India and delves into the power dynamics of Central Asia and West Asia offering a comprehensive examination of the geopolitical and power related issues that shape these regions      *Korean Security in a Changing East Asia* Terence Roehrig, Jungmin Seo, Uk Heo, 2007-08-30 Since its partition in the 1950s the Korean peninsula has directly or indirectly shaped the broader security relations between regional powerhouses and the recent test of a nuclear weapon by the North Korean regime has heightened tensions across the world This study draws upon contributions from a diverse array of experts who offer their perspectives on the region s complex network of alliances and hostilities The authors discuss the future of the region the potential for military conflict and a new arms race and the ways to maintain peace and stability Since its partition in the 1950s the Korean peninsula has directly or indirectly shaped the broader security relations between regional powerhouses while the recent test of a nuclear weapon by the North Korean regime has heightened tensions across the world Japan feeling increasingly threatened by the North Korean regime and China s extravagant military expenditures has begun questioning Article IX in its Constitution that renounces war and the maintenance of armed forces Its neighbors still haunted by Japanese atrocities during World War II are fearful of a new nuclear arms race in the region The United States for its part has adopted unprecedented hard line policies in response to 9 11 going so far as to condemn North Korea as part of an axis of evil It has strengthened its alliance with Japan and alienated

its long time strategic partner South Korea Add to this the economic entanglements of each of these countries both with each other and with the rest of the world and the regional security issues become even more paramount This study makes sense of these complex alliances and frictions and offers an array of perspectives on the future of the region the potential for military conflict and a new arms race and the ways to maintain peace and stability Topics include big power rivalries South Korea s sunshine policy anti Americanism and emerging nationalisms

**Global Rogues and Regional Orders** Il Hyun Cho,2016 Global Rogues and Regional Orders examines the relationship between nuclear proliferation and regional order in East Asia and the Middle East looking at what factors shape the perceptions and responses of relevant regional actors to North Korea and Iran why some of these regional actors cooperate with the United States while others do not and the consequences of shifting relations among these countries

The Korean Paradox Marco Milani,Antonio Fiori,Matteo Dian,2019-05-24 Bringing together an international line up of contributors this book examines South Korea s foreign policy strategies designed to cope with the challenges of the post Cold War regional order and the emergence of a Korean paradox Focusing on non material factors in shaping the decision making processes of primary actors such as traditions beliefs and identities this book begins by analysing the emergence of the Asian Paradox and explores how different political traditions have influenced South Korea s foreign and security policies In the second part from Chapter 4 this book goes on to deal directly with the key issues in South Korea s foreign policy today with an emphasis on the progressive and conservative approaches to the challenges the country faces This includes the North Korean threat the alliance with the U S relations with China and Russia the complicated relationship with Japan and the emerging role of South Korea outside of Northeast Asia An innovative study of the domestic sources of South Korean foreign policy The Korean Paradox investigates South Korea s growing role at both regional and global levels As such it will be useful to students and scholars of Korean Studies International Relations and East Asian Studies more generally

*Asian Rivalries* Sumit Ganguly,William R. Thompson,2011-08-17 The most typical treatment of international relations is to conceive it as a battle between two antagonistic states volleying back and forth In reality interstate relations are often at least two level games in which decision makers operate not only in an international environment but also in a competitive domestic context Given that interstate rivalries are responsible for a disproportionate share of discord in world politics this book sets out to explain just how these two level rivalries really work By reference to specific cases specialists on Asian rivalries examine three related questions what is the mix of internal domestic politics and external interstate politics stimuli in the dynamics of their rivalries in what types of circumstances do domestic politics become the predominant influence on rivalry dynamics when domestic politics become predominant is their effect more likely to lead to the escalation or de escalation of rivalry hostility By pulling together the threads laid out by each contributor the editors create a grounded theory for interstate rivalries that breaks new ground in international relations theory

*Engagement with North Korea* Sung Chull Kim,David C. Kang,2010-07-02 How the world deals with North Korea and its

nuclear capability will have ramifications for both regional and global stability Engagement with North Korea examines the still controversial policy strategy known as engagement which aims to persuade rather than force North Korea to be cooperative While examining the converging and diverging policies of engagement practiced by the United States China Russia Japan and South Korea the contributors to this volume uncover how and to what extent engagement has made some form of progress and under what conditions it is likely to achieve complete success In addition to the critical topic of denuclearization the volume also demonstrates that engagement involves the use of negotiations and incentives in both the economic and the security realms This volume is essential reading for both students and policy makers concerned about denuclearization in the multilateral context
