Intermountain Archaeology:

Intermountain Archaeology David B. Madsen, Michael D. Metcalf, 2000 The papers in this volume reflect a broad topical range how transportation issues associated with the movement of people and goods into and out of upland areas affects the way hunter gatherers behave issues of social identity and group boundaries basic issues of time space systematic in the central Rocky Mountains and the basic topic of food choice and the kinds of resources used by prehistoric peoples in the Intermountain West **Utah Archaeology**, 2003 *The Archaeology of Rock-Art* Christopher Chippindale, Paul S. C.

Taçon, 1998 Pictures painted and carved in caves and on open rock surfaces are amongst our loveliest relics from prehistory This pioneering set of sparkling essays goes beyond guesses as to what the pictures mean instead exploring how we can reliably learn from rock art as a material record of distant times in short rock art as archaeology Sometimes contact period records offer some direct insight about indigenous meaning so we can learn in that informed way More often we have no direct record and instead have to use formal methods to learn from the evidence of the pictures themselves The book's eighteen papers range wide in space and time from the Palaeolithic of Europe to nineteenth century Australia Using varied approaches within the consistent framework of informed and proven methods they make key advances in using the striking and reticent evidence of rock art to archaeological benefit *Archaeology of Prehistoric Native America* Guy E.

Gibbon, 2022-01-26 First published in 1998 Did prehistoric humans walk to North America from Siberia Who were the inhabitants of the spectacular Anasazi cliff dwellings in the Southwest and why did they disappear Native Americans used acorns as a major food source but how did they get rid of the tannic acid which is toxic to humans How does radiocarbon dating work and how accurate is it Written for the informed lay person college level student and professional Archaeology of Prehistoric Native America An Encyclopedia is an important resource for the study of the earliest North Americans including facts theories descriptions and speculations on the ancient nomads and hunter gathers that populated continental North America

The Archaeology of Food and Warfare Amber M. VanDerwarker, Gregory D. Wilson, 2015-08-03 The archaeologies of food and warfare have independently developed over the past several decades This volume aims to provide concrete linkages between these research topics through the examination of case studies worldwide Topics considered within the book include the impacts of warfare on the daily food quest warfare and nutritional health ritual foodways and violence the provisioning of warriors and armies status based changes in diet during times of war logistical constraints on military campaigns and violent competition over subsistence resources The diversity of perspectives included in this volume may be a product of new ways of conceptualizing violence not simply as an isolated component of a society nor as an attribute of a particular societal type but instead as a transformative process that is lived and irrevocably alters social economic and political organization and relationships This book highlights this transformative process by presenting a cross cultural perspective on the connection between war and food through the inclusion of case studies from several continents

to this volume demonstrate the diversity of adaptations to the dynamic and changing environmental and cultural landscapes that occurred between the Pleistocene and early portion of the Holocene. The authors' research areas range from Northern Mexico to Alaska and across the continent to the American Northeast, synthesizing the copious available evidence from well known and recent excavations. With its methodologically and geographically diverse approach, *From the Pleistocene to the Holocene: Human Organization and Cultural Transformations in Prehistoric North America* provides an overview of the present state of knowledge regarding this crucial transformative period in Native North America. It offers a large scale synthesis of human adaptation, reflects the range of ideas and concepts in current archaeological theoretical approaches, and acts as a springboard for future explanations and models of prehistoric change. **The Great Basin** Donald

Grayson, 2011-04-18. Covering a large swath of the American West, the Great Basin, centered in Nevada and including parts of California, Utah, and Oregon, is named for the unusual fact that none of its rivers or streams flow into the sea. This fascinating illustrated journey through deep time is the definitive environmental and human history of this beautiful and little traveled region, home to Death Valley, the Great Salt Lake, Lake Tahoe, and the Bonneville Salt Flats. Donald K. Grayson synthesizes what we now know about the past 25,000 years in the Great Basin: its climate, lakes, glaciers, plants, animals, and peoples, based on information gleaned from the region's exquisite natural archives, in such repositories as lake cores, packrat middens, tree rings, and archaeological sites. A perfect guide for students, scholars, travelers, and general readers alike, the book weaves together history, archaeology, botany, geology, biogeography, and other disciplines into one compelling panorama across a truly unique American landscape. *Clovis Caches* Bruce B. Huckell, J. David Kilby, 2014-05-01. A unique, significant contribution to our maturing studies of the Clovis era.

Gary Haynes, author of *The Early Settlement of North America: The Clovis Era*. The Paleoindian Clovis culture is known for distinctive stone and bone tools, often associated with mammoth and bison remains, dating back some 13,500 years. While the term Clovis is known to every archaeology student, few books have detailed the specifics of Clovis archaeology. This collection of essays investigates caches of Clovis tools, many of which have only recently come to light. These caches are time capsules that allow archaeologists to examine Clovis tools at earlier stages of manufacture than the broken and discarded artifacts typically recovered from other sites. The studies comprising this volume treat methodological and theoretical issues, including the recognition of Clovis caches, Clovis lithic technology, mobility, and land use. **Bryce Canyon National Park** Chris T. Wenker, 2004. **The Mountaineer Site** Brian N. Andrews, David J.

Meltzer, Mark Stiger, 2021-06-07. The Mountaineer Site presents over a decade's worth of archaeological research conducted at Mountaineer, a Paleoindian campsite in Colorado's Upper Gunnison Basin. Mountaineer is one of the very few extensively excavated long-term Folsom occupations, with evidence of built structures. The site provides a rich record of stone tool manufacture and use, as well as architectural features, and offers insight into Folsom period adaptive strategies from a time when the region was still in the grip of a waning Ice Age. Contributors examine data concerning the structures, the duration

and repetition of occupations and the nature of the site's artifact assemblages to offer a valuable new perspective on human activity in the Rocky Mountains in the Late Pleistocene. Chapters survey the history of fieldwork at the site and compare and explain the various excavation procedures used, discuss the geology, taphonomic history, and geochronology of the site, analyze artifacts and other recovered materials, examine architectural elements, and compare the present and past environments of the Upper Gunnison Basin to gain insight into the setting in which Folsom groups were operating and the resources that were available to them. The Folsom archaeological record indicates far greater variability in adaptive behavior than previously recognized in traditional models. The Mountaineer Site shows how accounting for reduced mobility, more generalized subsistence patterns, and variability in tool manufacture and use allows for a richer and more accurate understanding of Folsom lifeways. It will be of great interest to graduate students and archaeologists focusing on Paleoindian archaeology, hunter-gatherer mobility, lithic technological organization, and prehistoric households, as well as prehistorians, anthropologists, and social scientists.

Behavioral Ecology and the Transition to Agriculture Douglas J. Kennett, Bruce Winterhalder, 2006-01-02. For the newcomer to the literature and logic of human behavioral ecology, this book is a flat-out bonanza, entirely accessible, self-critical, largely free of polemic, and above all stimulating beyond measure. It's an extraordinary contribution. Our understanding of the foraging-farming dynamic may just have changed forever.

Lake Bonneville: A Scientific Update Charles G. Oviatt, John F. Shroder, 2016-08-24. Lake Bonneville: A Scientific Update showcases new information and interpretations about this important lake in the North American Great Basin, presenting a relatively complete summary of the evolving scientific ideas about the Pleistocene lake. A comprehensive book on Lake Bonneville has not been published since the masterpiece of G. K. Gilbert in 1890. Because of Gilbert's work, Lake Bonneville has been the starting point for many studies of Quaternary paleolakes in many places throughout the world. Numerous journal articles and a few books on specialized topics related to Lake Bonneville have been published since the late 1800s, but here the editors compile the important data and perspectives of the early 21st century into a book that will be an essential reference for future generations. Scientific research on Lake Bonneville is vibrant today and will continue into the future. Makes the widespread and detailed literature on this well-known Pleistocene body of water accessible. Gives expositions of the many famous and iconic landforms and deposits. Contains over 300 illustrations, most in full color. Contains chapters on many important topics, including stratigraphy, sedimentology, hydrology, geomorphology, geochronology, isostasy, geophysics, geochemistry, vegetation history, pollen, fishes, mammals, mountain glaciation, prehistoric humans, paleoclimate, remote sensing, and geoantiquities in the Bonneville basin.
