## **International Comparison Of Health Care Data Methodology Development And Application:**

**International Comparison of Health Care Data** C.J.P.M. van Mosseveld, P. van Son, 2012-12-06 International cooperation has developed rapidly on a wide range of policy areas in the last decades National governments have learned to look across national borders in order to improve their policy systems as in the case of health care the subject of this book There is a need to compare policy results and therefore international comparison of statistical data is of great importance For decades international organisations like OECD and WHO have collected and distributed statistical information of member states in order to describe developments within these countries However comparability across countries has always been problematic The task of international comparison of statistical data has only reluctantly been adopted due to difficulties caused by differences in definition and methods of data collection In this book a method is presented for the advancement of international comparison of health care Starting points are the determination of the boundaries of national health care systems and the activities that take place within these boundaries This book is meant for all those working in the international health care field or interested in international comparison who want to be aware of the pitfalls of international comparison and who want to learn from the described experiences how to solve problems of comparability **A system of health accounts 2011** World Health Organization, Organisation for Economic Co-operation and Development, European Union, 2022-01-31 **Comparative Studies and the Politics of Modern Medical Care** Theodore R. Marmor, Richard Freeman, Kieke G. H. Okma, 2009-01-01 This text offers an account of health reform struggles in developed democracies It explores the ambitions and realities of health care regulation financing and delivery across countries *A System of Health Accounts* OECD, 2000-05-15 This manual provides a set of comprehensive consistent and flexible accounts to meet the needs of government and private sector analysts and policy makers These accounts constitute a common framework for enhancing the comparability of data over time and across countries **International Labour Documentation** International Labour Organization. Bureau of Library and Information Services, 2000 *Reducing Inequalities in Health* Martijntje Bakker, Johan Mackenbach, 2003-09-02 Socio economic inequalities in health are present to a greater or lesser extent in all European countries and the available data suggests that the health gap is increasing Many studies have been conducted to explain inequalities in health and from them much has been learnt about the different contributory factors However in practice it seems hard to translate the knowledge of causes into effective interventions and policies *Reducing Inequalities in Health a European Perspective* brings together an unrivalled collection of contemporary data on successful policies and interventions compares differences in approach in several European countries includes recent evaluation studies discusses conceptual issues for research provides examples of good and bad practice in Europe draws out the policy and research implications for the future With contributions from leading researchers in 14 different European countries this book provides a comprehensive source of reference for the reader interested in what really works in the field of health promotion and what

sort of policies reduce the health gap      **American Book Publishing Record** R.R. Bowker Company,1978      **Catalog of Publications of the National Center for Health Statistics** National Center for Health Statistics (U.S.),1962      Health planning reports subject index United States. Health Resources Administration,1979      *EUROHIS* A. Nosikov,Claire Gudex,2003 The EUROHIS project has focused on the comparability of health surveys and has uncovered some problems that arise when aiming to compare data from different countries Similar problems of cross cultural comparability also arise when comparing data from other sources such as health registers and are just as complex and difficult to tackle One of the main advantages of health surveys however is the relatively low cost and time involved in adapting them according to the needs of health policy makers This work shows that the output from the EUROHIS project provides common instruments for the measurement of eight health indicators The development of these instruments has required careful consideration of relevant common concepts and how these should be defined and operationalized The instruments are freely available for use by all countries with the aim of enhancing national health information systems and facilitating cross national comparisons of health data      **Current Listing and Topical Index to the Vital and Health Statistics Series** National Center for Health Statistics (U.S.),1962      **Current Listing and Topical Index to the Vital and Health Statistics Series, 1962-1978** National Center for Health Statistics (U.S.),1979      **Primary Health Care around the World** Chris Van Weel,Amanda Howe,2018-10-12 This unique book is the first to bring together primary care experiences from around the world with emphasis on non Western regions Utilising published articles that profile different countries primary health care accompanied by expert commentaries the book consolidates global primary health care information over the past decade Profiling the different countries primary health care systems and their implementation of primary health care policy as promoted by WHO and WONCA the guide provides evidence of how countries and regions can introduce primary health care and family practice to improve their health care infrastructure and delivery The book is essential reading for policy makers health educators and academic leaders in primary care and students of global health and provides useful background for those entering or established in clinical family practice around the world      **Demography: Analysis and Synthesis, Four Volume Set** Graziella Caselli,Jacques Vallin,Guillaume Wunsch,2006-01-03 This four volume collection of over 140 original chapters covers virtually everything of interest to demographers sociologists and others Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives not just facts and equations to be memorized The articles follow a theory methods applications approach and so offer a kind of one stop shop that is well suited for students and professors who need non technical summaries such as political scientists public affairs specialists and others Unlike shorter handbooks *Demography Analysis and Synthesis* offers a long overdue thorough treatment of the field Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of *Demography Analysis and Synthesis* have explored and developed This extended examination of demographic tools not only

seeks to explain the analytical tools themselves but also the relationships between general population dynamics and their natural economic social political and cultural environments Limiting themselves to human populations only the authors and editors cover subjects that range from the core building blocks of population change fertility mortality and migration to the consequences of demographic changes in the biological and health fields population theories and doctrines observation systems and the teaching of demography The international perspectives brought to these subjects is vital for those who want an unbiased rounded overview of these complex multifaceted subjects Topics to be covered Population Dynamics and the Relationship Between Population Growth and Structure The Determinants of Fertility The Determinants of Mortality The Determinants of Migration Historical and Geographical Determinants of Population The Effects of Population on Health Economics Culture and the Environment Population Policies Data Collection Methods and Teaching about Population Studies All chapters share a common format Each chapter features several cross references to other chapters Tables charts and other non text features are widespread Each chapter contains at least 30 bibliographic citations

### **Digital Health**

#### **Applications: Acceptance, Benefit Assessment, and Costs from the Perspective of Patients and Medical**

**Professionals** Tonio Schoenfelder ,Tom Schaal,Anja Mocek,2024-11-12 Digital health applications DHAs are increasingly being used in patient care in various healthcare systems around the world In some countries such as Belgium and Germany legal frameworks already allow for DHA integration into standard care and their prescription and uniform reimbursement via the patient s health insurance In many other European countries and the USA such a process is still in development DHAs are primarily used by patients themselves but also in consultation with physicians therapists or other healthcare providers They offer the potential for improved health outcomes and increased access to health services especially in rural areas and may lead to an overall improvement in the quality of care The validity of studies on the effects of DHAs on patients and health care systems in general is currently limited since study methods applied do often not allow for drawing causal relationships and most studies focus only on patient outcomes but do not assess how traditional care processes need to be adapted so that DHAs can be effective Therefore unambiguous evidence on which patient relevant outcomes can be improved specifically as a result of integrating DHA into the process of care is currently lacking

Status Report ,1992 Diagnosis Related Groups in Europe Merce Casas,Miriam M. Wiley,2012-12-06 When John Thompson and I first began talking about finding a way to measure and cost the output of hospitals in the 1960s we really had no concept of the need for this kind of result In fact if we had listened to others in the health services research community we would rrever have begun or persisted in the task But it seemed important to us to begin to understand what up until then seemed unexplainable the rather strange cost behavior of hospitals We had the benefit of Professor Martin Feld stein s observation that case mix was certainly an important factor but we had literally no guidance on how to make some sense out of the very large number of illnesses that beset the human race and the very large number of different processes that obtain in our hospitals as they attempt to cope

with those illnesses We were fortunate to find a small number of curious and capable graduate students to join us in this effort for without them we would not have had a chance of success While many contributed to the ultimate outcome it is important to single out Ronald E Mills Richard F Averill Youngsoo Shin and Jean L Freeman for their efforts over many years The diagnosis related groups DRGs constitute a way of identifying the normal output of hospitals in a consistent and exhaustive manner

**Race, Ethnicity, Gender and Other Social Characteristics as Factors in Health and Health Care Disparities** Jennie Jacobs Kronenfeld, 2020-09-28 This volume investigates race ethnicity and gender as factors in health and health care Chapters focus on linkages to health disparities among races health experiences for incarcerated women and issues of hospital and health care spending

*Statistical Methods for Healthcare Performance Monitoring* Alex Bottle, Paul Aylin, 2016-08-05 Healthcare is important to everyone yet large variations in its quality have been well documented both between and within many countries With demand and expenditure rising it is more crucial than ever to know how well the healthcare system and all its components from staff member to regional network are performing This requires data which inevitably differ in form and quality It also requires statistical methods the output of which needs to be presented so that it can be understood by whoever needs it to make decisions Statistical Methods for Healthcare Performance Monitoring covers measuring quality types of data risk adjustment defining good and bad performance statistical monitoring presenting the results to different audiences and evaluating the monitoring system itself Using examples from around the world it brings all the issues and perspectives together in a largely non technical way for clinicians managers and methodologists Statistical Methods for Healthcare Performance Monitoring is aimed at statisticians and researchers who need to know how to measure and compare performance health service regulators health service managers with responsibilities for monitoring performance and quality improvement scientists including those involved in clinical audits

*Health Care and Its Financing in the Single European Market* Reiner Leidl, R. Leidl, 1998 Health care and its financing will not be harmonized within the European Union EU Therefore the differences between the health systems of the member states in a Single European Market are gaining in relevance The process of economic integration also affects health This book integrates economics law social political and health sciences in the analysis of health care issues in the EU It covers the development of health systems and policy in the community the markets for pharmaceuticals and for medical devices EU trends in hospital financing issues in the comparison of financing systems especially in the field of private expenditures reforms of health care financing in social security systems and national health services in the EU and cross border health care between EU member states The results feature an up to date overview on the European dimension of health care and its financing The book is relevant to experts in health care organizations policy industry and research
