The Global Environment and International Law Joseph F. C. DiMento, 2010-01-01 2004 A Choice Outstanding Academic Book International law has become the key arena for protecting the global environment Since the 1970s literally hundreds of international treaties protocols conventions and rules under customary law have been enacted to deal with such problems as global warming biodiversity loss and toxic pollution Proponents of the legal approach to environmental protection have already achieved significant successes in such areas as saving endangered species reducing pollution and cleaning up whole regions but skeptics point to ongoing environmental degradation to argue that international law is an ineffective tool for protecting the global environment In this book Joseph DiMento reviews the record of international efforts to use law to make our planet more livable He looks at how law has been used successfully often in highly innovative ways to influence the environmental actions of governments multinational corporations and individuals And he also assesses the failures of international law in order to make policy recommendations that could increase the effectiveness of environmental law He concludes that a supranational model is not the preferred way to influence the actions of sovereign nations and that international environmental law has been and must continue to be a laboratory to test approaches to lawmaking and implementation for the global community

An Ecological Approach to International Law Prue Taylor, 2008-01-28 An Ecological Approach to International Law shows that international environmental law is fundamentally flawed and not equipped to meet global challenges The book examines international legal responses to global climate change by analysing key concepts such as the doctrine of state sovereignty the law on state responsibility environmental rights and common heritage of mankind

Principles of International Environmental Law I Philippe Sands, 1995 This post UNCED account of the frameworks standards and implementation of the international environmental law is intended for undergraduates and academics in the fields of international law politics geography economics and environmental studies It can be used on its own as a reference or course text or in conjunction with its companion collections of documents

[The Legitimacy of International Regimes](#) Helmut Breitmeier, 2016-12-05 How legitimate are outcomes outputs and impacts of global environmental regimes Can non state actors contribute to improve the output and input oriented legitimacy of global environmental governance Helmut Breitmeier responds to these questions balancing the volume with both theoretical and empirical chapters The theoretical and conceptual chapters illustrate the relevance and meaning of legitimacy as well as the impact of non state actors on environmental governance They also describe various methodological issues involved with the coding of 23 environmental regimes The empirical chapters are based on the findings of the International Regimes Database IRD They explore whether problem solving in international regimes is effective and equitable and the influence of a regime's contribution to how states comply with international norms These chapters also analyze whether non state actors can improve the output and input oriented legitimacy of global governance systems

Social and Political Philosophy James P.

Sterba,2002-11-01 Social and Political Philosophy introduces some of the most important topics in contemporary political philosophy and questions whether these can be accommodated within the framework of liberal theory It consists of specially written essays by prominent figures in social and political philosophy Each essay carefully considers both the theoretical and practical problems of a major topic Traditional perspectives are balanced with new challenges Topics include Moral Methodology Libertarianism Socialism Lesbian and Gay Perspectives Feminism Racial and Multicultural Perspectives Rationality Welfare Liberalism Environmentalism Virtue Ethics and Community Just War Theory and Pacifism Civil Disobedience *International Environmental Law* ,2006 *Epistemic Communities, Constructivism, and International Environmental Politics* Peter M. Haas,2015-08-20 Epistemic Communities Constructivism and International Environmental Politics brings together 25 years of publications by Peter M Haas The book examines how the world has changed significantly over the last 100 years discusses the need for new constructivist scholarship to understand the dynamics of world politics and highlights the role played by transnational networks of professional experts in global governance Combining an intellectual history of epistemic communities with theoretical arguments and empirical studies of global environmental conferences as well as international organizations and comparative studies of international environmental regimes this book presents a broad picture of social learning on the global scale In addition to detailing the changes in the international system since the Industrial Revolution Haas discusses the technical nature of global environmental threats Providing a critical reading of discourses about environmental security this book explores governance efforts to deal with global climate change international pollution control stratospheric ozone and European acid rain With a new general introduction and the addition of introductory pieces for each section this collection offers a retrospective overview of the author s work and is essential reading for students and scholars of environmental politics international relations and global politics The Whale Warriors Peter Heller,2008-10-14 For two months journalist Heller was aboard the pirate ship the Farley Mowat as it stalked its prey a Japanese whaling fleet Now Heller chronicles this hair raising journey whose mission was to stop illegal whaling in the stormy remote seas off Antarctica 288 **Environmental Regulation of Oil and Gas** Zhiguo Gao,Chih-Kuo Kao,1998-09-10 This book contains in depth articles written by scholars international lawyers and practitioners from around the world It deals with the environmental aspect of the hydrocarbon cycle in general and oil and gas exploration and production in particular Its main thrust is management of environmental legal risks and issues in upstream operations Asia's Clean Revolution David Angel,Michal Rock,2017-09-20 The world s environmental future will be determined in significant part by what happens in the rapidly industrialising and urban economies of Asia The sheer scale of urban population and industrial growth in Asia from Indonesia to China and the energy and materials intensive character of the development process constitutes a dark shadow over the region s and indeed the world s environment And yet this challenge is also an opportunity Precisely because so much of the urban industrial investment within developing Asia has yet to take

place the opportunity exists to shape a different development future one that is far less energy materials and waste intensive Asia's Clean Revolution examines the prospects for and pathways to such a new trajectory The book lays out a path breaking vision of how developing economies might go beyond environmental regulation and put in place an array of policies and institutions that could integrate environmental industrial and technological goals These findings provide important input for negotiators considering climate change on a global scale The book approaches the challenge of growth and environment in Asia in a novel way by identifying six major transformational dynamics under way in the world today and assessing whether these can be harnessed to the goal of improved environmental performance of industry With a set of specially commissioned chapters from the leading authorities in North America and Asia this ground breaking book is the first to present concrete policy solutions to the looming crisis driven by large scale urban industrial growth in developing Asia

Economic Dimensions in International Law Jagdeep S. Bhandari, Alan O. Sykes, 1997 Each of the chapters was presented at a conference in the spring of 1995 sponsored by Duquesne University and George Mason University Pref
