International Organization as Technocratic Utopia Jens Steffek, 2021 This volume examines the development of the idea of technocratic internationalism the promotion of the involvement of experts in the workings of international relations especially in international organizations such as the United Nations and European Union Comparative Approaches to Old and New Institutional Economics Akansel, Ilkben, 2019-10-18 As today's world develops and evolves so does its economics New economic approaches have begun to emerge but traditional methods are still being implemented As both systems provide different solutions to society's economic issues thoughtful research and analysis is required regarding the tactics and strategies that both theories utilize Comparative Approaches to Old and New Institutional Economics is an essential reference source that discusses the sequential history of these two economic theories as well as their application to global fiscal disputes Featuring research on topics such as international relations business management and institutionalism this book is ideally designed for economists analysts managers researchers practitioners academicians and students seeking coverage on the parallel methods of these economic philosophies *Human Development and Global Institutions* Richard

Ponzio, Arunabha Ghosh, 2016-02-05 This book provides a timely and accessible introduction to the foundational ideas associated with the human development school of thought. It examines its conceptual evolution during the post colonial era and discusses how various institutions of the UN system have tried to engage with this issue both in terms of intellectual and technical advance and operationally. Showing that human development has had a profound impact on shaping the policy agenda and programming priorities of global institutions, it argues that human development has helped to preserve the continued vitality of major multilateral development programs, funds and agencies. It also details how human development faces new risks and threats caused by political, economic, social and environmental forces which are highlighted in a series of engaging case studies on trade, water, energy, the environment, democracy, human rights and peacebuilding. The book also makes the case for why human development remains relevant in an increasingly globalized world while asking whether global institutions will be able to sustain political and moral support from their member states and powerful non state actors. It argues that fresh new perspectives on human development are now urgently needed to fill critical gaps across borders and entire regions. A positive forward looking agenda for the future of global governance would have to engage with new issues such as the Sustainable Development Goals, energy transitions, resource scarcity and expansion of democratic governance within and between nations. Redefining the overall nature and specific characteristics of what constitutes human progress in an increasingly integrated and interdependent world, this book serves as a primer for scholars and graduate students of international relations and development. It is also relevant to scholars of economics, political science, history, sociology and women's studies.
