*Marine Environment Protection and Biodiversity Conservation* Julian Roberts, 2006-11-23 Despite the potential benefits that PSSA designation can deliver recent practice both within the IMO and by individual member States has considerably undermined confidence in this emerging concept The focus of this book is on the events within the IMO that have led to this lack of confidence arising In doing so this book presents an examination of coastal State practice with the PSSA concept In undertaking this analysis the research provides evidence of the value of the PSSA concept but also demonstrates its limitations In this regard the book presents a reality check which seeks to rationalise some of the heightened expectations with the concept that are apparent in the current debate The research argues that States may seek to designate PSSAs more for their iconic status than for any demonstrable environmental benefits that may be realised

Weidemann,2014-04-09 The Arctic is particularly affected by climate change over the past few decades temperatures in this area have risen twice as fast as the mean global rate The most prominent effect of global climate change in the region is the melting sea ice in the Arctic Ocean which enables a multitude of ocean uses to be initiated and extended such as shipping fishing and oil and gas extraction Unlike in the Antarctic there is currently no single comprehensive legal regime for governance of the Arctic Instead the region is regulated by a patchwork of international treaties above all the United Nations Convention on the Law of the Sea UNCLOS various regional and sub regional agreements national laws and soft law agreements This treatise provides an evaluation of the governance regime that regulates the use of the Arctic marine environment and its readiness to protect these fragile ecosystems in light of the consequences of climate change

**Transboundary Marine Spatial Planning and International Law** Daud Hassan, Tuomas Kuokkanen, Niko Soininen, 2015-07-16 Marine Spatial Planning MSP is an integrated and comprehensive approach to ocean governance and is used to establish a rational use of marine space and reconcile conflicting interests of its users MSP allows both a high level of environmental protection and a wide range of human activities and emphasizes coordinated networks of national regional and global institutions This book focuses on the framework of international law behind MSP and especially on the transboundary aspects of MSP It first sets out a general framework for transboundary MSP and then moves on to compare and assess differences and similarities between different regions Specific detailed case studies include the EU with the focus on the Baltic Sea and North Sea the Bay of Bengal and Great Barrier Reef in Australia The authors examine the national and regional significance of MSP from an integrated and sustainable ocean governance point of view They also show how transboundary MSP can create opportunities and positive initiatives for cross border cooperation and contribute to the effective protection of the regional marine environment

**Human Rights and Ocean Governance** Mara Ntona, 2023-12-12 This book argues for the utility of human rights in the practice of ocean governance Maritime spatial planning MSP has become the dominant marine management paradigm with MSP frameworks already at various stages of elaboration and implementation in more than half of all coastal states However as experience with MSP accrues a central systemic shortcoming has become apparent insofar as the normative frameworks that underpin MSP tend to be grounded in a rationalistic and economistic worldview The result is a post political neoliberal approach to the implementation of MSP which favours technocratic fixes to complex societal problems over efforts to address underlying issues of power and inequality Building upon the new field of critical MSP studies this book offers a much neglected legal contribution More specifically it analyses the extent to which law and particularly human rights law can be utilised to meaningfully challenge the unjust patterns of human ocean interaction that MSP preserves or creates and so provide a vehicle for the formulation and realisation of transformative blue futures The book looks to human rights as norms that are uniquely capable of bringing into relief the values cause and effect relationships and uncertainties that prevailing capitalist industrial framings of the ocean tend to downplay or worse disregard And so from a more pragmatic viewpoint the book argues that the policy and advocacy tools associated with human rights can be used within MSP processes to foster patterns of human ocean interaction which are more conducive to social and environmental justice This book will be of interest to legal and planning scholars geographers and others concerned with ocean governance and the blue turn in the social sciences and humanities more generally

*Coastal Governance* Richard Burroughs, 2011 Coastal Governance provides a clear overview of how U S coasts are currently managed and explores new approaches that could make our shores healthier Drawing on recent national assessments Professor Richard Burroughs explains why traditional management techniques have ultimately proved

inadequate leading to polluted waters declining fisheries and damaged habitat He then introduces students to governance frameworks that seek to address these shortcomings by considering natural and human systems holistically The book familiarizes students not only with current management techniques but with the policy process By focusing on policy development Coastal Governance prepares readers with the knowledge to participate effectively in a governance system that is constantly evolving This understanding will be critical as students become managers policymakers and citizens who shape the future of the coasts      *International Courts and Environmental Protection* Tim Stephens, 2009-02-12 A comprehensive examination of international environmental litigation which addresses the major environmental challenges of the twenty first century
