**Dark** Tim Edensor, 2017-03-21 Light pervades the world and when it is not light darkness emerges and is combated by electric illumination Despite this globally shared human experience in which spaces appear radically different depending on time season and weather social science investigation on the subject is meager From Light to Dark fills this gap focusing on our interaction with daylight illumination and darkness Tim Edensor begins by examining the effects of daylight on our perception of landscape drawing on artworks particular landscapes and architectural practice He then considers the ways in which illumination is often contested and can be used to express power looking at how capitalist class ethnic military and state power use lighting to reinforce their authority over space Edensor also considers light artists such as Olafur Eliasson and festivals of illumination before turning a critical eye to the supposedly dangerous sinister associations of darkness In examining the modern city as a space of fantasy through electric illumination he studies how we are seeking and should seek new forms of darkness in reaction to the perpetual glow of urban lighting Highly original and absorbingly written From Light to Dark analyzes a vast array of artistic interventions diverse spaces and lighting technologies to explore these most basic human experiences

**Streams of Light from a Heart Broken** Julie Grant, 2022-03-27 After Julie Grant s husband John died abruptly she

found herself in that allegorical valley and discovered her faith was the only source of light that could pierce the darkness In Streams of Light from a Heart Broken she narrates the story of her journey Throughout this devotional Grant acknowledges that grief is hard There is absolutely no part of grieving that is remotely pleasant It is not a systematic box ticking list of emotions you proceed through to completion Grieving like living is a process determined by the choices you make on the journey and there are always choices Streams of Light from a Heart Broken addresses the questions Where do you turn when the darkness overwhelms Who do you turn to How do you extend grace when words meant for comfort leave you deeply wounded Is forward momentum even possible Through her experiences Grant hopes her words encourage others as they seek the brightest light in their darkest night

**Cosmology of Light** Pravir Malik, 2018-02-14 This book is about Light It is a story of Light from an apparent beginning to the present and then also a story of that condition that transcends Time and is hence beginning less But it is more too It is a book about the central place of Light in all things Being so it is a cosmology it suggests a nature of the universe in which all that is is of Light Hence this book describes a Cosmology of Light But the medium chosen to express this nature is mathematics Specifically as will be discovered there is a particular symmetrical function based mathematics that is formulated to express the nature of cosmos The starting point is Light itself and all that is seen to exist is as a play of Light Hence Light is presumed to exist in some native state characterized by an infinite speed It chooses or experiments to project its fundamental nature at some reduced speed that is experienced as  $c$  186 000 miles per second in vacuum that has a profound effect on the experienced nature of reality This projection precipitates a Big Bang A mathematical state in which quanta becomes a door way to multiple layers of Light

comes into existence at that moment and is captured by a seed equation that is positioned as being always fully present in any and everything Hence all of Light conspires to create anything and everything no matter how different from Light it may seem Hence there is a fundamental symmetry to everything no matter how different it may appear in form The seed equation is structured by a four foldness anchored on implicit properties in Light This four foldness is the cornerstone of the constructed function based mathematics This equation referred to as the Light Space Time Emergence equation contains all possibility and will indicate how all layers of known existence have emerged The same equation essentially being used for anything in existence points to the fundamental mathematical symmetry of all things Hence from an initial fourfold space time energy gravity expression through the electromagnetic field quantum particles atoms cells and then human attributes and dynamics to complex organizations and countries culminating in a possible sustainable global civilization the relationship of all things to this underlying seed equation and all things as the seed equation will be emphasized But it will also be seen that Love is the compelling dynamic of projected four foldness and appears to be the magician that causes the separated fourfold powers in Light to reintegrate to make materially real the compelling nature of oneness that Light and all its creatures in reality are In the scheme of things the human placed at the middle of sixty orders of cosmic magnitude ranging from the minute Planck length to astronomical gigaparsecs appears to have a critical role in the continuing unfolding of the Cosmos It is only by transcending smallness and becoming one with the magician to so enter into the very dynamic of Love that the universe can continue on its ever complexifying ever more beautiful journey of increasing functional richness It is only if humans so unite with the secret of Light that truer individuality truer knowledge truer power can emerge and the very material process of space time energy gravity quantization can be activated to create foundations of super matter that in the scheme of things is the compelling crystallization of the infinity in Light reformulating micro and macro orders of magnitude to change the nature of Cosmos

*Arians and Vandals of the 4th-6th Centuries* John R. C. Martyn, David O'Brien, 2020-12-15

As a background to this study of the Arians and Vandals in North Africa and their impact on the Catholic Church three books have been written recently by John Martyn investigating the same period late sixth century and the same country They are firstly Pope Gregory's Letters published with commentary and translation by P I M S three vols 2 2004 see introduction pp 32 42 and epp 1 74 2 36 and 11 7 and for the Manichean heresy see epp 2 31 5 7 and 6 14 Next the Life of Saint Gregory bishop of Agrigento published with his commentary and translation by Edwin Mellen 2004 is set in North Africa in chapters 7 30 and also covers the main schisms of that time Finally in a book on Saint Leander Archbishop of Seville soon to be published by Lexington Books in Maryland he shows that Leander's parents and baby sister were forced to flee from their home in Cartagena to Carthage from where the Vandals had recently been expelled Note also his review of *L'Afrique Vandale et Byzantine* Ie Partie Paris 2002 which was published in *Parergon* 21 1 2004 pp 155 157 and involved a study of the same schisms history and archaeology of North Africa

Herrstrom,2017-09-26 This book is an interdisciplinary synthesis and interpretation about the experience of light as revealed in a wide range of art and literature from Paleolithic to Roman times Humanistic in spirit and in its handling of facts it marshals a substantial body of scholarship to develop an explication of light as a central even dramatic reality of human existence and experience in diverse cultural settings David S Herrstrom underscores our intimacy with light not only its constant presence in our life but its insinuating character Focusing on our encounters with light and ways of making sense of these this book is concerned with the personal and cultural impact of light exploring our resistance to and acceptance of light Its approach is unique The book s true subject is the individual s relationship with light rather than the investigation of light s essential nature It tells the story of light seducing individuals down through the ages Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions to it as reflected in art Paleolithic through Roman architecture Egyptian Grecian Roman mythology and religion Paleolithic Egyptian and literature e g Akhenaten Plato Aeschylus Lucretius John the Evangelist Plotinus and Augustine This book celebrates the complexity of our relation to light s character No individual experience of light is truer than any other none improves on any previous experience of light s tidal pull on us And the wondrous variety of these encounters has yielded a richly layered tapestry of human experience By its broad scope and interdisciplinary approach this pioneering book is without precedent
