Light Looking At Itself:

The Unknown God Deirdre Carabine, 2015-01-26 This book contains a careful thorough and where necessary skeptical as regards doubtful evidence especially in the case of Plato and the Old Academy of the beginnings in European thought of the negative or apophatic way of thinking and its relations to more positive or kataphatic ways of thinking about God One of its greatest strengths perhaps the greatest is that the author makes clear that none of the persons concerned Hellenic Jewish or Christian was engaged in the pursuit of a philosophical abstraction or the heaping of rhetorical superlatives on God They were rather concerned to present the origin of the universe as an intimately present living reality which infinitely transcends our thought and speech This combined with careful attention to the varieties of negative theology and its relations with positive and the particular difficulties experienced by the members of the various traditions involved makes the book the best introduction to the negative theology available A H Armstrong Emeritus Professor of Greek University of Liverpool England Emeritus Professor of Classics Dalhousie University Halifax Nova Scotia Canada Senior Fellow of the British Academy Irish academic Deirdre Carabine has lived and taught in Uganda for more than twenty years She has recently been founder Vice Chancellor at the Virtual University of Uganda VUU the first fully online university in Sub Saharan Africa Prior to that she set up International Health Sciences University in Kampala She has taught at Queen s Belfast University College Dublin and Uganda Martyrs University Currently she is Director of Programmes at VUU She attended the Queen s University of Belfast where she graduated with a PhD in philosophy and University College Dublin where as one of the first Newman Scholars she gained a second PhD in Classics She is also author of John Scottus Eriugena in the Great Medieval Thinkers Series 2000

Subjectivity Willem van Reijen, Willem G. Weststeijn, 2000 Subjectivity is one of the central issues of twentieth century philosophy literature and art Modernism which discovered the subconscious put an end to the belief in the Cartesian Subject as the autonomous centre of knowledge and self consciousness Instead the subject became something uncontrollable unreliable incomplete and fragmentary The attempts to recapture the unity of the subject led to the existential quest and the flight into ideology nazism communism Postmodernism the cultural movement of the second half of the twentieth century did not consider the subject any longer as an important category Attention was focused on the I and the Other on dialogism and polyphonism Bakhtin Ideology lost its appeal and so did the great stories Lyotard In this issue of Avant Garde Critical Studies the problem of subjectivity in twentieth century culture is discussed from various angles by specialists in the field of philosophy literature film music and dance *The Art of Light on Stage* Yaron Abulafia, 2015-07-16 The Art of Light on Stage is the first history of theatre lighting design to bring the story right up to date In this extraordinary volume award winning designer Yaron Abulafia explores the poetics of light charting the evolution of lighting design against the background of contemporary performance The book looks at the material and the conceptual the technological and the transcendental Never before has theatre design been so vividly and excitingly illuminated The book examines the evolution of lighting design

in contemporary theatre through an exploration of two fundamental issues 1 What gave rise to the new directions in lighting design in contemporary theatre 2 How can these new directions be viewed within the context of lighting design history The study then focuses on the phenomenological and semiotic aspects of the medium for light the role of light as a performer as the medium of visual perception and as a stimulus for imaginative representations in selected contemporary theatre productions by Robert Wilson Romeo Castellucci Heiner Goebbels Jossi Wieler and David Zinder This ground breaking book will be required reading for anyone concerned with the future of performance **Catching the Light** Arthur Zajonc,1995

Examination of the fundamental nature of light in mankind s history world and life **Śikṣā Samuccaya** Cecil Bendall,William Henry Denham Rouse,1971 This is the first Indian edition of the English translation of Siksasamuccaya a Mahayana Buddhist treatise edited by Dr Bendall from a single Nepalese manuscript for the Russian Bibliotheca Buddhica The book is a compendium of Buddhist doctrine preserved in the schools of the great Vehicle Mahayana It presents as its subject matter the code of righteous conduct for the enlightenment of the aspirant The translation is authentic and authoritative The book is interesting and instructive There is also an alphabetical index of quoted works and a general index

The Self-evolving Cosmos Steven M. Rosen,2008 This unique book offers an original way of thinking about two of the most significant problems confronting modern theoretical physics the unification of the forces of nature and the evolution of the universe In bringing out the inadequacies of the prevailing approach to these questions the author demonstrates the need for more than just a new theory The meanings of space and time themselves must be radically rethought which requires a whole new philosophical foundation To this end the book turns to the phenomenological writings of Maurice Merleau Ponty and Martin Heidegger Their insights into space and time bring the natural world to life in a manner well suited to the dynamic phenomena of contemporary physics In aligning continental thought with problems in physics and cosmology the book makes use of topology Phenomenological intuitions about space and time are systematically fleshed out via an unconventional and innovative approach to this qualitative branch of mathematics The author s pioneering work in topological phenomenology is applied to such topics as quantum gravity cosmogony symmetry spin vorticity dimension theory Kaluza Klein and string theories fermion boson interrelatedness hypernumbers and the mind matter interface Sample Chapter s Chapter 1 Introduction Individuation and the Quest for Unity 77 KB Contents Introduction Individuation and the Quest for Unity The Obstacle to Unification in Modern Physics The Phenomenological Challenge to the Classical Formula Topological Phenomenology The Dimensional Family of Topological Spinors Basic Principles of Dimensional Transformation Waves Carrying Waves The Co Evolution of Lifeworlds The Forces of Nature Cosmogony Symmetry and Phenomenological Intuition The Self Evolving Cosmos The Psychophysics of Cosmogony Readership Philosophically oriented readers drawn to current developments in physics and cosmology For academics and scientists dealing with the foundations of physics the philosophy of science in general and or contemporary phenomenological thought *Genesis* Rudolf Steiner,2013-09-10 How

was the world created Battle lines are currently drawn between two dogmatic camps the fundamentalist Creationists who believe that creation took place in six days and the scientific reductionists who expound theories of big bangs and so on From a direct spiritual perception of the facts Rudolf Steiner presents a new perspective which transcends these bipolar arguments He affirms that clairvoyant research accords with the biblical descriptions but he emphasizes that the text of Genesis has to be interpreted in a special way In this extraordinary document Steiner speaks of the six days of creation as a reawakening of the previous phases of the Earth s development He describes the work of mighty spiritual entities called the Elohim and how they co operated with other spiritual hierarchies in the creation of Earth He also clarifies the relationship of the Elohim and the biblical Jehovah In addition Steiner discusses themes of light and darkness the meaning of Adam and Eve the day of rest on the seventh day the stages of human development on Earth and the special character of the Hebrew language Also featured in this new edition is a previously unpublished introductory lecture on the meaning of mystery drama [Crafting the Natural Light Look](#) Sandra Coan,2020-01-31 Learn to use a one light approach for recreating the look of beautiful natural window light for portraiture At its best natural light is magical for portraiture The quality of natural light streaming through a window can be extraordinary gorgeous wrapping light that flatters your subject and can be used to create multiple looks For years photographer Sandra Coan exclusively used natural light in her portraiture work And while the results could be magnificent she also learned that she could not rely on it to build a business and create consistently great photographs That s because natural light is frustratingly unpredictable sometimes it rains sometimes the light is too harsh when your clients are available and sometimes depending on the time of year it s just too dark In order to grow her business with dependably great results and a high level of professionalism Sandra finally decided to tackle artificial light She spent years honing her ability to use artificial light to recreate the look of beautiful natural light And now with a simple one light approach she produces natural light whenever and wherever she likes creating great portraits in any situation at any time of day or night It s an approach that has led to a successful career spanning two decades and a signature look to her work Here in [Crafting the Natural Light Look](#) Sandra shares her knowledge and techniques so that you too can learn to quickly and dependably create the look of natural light in your own portraiture Unlike other books that address artificial light Sandra s tone is conversational and easygoing and she does not cover everything there is to know about artificial light In fact there are no two or three light setups here Instead Sandra s method is straightforward and easily actionable She covers The key characteristics of light intensity distance direction Equipment strobes flashes light meters triggers receivers modifiers reflectors and light stands including what she uses and what she recommends if starting out on a budget Shutter speed and its relationship with artificial light Where to position the light and the subject for consistent flattering results Creating four lighting patterns and looks with one setup flat light loop light side light and backlight Using a light meter to determine the perfect flash power whether you shoot film or digital Working with individuals families and groups The role of shadows in its

contribution to the drama and mood of a portrait Common mistakes and how to avoid them What she does in post production very little Finally in a series of case studies she brings it all together and shares her thought process as she works through a number of real world portrait shoots from start to finish If you re a natural light photographer who s been either struggling with flash or reluctant to learn it at all Crafting the Natural Light Look is exactly the book you need to improve the quality and consistency of your portraiture **Who, in Fact, You Really Are** Cosmic Awareness,2008-10-28 Ever wonder about the meaning of life Why we re here What the Universe is all about The force that expressed itself through Jesus Buddha Krishna Mohammed Edgar Cayce and other great avatars who served as channels for what is commonly referred to as God communicates again today as the world begins to enter a period of Spiritual Ascension with a new consciousness and awareness This force which refers to itself as Cosmic Awareness has dictated this book as a set of 144 carefully structured lessons that took over 10 years to create They are designed to lead you step by step from where you are to where you want to be This amazing information begins with Cosmic Awareness explaining what It is how the Universe was created and leads you through birth childhood adulthood magic sex death and far beyond into other dimensions explaining all of the mysterious Secrets of the Universe that everyone is looking for the absolute answer of Who In Fact You Really Are

Postphenomenology and Technologies within Educational Settings Markus Bohlmann,Patrizia Breil,2024-12-20 Technologies such as tablets plagiarism software and learning videos are now an important part of teaching and learning around the world The underlying human technology relations that shape modern educational settings have a decisive influence on what education is and will be in the future This volume applies the analytical tools of postphenomenology to the context of education In three sections the contributors present empirical evidence on the use of technology in schools show conceptual convergences with current theories relevant to education and training and challenge and reframe the technologically situated subject as the goal of education in relation to technology This collection edited by Markus Bohlmann and Patrizia Breil opens up the research field of postphenomenology to the broad field of educational technologies Postphenomenology and Technologies Within Educational Settings extends the scope of the philosophy of technology and further expands its repertoire of theories and analytical tools **Why black people aren't black: an essay on social hermeneutics and apperception** Kristoffer Ehrnstrom,2023-05-22 Does black as a social signifier pregnant with history really mean what it is thought to mean Does white as the symmetrical object of black really refer to its current form Or do these apperceptive objects these epithets draw energy from somewhere else a past veiled by current discourse When we reveal historical figures in what is supposed to be an idiosyncratic context in Europe for example and refer to them simply as black due to their hue are we really putting words in their mouths colonizing the past anachronistically implanting memories Did the whiteness and blackness of the past really transcend physical appearance How did the original white and black actually look Is the current culture of equity for example actors portraying historical figures based on the premise that their

physical appearance wasn't present really a revisionist act through replacement by representation the replacement of the one representing themselves by themselves unknowingly Is history simply being replaced by a new social interpretation looking as it were Lastly is the emergence of afrocentric interpretation nothing more than the completion of a revisionist ritual erasing changed white culture inherently brown skinned to begin with These are some of the questions this essay tries to answer hermeneutically touching down in everything from metaphysics to sociology to religion all the way from ancient Egypt Kemet to Israel to medieval Europe and contemporary discourse
