Light Revealing Architecture:

Light Revealing Architecture Marietta S. Millet, 1996 In this groundbreaking book Millet bridges gaps that currently exist between how architecture is taught in schools and what methods are practiced in the profession She deftly examines the relationships among qualitative and quantitative aspects of lighting the complementary use of daylighting and electric lighting and poetic and practical approaches to lighting The Architecture of Light Mr. Rohit Manglik, 2024-02-24 Lighting design in architecture is covered Guides students to analyze light effects fostering expertise in architectural lighting through practical projects and theoretical study Light in Engineering, Architecture and the Environment Konrad Domke, C. A. Brebbia, 2011 The Wessex Institute of Technology has for years been convening conferences on sustainable architecture and planning design in nature heritage architecture and environmental health With the growing importance of lighting in the creation of better healthier environments the enhancement of heritage architecture and the recovery of urban areas as well as new developments in more sustainable lighting it became clear that a conference focusing on lighting issues would be useful This book contains the papers to be presented at the first International Conference on Lighting in Engineering Architecture and the Environment discussing the latest developments in a variety of topics related to light and illumination from its engineering aspects to its use in art and architecture and the effect of light on living systems and human health Ranging from discussions of technical issues regarding equipment design and light measurement to human perception of light and the effect of light on human health the book will be of interest to architectures planners environmental health experts and stage designers in academia industry and government as well as colleagues discussing the latest developments in a variety of topics related to light and illumination from its engineering aspects to its use in art and architecture and the effect of light on living systems and human health **Structure As Architecture** Andrew Charleson, 2014-07-11 Structure as Architecture presents a comprehensive analysis of the indispensable role of structure in architecture An exploration as well as a celebration of structure the book draws on a series of design studies and case study examples to illustrate how structure can be employed to realize a wide range of concepts in contemporary architecture By examining design principles that relate to both architecture and structural engineering Andrew Charleson provides new insights into the relationship between both the technical and aesthetic aspects of architecture Now in its second edition the text has been extensively revised and updated throughout Features include A brand new chapter on hidden structure adding to the material on exposed structures Two new chapters on using structure to realise common architectural concepts through a combination of precedents and creative design Over 50 new case studies from across the globe Easy to understand diagrams and a highly visual design to aid understanding and accessibility More than two hundred case studies of contemporary buildings from countries such as the UK the US France Germany Spain Hong Kong Australia and Japan illustrate how a thorough integration of structure adds layers of richness and enhances the realisation of architectural design concepts **Architectural Lighting**

Hervé Descottes, Cecilia E. Ramos, 2013-07-02 Architectural Lighting the latest addition to the Architecture Briefs series provides both a critical approach to and a conceptual framework for understanding the application of lighting in the built environment The key considerations of lighting design are illuminated through accessible texts and instructional diagrams Six built projects provide readers with concrete examples of the ways in which these principles are applied Short essays by architect Steven Holl artist Sylvain Dubuisson and landscape architect James Corner explore the role of lighting in defining **Sensory Design** Joy Monice Malnar, 2004 Malnar architecture U of Illinois Urbana Champaign and Vodvarka fine arts Loyala U Chicago explore the nature of sensory response to the spatial constructs that people invest with meaning ranging from buildings of various sorts and purposes to gardens to constructions of fantasy These responses can serve as a typology for the design of si Luminous Concepts Through Design Iterations Kevin Schaffner, 2011-05-18 Concepts of Light through Design Iterations looks to redefine the way in which architects and designers consider the luminous environment within the design process Through the implementation of iterative design strategies this methodology hopes to encourage a constant link between architectural design process and the potential power of the luminous environment The Elements of Architecture Scott Drake, 2014-02-04 The Elements of Architecture is a clear and well structured introduction to sustainable architecture which concentrates on general principles to make an accessible and comprehensive primer for undergraduate students. The author takes a fresh and logical approach focusing on the way aspects of the built environment are experienced by the occupants and how that experience is interpreted in architectural design He works through basic elements and senses sun heat light sound air water and fire to explain and frame effective environmental architectural design not only arguing that the buildings we inhabit should be viewed as extensions of our bodies that interact with and protect us from these elements but also using this analogy to explain complex ideas in an accessible manner Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries Annual Dynamics of Daylight Variability and Contrast Siobhan Rockcastle, Marilyne Andersen, 2013-06-25 Daylight is a dynamic source of illumination in architectural space creating diverse and ephemeral configurations of light and shadow within the built environment Perceptual qualities of daylight such as contrast and temporal variability are essential to our understanding of both material and visual effects in architecture Although spatial contrast and light variability are fundamental to the visual experience of architecture architects still rely

primarily on intuition to evaluate their designs because there are few metrics that address these factors Through an analysis of contemporary architecture this work develops a new typological language that categorizes architectural space in terms of contrast and temporal variation This research proposes a new family of metrics that quantify the magnitude of contrast based visual effects and time based variation within daylit space through the use of time segmented daylight renderings to provide a more holistic analysis of daylight performance **Creating Sensory Spaces** Barbara Erwine, 2016-12-19 Creating Sensory Spaces celebrates spaces enlivened with sensual richness and provides you with the knowledge and tools necessary to create them Drawing on numerous built case studies in ten countries and illustrated with over 85 full color images the book presents a new framework for the design of sensory spaces including light color temperature smell sound and touch Bridging across disciplines of architecture engineering phenomenology and perceptual psychology this book informs the design of buildings and neighborhoods that reclaim the role of the body and all the senses in creating memorable experiences of place and belonging **Integral Sustainable Design** Mark DeKay, 2012-08-21 This book offers practical and theoretical tools for more effective sustainable design solutions and for communicating sustainable design ideas to today s diverse stakeholders It uses Integral Theory to make sense of the many competing ideas in this area and offers a powerful conceptual framework for sustainable designers through the four main perspectives of Behaviours Systems Experiences and Cultures It also uses human developmental theory to reframe sustainable design across four levels of complexity present in society the Traditional Modern Postmodern and Integral waves Profuse with illustrations and examples the book offers many conceptual tools including Twelve Principles of Integral Sustainable Design Sixteen Prospects of Sustainable Design Six Perceptual Shifts for Ecological Design Thinking Five Levels of Sustainable Design Aesthetics Ten Injunctions for Designing Connections to Nature **Shadow-Makers** Stephen Kite, 2017-10-19 The making of shadows is an act as old as architecture itself From the gloom of the medieval hearth through to the masterworks of modernism shadows have been an essential yet neglected presence in architectural history Shadow Makers tells for the first time the history of shadows in architecture It weaves together a rich narrative combining close readings of significant buildings both ancient and modern with architectural theory and art history to reveal the key places and moments where shadows shaped architecture in distinctive and dynamic ways It shows how shadows are used as an architectural instrument of form composition and visual effect while also exploring the deeper cultural context tracing differing conceptions of their meaning and symbolism whether as places of refuge devotion terror occult practice sublime experience or as metaphors of the unconscious Within a chronological framework encompassing medieval baroque enlightenment sublime picturesque and modernist movements a wide range of topics are explored from Hawksmoor's London churches Japanese temple complexes and the shade patterns of Islamic cities to Ruskin in Venice and Aldo Rossi and Louis Kahn in the 20th century This beautifully illustrated study seeks to understand the work of these shadow makers through their drawings their writings and through the masterpieces they built **Architecture &**

Sustainable Development (vol.1) Magali Bodart, Arnaud Evrard, 2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries Principles and Practices of Lighting Design: The Art of Lighting **Composition** Philip Gordon, LC, NCQLD, 2011 A complete handbook on Lighting Design with both Artistic and Technical approaches for the beginning to advanced lighting designer **Creating Through Mind and Emotions Mário Ming** Kong, Maria do Rosário Monteiro, Maria João Pereira Neto, 2022-07-01 The texts presented in Proportion Harmonies and Identities PHI Creating Through Mind and Emotions were compiled to establish a multidisciplinary platform for presenting interacting and disseminating research This platform also aims to foster the awareness and discussion on Creating Through Mind and Emotions focusing on different visions relevant to Architecture Arts and Humanities Design and Social Sciences and its importance and benefits for the sense of identity both individual and communal The idea of Creating Through Mind and Emotions has been a powerful motor for development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts Environmental Diversity in Architecture Mary Ann Steane, Koen Steemers, 2004-08-02 This book takes the position that the dynamic of the architectural environment is a key aspect of good design yet one which is not well anticipated or understood Environmental variety is a design characteristic closely related to our experience of architecture an architecture of the senses Each chapter demonstrates how an understanding of a particular context or environmental characteristic in dynamic terms informs design The book is an antidote to the misconceptions of optimum environmental performance or fixed criteria instead embracing the richness of environmental variety **Skin Architecture** Timo Carl, 2019-04-25 Timo Carl presents alternatives to curtain wall facades and other flat boundaries creating autonomous spaces He investigates facade typologies with multiple material layers to strategize the relationship between buildings and their environment By revisiting Le Corbusier's seminal brise soleil an alternative reading of the modern project emerges one that is not based on classical compositional rules but instead on the dynamic relationships with environmental forces Finally an exciting series of project based investigations sets out innovative ways in which novel deep skins combine energy conscious performance with the poetics of architecture Color, Environment, and Human Response Frank H. Mahnke, 1996-04-09 Written for architects interior designers and color consultants this ambitious study explores the psychological and physiological effects of color in the man made environment Scientific findings and industry by industry examples are furnished to help professionals specify colors that will create healthful environments in hospitals schools restaurants and other public facilities **The Design of Lighting** Peter Tregenza, David Loe, 2003-09-02 Written primarily for the practising designer The Design of Lighting brings together in one volume all that the practitioner is likely to need The authors combine a technical introduction to lighting and colour theory with a guide to design concepts and criteria to create
