

WHAT IS LIGHT?

Light energy is a form of electromagnetic radiation of a wavelength, which can be seen by the human eye.

Light consists of photons, which are produced when an object's atoms heat up. Light travels in waves and is the only form of energy visible to the human eye.

Light energy is used to help us see – either naturally using the Sun or fire, or with manmade objects like candles or lightbulbs.

Light energy is also used by plants, which capture the light energy from the Sun and use it to produce their food.
