Lighttech Towards A Light Architecture:

Portable Architecture Robert Kronenburg, 2007-06-07 Ideal for those who have been commissioned or are in competition who want to learn about the very latest developments and trends in the area New introductions to each section focus the remit of the book and make it a complete and comprehensive guide to the topic

Architecture in Motion Robert Kronenburg, 2013-08-15 The idea that architecture can be portable is one that grabs the imagination of both designers and the people who use it perhaps because it so often forecasts a dynamic and creative solution to the complex problems of our contemporary mobile society while at the same time dealing with issues of practicality economy and sustainability Architecture in Motion examines the development of portable transportable demountable and temporary architecture from prehistory to the present day From familiar vernacular models such as the tent mobile home and houseboat to ambitious developments in military and construction engineering all aspects of portable building are considered Building on his earlier works *Portable Architecture* and *Houses in Motion* Robert Kronenburg compares traditional forms of building current commercial products and the work of innovative designers and examines key contemporary portable buildings to reveal surprising exciting and imaginative examples He explores the philosophical and technological issues raised by these experimental and futuristic prototypes By understanding the nature of transitory architecture a new ecologically aware design strategy can be developed to prioritise buildings that tread lightly on the earth and still convey the sense of identity and community necessary for an established responsible society This book provides a unique insight into this pivotal field of design

Transportable Environments Robert Kronenburg, 2013-04-03 *Transportable Environments* explores aspects of the historical and theoretical basis for portable architecture and provides an insight into the wide range of functions that it is used for today the varied forms that it takes and the concerns and ideas for its future development Written by a team of international commentators this volume provides a state of the art survey of this specialist area and will be of interest to a wide range of professionals across the construction and design industries

How to face the scientific communication today. International challenge and digital technology impact on research outputs dissemination Marco Medici, Valentina Modugno, Alessandro Pracucci, 2017-05-10 The current research scenario aims for new opportunities and perspectives in divulgation of scientific results Nowadays research asks to be widely diffused and disseminated in a larger community in the effort to demonstrate its innovation and originality so to enlarge network and obtain fund to keep working In this context PhD students as part of scientific community and young researchers in training have to understand the rule of publications to define the best strategy for the dissemination of their research The present book through the experiences of national and international PhD candidates PhDs and Professors is a contribute in the current opened debate on the most effective strategies and related tools to design specific dissemination strategies to highlight and improve the peculiar qualities and disciplines of each research

Transportable Environments 3 Robert Kronenburg, Filiz Klassen, 2006-03-10 The

latest volume in this popular series of books which explores the theoretical basis for temporary and transportable structures where permanence is either not possible or desirable The book provides insight into the wide range of uses of these structures the varied forms they take and the concerns and ideas for future development focusing on portability adaptability sustainability of the built environment and technical innovations A wide range of designed solutions identify and define contemporary directions in design theory and practice With international examples throughout this book will be of interest and value to all those involved in the areas of building design building component manufacture and urban design
