The Play Within the Play Gerhard Fischer, Bernhard Greiner, 2007 The thirty chapters of this innovative international study are all devoted to the topic of the play within the play The authors explore the wide range of aesthetic literary theoretical and philosophical issues associated with this rhetorical device not only in terms of its original meta-theatrical setting from the baroque idea of a theatrum mundi onward to contemporary examples of postmodern self-referential dramaturgy but also with regard to a variety of different generic applications e.g. in narrative fiction musical theatre and film The authors internationally recognized specialists in their respective fields draw on recent debates in such areas as postcolonial studies game and systems theories media and performance studies to analyze the specific qualities and characteristics of the play within the play as ultimate affirmation of the self the Hamlet paradigm as a self-reflective agency of meta-theatrical discourse and as a vehicle of intermedial and intercultural transformation The challenging study with its underlying premise of play as a key feature of cultural anthropology and human creativity breaks new ground by placing the play within the play at the centre of a number of intersecting scholarly discourses on areas of topical concern to scholars in the humanities

The Written World Jeffrey N. Peters, 2018-05-15 In The Written World Space Literature and the Chorological Imagination in Early Modern France Jeffrey N. Peters argues that geographic space may be understood as a foundational originating principle of literary creation By way of an innovative reading of chora a concept developed by Plato in the Timaeus and often construed

by philosophical tradition as space Peters shows that canonical literary works of the French seventeenth century are guided by what he calls a chorological approach to artistic invention The chorological imagination describes the poetic as a cosmological event that gives location to or more accurately in Plato s terms receives the world as an object of thought In analyses of well known authors such as Corneille Moli re Racine and Madame de Lafayette Peters demonstrates that the apparent absence of physical space in seventeenth century literary depiction indicates a subtle engagement with rather than a rejection of evolving principles of cosmological understanding Space is not absent in these works so much as transformed in keeping with contemporaneous developments in early modern natural philosophy The Written World will appeal to philosophers of literature and literary theorists as well as scholars of early modern Europe and historians of science and geography

The Histrionic Sensibility Ziad Elmarsafy,2001 **Time in Romantic Theatre** Frederick Burwick,2022-06-01 The shift in temporal modalities of Romantic Theatre was the consequence of internal as well as external developments internally the playwright was liberated from the old imperative of Unity of Time and the expectation that the events of the play must not exceed the hours of a single day externally the new social and cultural conformance to the time keeping schedules of labour and business that had become more urgent with the industrial revolution In reviewing the theatre of the Romantic era this monograph draws attention to the ways in which theatre reflected the pervasive impact of increased temporal urgency in social and cultural behaviour The contribution this book makes to the study of drama in the early nineteenth century is a renewed emphasis on time as a prominent element in Romantic dramaturgy and a reappraisal of the extensive experimentation on how time functioned
