**Reading the Latter Prophets** Edgar W. Conrad, 2004-04-01

Edgar W Conrad focuses on the prophetic books as composite collections and shows that 1 prophets are characters in the text depicted as figures of the past whose words are significant for a later time 2 reading and writing play a central role in the depiction of prophets 3 prophetic books are presented as written words available to later generations through reading 4 that read as a whole the latter prophets depict the end of prophecy and the emergence of messengers of the Lord Reading the Latter Prophets is an important contribution to the problems of both the formation and function of the prophetic literature

**In Defence of Literary Interpretation** Ken M Newton, 1986-10-29 Deconstructive Field Theory Pasquale De Marco, 2025-03-15 Semiotics the study of signs and symbols is a vast and complex field that has become increasingly influential in a wide range of disciplines in recent decades One of the most important and controversial topics in semiotics is the question of interpretation How do we interpret signs and symbols What are the limits of interpretation And what are the dangers of overinterpretation This book offers a new approach to interpretation called deconstructive field theory

Deconstructive field theory is based on the idea that all interpretations are partial and incomplete and that there is no such thing as a single definitive interpretation of a text Instead every interpretation is a product of the particular context in which it is produced The context of an interpretation includes the reader's own experiences beliefs and values as well as the historical and cultural context in which the text was produced Deconstructive field theory argues that these factors all play a role in shaping the way that we interpret texts and that there is no way to eliminate their influence However deconstructive field theory does not argue that all interpretations are equally valid Some interpretations are more plausible and convincing than others and some are more useful for understanding a text The goal of deconstructive field theory is to help readers develop more sophisticated and nuanced interpretations of texts and to avoid the dangers of overinterpretation This book is intended for students and scholars of semiotics as well as for anyone who is interested in the study of interpretation It is written in a clear and accessible style and it is full of examples from literature film and popular culture We hope that this book will help you to understand the complex and fascinating world of semiotics and to see the world around you in a new light If you like this book write a review

**The Limits of Critique** Rita Felski, 2015-10-20 Felski frees critics from relying on critique as the gatekeeper of literary studies and offers a prescient guide to life in a postcritical world Los Angeles Review of Books Why must critics unmask and demystify literary works Why do they believe that language is always withholding some truth that the critic's task is to reveal the unsaid or repressed In this book Rita Felski examines critique the dominant form of interpretation in literary studies and situates it as but one method among many a method with strong allure but also

definite limits Felski argues that critique is a sensibility best captured by Paul Ricoeur's phrase the hermeneutics of suspicion She shows how this suspicion toward texts forecloses many potential readings while providing no guarantee of rigorous or radical thought Instead she suggests literary scholars should try what she calls postcritical reading rather than looking behind a text for hidden causes and motives literary scholars should place themselves in front of it and reflect on what it suggests and makes possible By bringing critique down to earth and exploring new modes of interpretation The Limits of Critique offers a fresh approach to the relationship between artistic works and the social world Perhaps the most ambitious reappraisal of the discipline to appear since theory's heyday Times Literary Supplement A book that will get all of us to take another look at what we've been doing The Limits of Critique will shock some and elate others No one will feel neutral and no one can afford not to read this book Wai Chee Dimock author of Weak Planet Literature and Assisted Survival

**Karl Popper: Biography, background, and early reactions to Popper's work** Anthony O'Hear, 2004 Born in Austria Karl Popper 1902-1994 was one of the dominant philosophical thinkers of the 20th century A ground breaking thinker he saw the essence of true science as being the readiness to submit theories to severe testing and to reject them when refuted by test His first major book in 1935 The Logic of Scientific Discovery marked him as a major analyst of science and was to have an enormous influence on the way people including major scientists came to think about the field This collection is a timely assessment of the reactions to and abiding influence of Popper's work and the controversy it caused across many academic and political fields The set includes early responses to Popper's work from sources difficult to obtain and also two early reviews by Carnap and Grelling in translations specially prepared for this set It is organised thematically and includes a substantial new introduction by the editor

**The Limits of Identity** Charles Hatfield, 2015-11-15 The Limits of Identity is a polemical critique of the repudiation of universalism and the theoretical commitment to identity and difference embedded in Latin American literary and cultural studies Through original readings of foundational Latin American thinkers such as José Martí and José Enrique Rodó and contemporary theorists such as John Beverley and Doris Sommer Charles Hatfield reveals and challenges the anti universalism that informs seemingly disparate theoretical projects The Limits of Identity offers a critical reexamination of widely held conceptions of culture ideology interpretation and history The repudiation of universalism Hatfield argues creates a set of problems that are both theoretical and political Even though the recognition of identity and difference is normally thought to be a form of resistance The Limits of Identity claims that in fact the opposite is true

**Justice and the Ethics of Legal Interpretation** Susanna Hovinheimo, 2013-03-01 Justice and the Ethics of Legal Interpretation addresses how it is that legal texts laws statutes and regulations can and do have meaning Conventionally legal decisions are justified with reference to language But since language is always open to interpretation and so cannot fully justify any legal decision there is a responsibility that is inherent in legal interpretation itself In this book Susanna Lindroos Hovinheimo uncovers and analyses this responsibility which she argues is not limited by the text that is being

interpreted and through its mediation by the legal system It is not simply a responsibility to read well it implies a responsibility for the effects of the interpretation in a particular situation and with regard to those whose case is being decided Ultimately it is a responsibility to do justice It is these two aspects of responsibility that are conceptualised here as the two key dimensions of the ethics of legal interpretation the textual and the situational Drawing on the work of Wittgenstein Gadamer Derrida and Levinas Justice and the Ethics of Legal Interpretation offers a fresh approach to long standing questions about language and meaning in law It will be of enormous value to those with interests in jurisprudence and legal theory

**Dynamic Interpretation in International Criminal Law** Alexander Grabert, 2015-06-17 The interpretive process in International Criminal Law ICL is characterised by a conflict between the requirements for stability and change On the one hand ICL provides for the criminal responsibility of individuals Thus there is an enhanced requirement for legal certainty According to the principle of legality the addressee of the law must be able to identify the prohibited conduct in advance in order to be able to avoid criminal sanctions On the other hand however ICL forms part of international law Hence it derives to some extent from international treaties Whereas the forms of criminal conduct are continuously evolving treaties are rather static instruments they cannot be adapted to a changing environment within a short period of time Thus reality is developing at a pace that the law cannot always match In consequence there is a certain need to account for evolving circumstances within the framework of interpretation The aim of this book is to review the consequences of this conflict for the interpretation of ICL How can the conflicting requirements be brought into balance Can substantive rules of ICL be interpreted in a dynamic fashion to the detriment of the accused without violating the principle of legality How do international criminal courts and tribunals deal with this issue

**Thematic Threads in the Book of the Twelve** Paul L. Redditt, Aaron Schar, 2012-08-06 For some years the view has become established that the Book of the Twelve is a systematically structured literary unity An exegesis which takes the final canonical text seriously undertakes to understand the structure and theological intention of this unity The papers collected here attempt to reveal significant structures which overarch the individual components Particular emphasis is placed on the reconstruction of thematic threads which are created when individual prophets take up topics from their predecessors e g Jehovah s Day conversion role of the peoples and intensify them The papers were written between 1999 and 2002 under the aegis of the Society of Biblical Literature s Working Group on The Formation of the Book of the Twelve

**Representing the Real** Ruth Ronen, 2021-08-30 This study offers a new perspective on the object represented by art specifically by art that

succeeds to create in its receiver a sense of the real a sense of approximating the true nature of the represented object that lies outside the artwork The object that cannot be accessed through a concept a meaning or a sign the thing in itself is generally rejected by philosophy as being outside the realm of its concerns This rejection is surveyed in a number of philosophical discussions from Kant to Hilary Putnam Turning to the psychoanalytic object an object inexhaustible in terms of its external existence or in terms of its conceptual status or meaning the object is always suppressed partly known inaccessible another notion of the object The Real is suggested as what can neither be contained in language nor reduced to a linguistic referent This solution does not lead away from philosophical interests but rather exposes this dilemma about the object of representation as fundamentally philosophical Cases of artistic realism discussed range from perspective painting to abstract art from tragedies to the literary representation of minds

**Testimonies to the Divine Authority and Inspiration of the Holy Scriptures ...** Alexander Maccaul, 1862 **The Limits of Multiculturalism**, 1999 In the early nineteenth century the profession of American anthropology emerged as European Americans James Fenimore Cooper and Henry Rowe Schoolcraft among others began to make a living by studying the Indian Less well known are the AmerIndians who at that time were writing and publishing ethnographic accounts of their own people By bringing to the fore this literature of autoethnography and revealing its role in the forming of anthropology as we know it this book searches out and shakes the foundations of American cultural studies Scott Michaelsen shows cultural criticism to be at an impasse trapped by tradition even in its attempts to get beyond tradition With this dilemma in mind he takes us back to anthropology s nineteenth century roots to show us a network of nearly unknown AmerIndian anthropological writers David Cusick Jane Johnston William Apess Ely S Parker Peter Jones George Copway and John Rollin Ridge working contemporaneously with the major white anthropologists who wrote on indian topics Michaelsen tests present day theses about difference in light of these AmerIndian voices and concludes that multiculturalism never will locate critical differences from Western or white writing since these traditions are inextricably bound together The Limits of Multiculturalism is a first step in finding the proper anthropological grounds for questions about cultures in the Americas and in coming to terms with the co invention of anthropology by AmerIndians with the fact that Indian voices are lodged at the heart of anthropology
