## **Linear Order And Generative Theory:**

**Linear Order and Generative Theory** Jürgen M. Meisel, Martin D. Pam, 1979-01-01 The term word order studies designates an area of syntax which has become an increasingly central theme in linguistic research Since in at least a narrow sense syntax is the study of how meaningful elements are put together to form sentences a preoccupation with word order would seem inherent in any syntactic study However the focus implied by word order studies is anything but trivial going as it does to the heart of two vital areas of linguistic theory language universals and the form of linguistic models The present collection of papers offers the reader an opportunity to examine some of the more recent ideas in this broad area concentrating on some of the more controversial issues within the generative transformational model **Papers from the 4th International Conference on English Historical Linguistics, Amsterdam, April 10-13, 1985** Roger Eaton, Olga Fischer, Willem F. Koopman, Frederike van der Leek, 1985-01-01 These papers are a selection from papers presented at the 4th International Conference on English Historical Linguistics Amsterdam 1985 Most studies deal with some aspect of an earlier stage of English though present day varieties of English are also under investigation Many of the papers show that there is a growing interest in the question why a certain change has taken place Furthermore the volume contains a considerable number of papers on historical syntax Morphology 2000 Sabrina Bendjaballah, 2002 This volume focuses on two main topics comparative morphology i e cross linguistic analysis including typology dialectology and diachrony and psycholinguistics i e on line processing off line experiments child language Since the psycholinguistic papers of this volume consistently refer to issues of grammatical theory and many of the contributions on morphological theory consider psycholinguistic questions the topics are interconnected Both inflectional and derivational morphology are dealt with The volume spans a broad set of languages of the world such as African Amerindian Arabic and Chukotko Kamchatkan in addition to the Indo European languages This volume differs from the other collective volumes on morphology both by the breadth of topics and by great integration of theoretical and methodological perspectives Text and Context in Functional Linguistics Mohsen Ghadessy, 1999 This text aims to examine the nature of text and context using theoretical models based in the framework of Systemic Functional Linguistics SFL *On Subject and Theme* Ruqaiya Hasan, Peter H. Fries, 1995-11-23 The ten papers in this volume focus on Subject and Theme Theme began its life as a semantic notion in the work of Vil m Mathesius while Subject has traditionally been seen as just a syntactic entity More recently two related perspectives on these concepts have attracted linguists attention the formal criteria for their recognition and the relations between the two concepts Using the systemic functional model as their point of departure the papers in the present volume consider the two notions in a wider context by relating them to the interpersonal and textual metafunctions of language By contrast with the current linguistic approaches the primary focus here is neither simply on formal recognition criteria nor on the relation of these elements to each other instead the notions of Subject and Theme are examined from the point of view of their function

in the economy of discourse with studies of their significance in English and French as well as in a range of non Indo European languages Definitions of the concepts are offered on the basis of their discourse functions which are also important in selecting the formal recognition criteria and in understanding their mutually supportive role vis vis each other Most of the papers in the volume are a selection from presentations made at the 19th International Systemic Functional Congress at Macquarie University

**Towards a Critical Sociolinguistics** Rajendra Singh,1996-05-24 This collection of twelve essays some of which have been written specifically for this volume by well known European and North American sociolinguists reflects an increasing recognition within the field that sociological and theoretical innocence can no longer be underwritten by it and offers a multi pronged and multi methodological way to move towards a critical reflexive and theoretically responsible socio linguistics It explores with courage and sensitivity some very important areas in the enormous space between Bloomfieldian idiolect and Chomskyan UG in order to situate the human linguistic enterprise and offers valuable insights into human linguisticity and sociality These explorations expose the limits of correlationism determinism and positivistic reificationism and offer new ways of doing sociolinguistics Intended for both practicing and future sociolinguists it is an ideal text book for the times particularly for graduate and advanced undergraduate students

*Grammaticalization* Jürgen Klausenburger,2000-01-01 In this monograph various aspects of the morphosyntactic evolution of the Romance languages are shown to interact in a theory of grammaticalization The study argues for the incorporation and subordination of inflectional morphology within a grammaticalization continuum constituting but a portion of the latter Parameters of natural morphology are seen as principles of grammaticalization but the reverse is also true rendering grammaticalization and natural morphology indistinguishable In the context of this theoretical framework Chapter 2 deals with Latin French and Italian verbal inflection focusing on universal and system dependent parameters of natural morphology In Chapter 3 a theory of grammaticalization is built on divergent elements including not only grammaticalization studies proper but also the perception production line of inquiry and typology and branching issues permitting the phasing out of the traditional synthesis analysis cycle Chapter 4 touches on nominal inflection in particular that of Old French and Rumanian the most revealing histories in the Romance domain Chapter 5 finally thoroughly discusses extant theoretical questions in grammaticalization prominently featuring the relevance of invisible hand explanations and the crucial role played by unidirectionality This study will be of interest to specialists in Romance and historical linguistics as well as morphological theory

**Exploring the Role of Morphology in the Evolution of Spanish** Joel Rini,1999-01-01 After a brief survey of the perception of morphological change in the standard works of the Hispanic tradition in the 20th century the author first attempts to refine concepts such as analogy leveling blending contamination etc as they have been applied to Spanish He then revisits difficult problems of Spanish historical grammar and explores the extent to which various types of morphological processes may have operated in a given change Selected problems are examined in light of abundant textual

evidence Some include the resistance to change of Sp dormir to sleep morir to die the vocalic sequence ee the reduction of the OSp verbal suffixes ades edes ides odes and the uncertain origin of Sp eres you are Important notions such as the directionality of leveling phonological vs morphological change in the nominal and verbal paradigms the morphological spread of sound change and the role of morphological factors in apparent syntactic change are discussed Sounds, Words, Texts and Change Teresa Fanego,Belén Méndez-Naya,Elena Seoane,2002-07-18 This volume and its companion one English Historical Syntax and Morphology CILT 223 offer a selection of papers from the Eleventh International Conference on English Historical Linguistics held at the University of Santiago de Compostela From the rich programme over 130 papers were given during the conference the present thirteen papers were carefully selected to reflect the state of current research in the field of English historical linguistics The areas represented in the volume are lexis and semantics text types historical sociolinguistics and dialectology and phonology Many of the articles tackle questions of change and linguistic periodization through the use of methodological tools like corpora linguistic atlases thesauri and historical dictionaries The theoretical frameworks adopted include among others multi dimensional analysis systemic functional grammar Communication Accommodation Theory historical discourse analysis and Optimality Theory *Lexical Specification and Insertion* Peter Coopmans,Martin Everaert,Jane Barbara Grimshaw,2000 The papers in this volume address the general question what type of lexical specifications we need in a generative grammar and by what principles this information is projected onto syntactic configurations or to put it differently how lexical insertion is executed Many of the contributions focus on what the syntactic consequences are of choices that are made with respect to the lexical specifications of heads The data in the volume are drawn from diverse languages among which Brazilian Portuguese Bulgarian Dutch English French German Icelandic Italian Mohawk Norwegian Polish Russian **Textual Parameters in Older Languages** Susan C. Herring,Pieter van Reenen,Lene Schøsler,2001-01-23 Textual Parameters in Older Languages takes a contemporary approach to the inherent limitations of using older texts as data for linguistic analysis drawing on methods of text analysis pragmatics and sociolinguistics to supplement traditional historical and philological methods The focus of the book is on the importance of controlling for textual parameters defined by the editors as dimensions of variation associated with texts and their production including text type degree of poeticality orality and dialect in the analysis of older language data Failure to do so can result in invalid generalizations recognizing the influence of textual parameters conversely raises a myriad of issues for the practice and theory of historical linguistics The 12 essays in this collection apply this approach in analyses of anaphora non finite verbal forms particles punctuation word order and other phenomena in a wide range of languages including Ancient Tamil Sanskrit Latin Heian Japanese Medieval Greek Old French Old Russian Middle English and Modern Danish An in depth introduction by the editors lays out the goals of the textual parameters approach and considers the methodological and theoretical consequences of the evidence presented in the book as a whole **History and Perspectives of Language Study** Olga

**Negotiation and Power in Dialogic Interaction** Edda Weigand, Marcelo Dascal, 2001-09-06 The topic of negotiation has turned out to be of crucial interdisciplinary interest for our understanding of what we are doing in language use Are we exchanging meanings defined in advance and presupposing equal understanding on the basis of a rule governed system or are we negotiating meaning and understanding in the framework of an open dialogic universe Negotiation on the one hand can be taken as the name of a specific dialogue type or action game of bargaining On the other hand it represents a methodological concept for describing and explaining dialogic interaction which replaces the orthodox view of pattern transference The papers collected in this volume deal with both versions of the concept of negotiation This volume contains a selection of papers presented at the International Conference on Pragmatics and Negotiation at Tel Aviv University and the Hebrew University of Jerusalem in June 1999 The dialogic aspect was taken as the key concept to guide the present selection
